Mr. Charles Rogan  
Insurance Commissioner  
Augusta, Maine

Re: New England Feed & Grain Company  
Commercial St., Portland, Maine

Dear Mr. Rogan:

On a recent inspection on Feb. 14, 1968 at this plant with two (2) of your inspectors upon the request of the Portland Fire Department (Department Chief Ridley) the following conditions were found electrically:

The N.E.C. requires dust ignition proof motors be used in this building, and broken down into sub. div. as pertaining to use of specific areas. All were O.K. except those which were being dismantled and replaced.

There was a few minor infractions, such as covers off L.B.'s, a pair of open wires from compressor to solenoid control and a fixture in the loading room. These are supposed to be taken care of immediately and I shall reinspect this week.

Very truly yours,

Frank Herbert  
Electrical Inspector  
City of Portland

Dear Mr. Larson:

Permit to construct a metal frame and metal covered boiler room enclosure attached to the existing masonry welding shop building is being issued subject to our conversation as follows:

1. You have been advised by the writer that no allowance is shown on the plans for any differential settlement or heave between the addition and the existing building.
2. I understand that as an added measure to prevent heaving on the foundation slab that the area surrounding the perimeter of the addition is to be paved with a slope to drain water away from the structure.
3. The owner is to assume full responsibility for this design should movement caused by frost or otherwise cause damage.

Very truly yours,

Gerald E. Mayberry  
Deputy Inspector of Buildings
