Planning Report #71-79

CITY OF PORTLAND, MAINE  
MEMORANDUM

TO: Chairman and Members of the Planning Board  
FROM: Douglas L. Mason, Planning Department  
DATE: August 9, 1979  
SUBJECT: Site Plan Review of Warehouse at West Commercial Street

A wholesale distribution and sales combined-office and warehouse structure proposed by J.B. Brown for 344-392 West Commercial Street. Commercial and industrial parts will constitute the materials handled in the building. Building floor coverage is 21,920 sq. ft. The site is approximately 50,000 sq. ft. in area. Existing and proposed zoning is I-3B Industrial and is located in the Shoreland Zone.

The proposed building is a 16 ft. high pre-engineered metal structure. Two truck loading docks and off-street parking are provided. No waterfront development is proposed.

An existing chain-link fence separates the development from the abutting Cianbro Corporation property to the east.

Public Works Department, Building Inspection, and Fire Departments have reviewed and approved the plan.

The development is located near a flood-prone area and the Maine Emergency Preparedness Department has been contacted to determine if the development is located in a 100 year floodplain. The City Zoning Ordinance requires special provisions for structures located in a Shoreland Zone within or less than 2 feet above the 100 year floodplain. *>12' above MHW*

No proposed easements or other burdens now exist on the site. No conflicts exist with either the Land Development Plan or City projects.

Test borings were taken as part of a subsurface investigation by a private consulting firm and a copy of this report is available for Planning Board review. Four abutters were notified of the Public Hearing.

Recommendation

CONDITIONAL APPROVAL

The Staff recommends that the Planning Board approve the site plan with the following conditions:

1. determination be made by the Planning Department with the cooperation of the Maine Emergency Preparedness Department concerning the relative location of the site to the 100 year floodplain;
2. if the structure is located on a 100 year floodplain, that it meet the requirements of the Shoreland Zone of the City Zoning Ordinance.
3. curbs and sidewalks must be provided which meet the approval of Public Works Dept.

NEDPL-BF

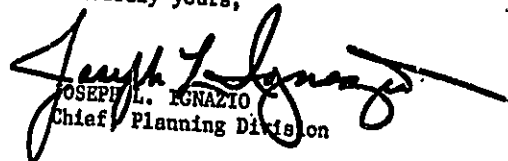

30 August 1979

Mr. Douglas L. Mason  
Planning Department  
City of Portland  
211 City Hall  
Portland, Maine 04101

I am writing in response to your request of 15 August 1979 for a flood hazard evaluation of a site in Portland, Maine located south of the railroad tracks and west of the crossing of Commercial Street by the railroad tracks.

Mr. Richard DiBuono, you will recall, on 21 August 1979 gave you the following information over the phone. The Corps of Engineers estimate of the 100 year stillwater level elevation at the subject site was 9.6 feet above national geodetic vertical datum (ngvd) which is equivalent to 13.9 feet above mean low water and also 4.9 feet above mean high water.

Sincerely yours,

  
JOSEPH L. IGNAZIO  
Chief, Planning Division

Mr. Alan M. Fishman  
J. B. Brown & Sons  
57 Exchange Street  
Portland, Maine 04101

Dear Mr. Fishman:

At the meeting of the Portland Planning Board on Tuesday evening, August 14th, the Board considered your firm's site plan for a new warehouse and sales office at 344-392 West Commercial Street. Access will be provided on the westerly side of the building for truck loading and parking for 16 cars will be furnished at the rear. The proposed structure will be located in the I-3b Industrial Zone.

The Planning Department recommended approval of the site plan subject to a condition that the Army Corps of Engineers determine that the proposed project is not located within the 100-year flood zone. A letter to request this determination has been sent to the Army Corps of Engineers Headquarters in Waltham, Massachusetts.

On motion made by Mr. Cummings and duly seconded, the Board voted unanimously to approve the site plan, as submitted, subject to the flood plain condition being met, which is beyond the purview of this Board.

The Planning Board members join me in extending our best wishes to your firm on the completion of this new addition to the Waterfront and the community.

Sincerely,

*John H. Conway, Sr.*

Mr. Paul Pronovost, Chief  
Floodplain Management Section

~~US Army Corp of Engineers~~

BLDG 114 South

US ~~Army~~ Army Corp of Engineers

424 Trapelo Road

Walton, Mass.

