APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, May 2, 1965

PERMIT ISSUED
MAY 4 1965
CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 47 Bradley St. Use of Building Dwelling No. Stories 2 New Building Existing "
Name and address of owner of appliance Norman A Sawyer, 47 Bradley St.
Installer's name and address N A Bruns Company 235 Franklin St. Telephone

General Description of Work

To install Oil Burner (replacement) in connection with existing gravity warm air heat.

IF HEATER, OR POWER BOILER

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Kind of fuel?
Minimum distance to burnable material, from top of appliance or casing top of furnace
From top of smoke pipe From front of appliance From sides or back of appliance
Size of chimney flue Other connections to same flue
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion?

IF OIL BURNER

Name and type of burner Winckler-gunttype Labelled by underwriters' laboratories? yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bottom
Type of floor beneath burner concrete Size of vent pipe 1 1/2"
Location of oil storage basement Number and capacity of tanks 275 existing
Low water shut off Make No.
Will all tanks be more than five feet from any flue? yes How many tanks enclosed?
Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

[Empty space for miscellaneous information]

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., \$1.00 additional for each additional heater, etc., in same building at same time.)

APPROVED: O.K. 5-3-65 [Signature]

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes

AP 47 Bradley Street-1

September 11, 1950

Mr. H. S. Stults
R. F. D. 35
Mr. Norman Sawyer
47 Bradley Street

Copy to: Mr. Gardner Sawyer
Berwick, Maine

Gentlemen:

Application for permit and sketch with it to cover construction of a porch at the first floor level of the dwelling at 47 Bradley Street, part of the porch to be enclosed and part to be open, is issued herewith to Mr. Stults. The sketch does not seem to agree with the application in every particular and the sketch is not entirely clear to me; so, the permit is issued subject to the conditions which follow. If this letter is not understood or if you are unable or unwilling to abide by those conditions, it is important that you refrain from starting the work and return the permit card immediately with further explanations so that some adjustment may be made.

1. It seems evident from the sketch that the enclosed part of the porch is to be on the side of the dwelling just in front of the rear corner and the open part is to run along the rear wall and project as far beyond the side wall of the building toward Congress Street as the enclosed part is wide. There seems to be some discrepancy between sketch and application, in that the application says that the enclosed portion of the porch is to be 5' measured out from the side wall of the dwelling and 7' the other way, and that the open part of the porch is to be 6' 3" measured out from the rear wall of the building and 13' parallel with the rear wall of the building. The sketch, however, shows that the total dimension of the porch from the rear of the open portion to the exterior wall of the enclosed portion toward Bradley Street is to be 10' 6". If the application is right about the 5 x 7 enclosed portion, it would seem that this dimension from the rear of the open porch to the wall of the enclosed porch toward Bradley Street would be 13' 3". It is doubtful if this would make any material difference in the size and spacing of framing members, however.

2. For foundations the sketch shows four cedar posts under the open porch and two cedar posts under the enclosed portion so that the 4x6 sill, which will of course be set with the 6" dimension upright, would not be on any span exceeding 7', which should be sufficient.

Cedar posts are also required for foundation at the bottom of the steps, and these like those under the porch are required to extend no less than 4' below the surface of the ground.

3. The 2x6 floor joists will no doubt be supported on the end toward the wall of the house by suitable nailing strip spiked through to the frame of the building, the weatherboarding having been removed and then replaced with suitable flashing. On their outer ends the 2x6's should be supported either on the top edge of the 4x6 sills or should be notched over no less than 2x3 nailing strips spiked to the side of the 4x6 sill with the bottom edge of the nailing strip flush with the bottom edge of the sill.

4. Apparently the floor joists of the open porch are all to run at right angles with the rear wall of the house which means that these floor joists on the end of the open porch toward Congress Street would have to be supported upon a header running from the rear corner of the house to the sill over the cedar post opposite the corner of the house. This same member would have to support the exterior wall of the enclosed portion of the porch. A 4x6 would be suitable at this location, and the 4x6 floor joists should be notched over nailing strips or supported on top edge the same as with the outline sills.

Mr. H. S. Stults
Esq. Norman Sawyer

September 11, 1950

5. The floor of this porch will be several feet above the ground, and it is assumed that the 4x6 sills will be just beneath the floor level rather than down at the tops of the cedar posts. Thus the cedar posts will either have to be long enough to extend from a point 4' below the surface of the ground to the underside of the sills, or the cedar posts will have to be surmounted with ordinary posts. This is not made clear on the sketch, but no doubt Mr. Stults will work this out all right.
6. The sketch indicates that the space beneath the floor of the porch is to be boarded in. No doubt some type of fr network will have to be provided for nailing the boards, and care should be exercised that these enclosing members do not come in contact with the ground to avoid heaving by frost and thus defeating the very purpose for which the cedar posts are extended 4' below the ground.
7. The enclosed portion of the porch, of course, will be built as required for all exterior walls—double 2x4 or 4x4 corner posts, 2x4 studs no more than 16" from center to center, doubled 2x4 plate, doubled 2x4 headers over the window with jask studs etc.

Very truly yours,

Warren McDonald
Inspector of Buildings
