Frederick Doull

Signature of owner by: John J. Conley

AP 162 Clark St.

May 21, 1953

Mr. John F. Conley
85 Cumberland Ave.

Copy to: Mr. Frederick W. Doull
162 Clark St

Dear Mr. Conley:-

We are unable to issue a permit for construction of an open piazza five feet by seven feet on the front of the dwelling at 162 Clark St., corner of Cushman St., because the proposed construction would be in violation of the Zoning Ordinance, Sect. 83 of this Ordinance applying to the Apartment House Zone where the property is located specifies that, between the lines of intersecting streets and a line joining points on each street line ten feet distant from their point of intersection, no building, structure or foliage shall be erected or maintained between a height three and one half feet and a height ten feet above the level of the grade of the curbs on each street.

It is clear that part, if not all, of the proposed construction would be within the area indicated above. While it is true that part of the dwelling and perhaps the existing front entrance platform are already encroaching upon this area, we are not authorized to issue a permit for any increase in this existing encroachment.

Under these circumstances if you will return to this office within ten days the receipt for permit fee paid at time of filing application, we will authorize a refund by voucher.

Very truly yours,

Warren McDonald
Inspector of Buildings

Memorandum from Department of Building Inspection, Portland, Maine

162 Clark Street--alterations of windows in dwelling house for Mrs. Walter Marzahn by W. A. Mathes, builder, --5/3/46

To Owner & Builder:

The owner is applying for the permit was unable to tell the permit clerk what size header or beam is proposed over the five foot eight inches wide mullion window opening in the kitchen, or how much weight would come upon this beam. It would be well for the builder to get this matter straightened out before he proceeds as notice to this office is required of readiness for inspection before the header or beam is covered from view. That would be a bad time all around to find out that not sufficient strength had been provided. Note also that no less than 2x4 studs are required upright under each end of the header, and the same under each end of the header provided over the ordinary window to be cut in the rear hall.

CC: Mr. W. A. Mathes
4 Hall Court

(Signed) Warren McDonald
Inspector of Buildings

REQUIREMENT IS WAIVED

It is understood that this permit does not include installation of heating apparatus which is to be taken out separately by and in the name of the heating contractor.