Dear Mr. Pronovost:

After talking by phone with a member of your staff on Tuesday, August 14, 1979, I was ~~requested~~ <sup>asked</sup> to send our request for floodplain determination to your office with a map of the site under question.

The Planning Department is reviewing a site plan proposal to build a one story warehouse-office structure at 344-392 W. Commercial Street, near the intersection of Commercial Street and Danforth Street and west of the railroad track crossing on Commercial Street. See enclosed USGS map.

~~Our request~~ The information we require is the determination of the site's location <sup>as</sup> on, or beyond the 100 year

Floodplain. If you can tell us the 100 year flood elevation at this point on the Fore River, with respect to mean high water (or mean low water or a similar reference) and, we could ~~submit~~ complete our analysis.

Our informational needs are solely this one fact. Due to the ~~the~~ Planning Board's ~~the~~ concerns for the time, I will hope that you may be able to provide this information to us, at least orally, by <sup>the</sup> Monday, August 20, 1979. I will call your office on ~~that~~ that date to provide any additional information which you might need or hopefully, receive the data we need.

Your staff was most cooperative during our phone conversation yesterday and we appreciate greatly the service which you have offered. Thank you for your help. I look forward to talking with you on Monday.

Sincerely,

Douglas J. Hanson

Dear Sir:

A development proposal to construct ~~a~~ 21,920 sq. ft. warehouse at 344-392 W. Commercial Street in Portland has been submitted to the Planning Department for review. The site is located on the Fore River near the intersection of Denforth and W. Commercial Street. Adjacent include CIABRO CORP. to the east and Maine Lobster Compx (leasee from J.B. Brown & Sons) to the west. CIABRO operates a pier near the <sup>east</sup> property boundary of the subject site, extending into the river. (See encl. map).

Our Zoning Ordinance requires ~~with~~ special conditions for non-residential structures located in ~~the~~ a ~~100~~ 100 year floodplain. Our investigations indicate that the proposed structure is located near a flood-prone area.

(over)

We request that ~~and~~ your department notify us as soon as possible of any information which you may provide concerning the flooding characteristics (predicted or historical) of this specific site. ~~to~~

Please send your comments or questions to Donald E. Mezathlin, Planning Director, or myself, at ~~115-5451~~ Planning Department, City Hall, Room 211, Portland, Maine, 04101 or phone 775-5451. Thank you for your help.

Sincerely,

Douglas L. Brown

MAJOR DEVELOPMENT SITE PLAN DATA FOR APPROVAL - PROPOSED WAREHOUSE/  
DISTRIBUTION BUILDING AT 366 WEST COMMERCIAL STREET, PORTLAND, MAINE

The following is in response to the Part 2 written statement requirements by the applicant, for our client, J. B. Brown and Sons.

- 2a. The proposed use of this building will be to provide a wholesale/warehouse facility with some sales counter transactions.
- 2b. The site has frontage on West Commercial Street of 252' and a total useable land area of approximately 50,000 sq. feet. The ground coverage/floor area of the building is 21,920 sq. feet.
- 2c. To the best of our knowledge, there are no proposed easements or other burdens now existing or to be placed on the property.
- 2d. All solid waste disposal will be accomplished with a sewer service running to the north side of West Commercial Street to an existing sewer manhole. Portland Water District has confirmed the availability of this sewer for our purposes.
- 2e. All utilities have been checked for availability. A six inch water main provides ample water for domestic and fire protection services. A six inch gas main is available for possible gas space heating requirements. The required number of telephone lines for full telephone service is available. Also, Central Maine Power has indicated availability of three-phase power for our 200 amp, three-phase electrical service required.

F. W. CUNNINGHAM & SONS

Page 2  
August 1, 1979

- 2f. There is less than one foot of elevation difference from one point of the site to any other. This will allow us to locally elevate the building somewhat, and provide surface drainage patterns that will keep water off the street, away from the building and generally heading toward the Fore River as it now does. It is our opinion that there are no significant drainage problems associated with the development of the site.
- 2g. The time required for the development of this project is approximately four months. The late August start would allow completion by the end of the year.

Please refer to the attached drawings, sheet 1 and sheet 2 for the information required by paragraph BI of the site plan ordinance.
