WMcD 2/1/54

Registered Mail Return Receipt

January 22, 1954

Harry P. & Priscilla E. Webber 19 Winslow St.

Pear Mr. & Mrs. Webber:-

Happening to be passing along Brackett St. toward another inspection, I noticed that two of the four chimneys in the building which you are reported to own at 139 Brackett St. are in a dangerous condition above the roof.

As authorized and directed by Sect. 109 of the building Gode of Portland (copy enclosed) you are hereby required to have these dangerous conditions permanently corrected before February 1st, 1954.

The front chimney leans toward Spring St. very definitely and the joints in the brick masonry are defective and the mortar gone to such an extent that one can look right through the chimney from the street and see daylight. Should the top of this chimney fall into the yard it might do serious injury or worse to persons or property.

The next chimney toward the rear (second one from the front) has a crack in the manonry wall toward Brackett St. near the top and one or more loose bricks at the top. The joints in this masonry appear to be defective also.

While you have your mason working on these chimneys it would be well to have him go completely over at least these two chimneys and perhaps the other two also to make sure that each chimney flue has a cast iron cleanout door and frame at the bottom, as required by the Building Code, and that the chimney flues are clean.

Very truly yours,

Warren McDonald Inspector of Buildings

WMcD/G Enclosure: Copy of Sect. 109 of the Building Code

Class of Building or Type of Structure Third Class

Portland, Maine, Lugust 9, 1986, 1 To the INSPECTOR OF BUILDINGS, PORTLAND, ME. The undersigned hereby applies for a permit to erect alter install the following building structure equipment in accordance with the Laws of the State of Maine, the Building Code of the City of Portland, plans and specifications, if any, submitted herewith and the following specifications: Within Fire Linits? Yes Location 159 Brackett Street Owner's or Lessee's name and address Maude C. Bucknam 88 Cilff Road, Vallesley Hills. Contractor's name and address. Moses P. Harry P. & Priscilla E. Webber 19 Winelow St.

Dear Mr. & Mrs. Webber:-

Happening to be passing along Brackett St. toward another inspection, I noticed that two of the four chimneys in the building which you are reported to own at 139 Brackett St. are in a dangerous condition above the roof.

As authorized and directed by Sact. 109 of the Building Code of Portland (copy enclosed) you are hereby required to have these dangerous conditions permanently corrected before February 1st, 1954.

The front chimney leans toward Spring St. very definitely and the joints in the brick masonry are defective and the mortar gone to such an extent that one can look right through the chimney from the street and see daylight. Should the top of this chimney fall into the yard it might do serious injury or worse to paragrants. to persons or property.

The next chimney toward the rear (second one from the front) has a crack in the masonry wall toward Brackett St. near the top and one or more loose bricks at the top. The joints in this masonry appear to be defective also.

While you have your mason working on these chimneys it would be well to have him go completely over at least these two chimneys and perhaps the other two also to make sure that each chimney fluo has a cast iron cleanout door and they have at the better as required by the Rullding Code and that the chimney fluores at the better as required by the Rullding Code and that the chimney fluores at the better as required by the Rullding Code and that the chimney fluores are the better as required by the Rullding Code and that the chimney fluores are the better as required by the Rullding Code and that the chimney fluores are the code and that the chimney fluores are the code and the code and the code are the code are the code and the code are t frame at the bottom, as required by the Building Code, and that the chimney flues are clean.

Very truly yours,

Warren McDcnald Inspector of Buildings
