QUOTATION TO:

November 8, 1986

Robert Tirrell
45 Middle Rd.
Falmouth, Me. 04105

Job: Sprinklers at
48 Park St., Port.

Price \$ 945.00

Quotation To:

To install a Sprinkler System meeting the requirements of the City of Portland at the 4 unit apt. bldg. located on 48 Park st., Port. Our price includes all materials, labor, and sales tax.

DESCRIPTION OF WORK

Install 2 sprinkler heads in 1st. floor hallway, a head just inside the doorway of each of the 4 apartments, 1 head at basement doorway, and 2 heads in the 2nd. floor hallway. A total of 9 sprinkler heads will be installed.

Steel pipe and fittings will be used and sprinkler heads will be of the residential rapid response type (Central's Omega R-1).

ADDITIONAL NOTES

- * The areas of sprinkler protection do NOT meet the requirements of Maine Life Safety however our pipe sizing WILL be based on those schedules.
- * We will make a TEMPORARY, but not adequate water supply connection to the old 3/4 inch service now in the building. It is my understanding the bldg. owner will be installing the required 2 inch water service within the next 6 months. The above price does NOT include this final tie-in.
- * This system does NOT meet N.F.P.A. standards or Maine Life Safety requirements, but is a result of the owner and the City of Portland compromise.

Every effort has been made to minimize costs on this project.

BUILDING PERMIT REPORT

DATE: 10/16/86
ADDRESS: 48 Park St
REASON FOR PERMIT: Change of use 4 to legal 4
BUILDING OWNER: Sharon Doucette
CONTRACTOR: _____
PERMIT APPLICANT: Robert Terrell
APPROVED: 1-2-3-4-5-6 DENIED

CONDITION OF APPROVAL OR DENIAL:

- *1.) All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with self-closers.
- *2.) Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
- *3.) Each apartment shall be equipped with an approved single station smoke detector powered by the house current. The detector shall be located in an area which will provide protection for the sleeping areas.
- *4.) The boiler shall be protected by enclosing with one(1) hour fire rated construction including fire doors and ceiling, or by placing over the boiler, two(2) residential sprinkler heads supplied from the domestic water.
- *5.) Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping rooms must have minimum net clear openings of 5.7 square feet (0.53m²). The minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm).
