CITY OF PORTLAND, MAINE
BUILDING AND INSPECTIONS SERVICES

DATE May 21, 1975

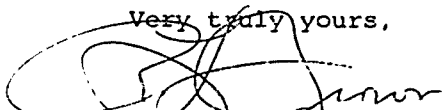

TO: Santino Viola
12 Front St.

With relation to permit applied for to demolish Sharon
blg. at 210 Danforth St. belonging to
later home, it is unlawful to commence
demolition work until a permit has been issued from this
department.

Section 6 of the Ordinance for rodent and vermin control
provides, "It shall be unlawful to demolish a building or structure
unless a provision is made for rodent and vermin eradication.
No permit for a demolition of a building or structure shall be
issued by the Building and Inspection Services Department until
and unless provisions for rodent and vermin eradication have
been carried out under supervision of a pest control operator
registered with the Health Department."

The building permit for demolition cannot be issued until
the provisions of this section have been satisfied. It is the
obligation of owner or demolition contractor or both to take up
with the Health Department the matter of complying with this
section, being prepared to inform that department what registered
pest control operator is to be employed.

Very truly yours,

R. Lovell Brown
Director

William Economos
206 Danforth Street
Portland, Maine 04102

cc to: Fire Department

Dear Sir:

The Fire Department reports that the wooden fire escape serving the second and third floors on the rear of the building at the above address is in bad repair.

An inspection by this department reports that the lower run of stairs is completely missing and the stairs and platform above are all rotted.

You are hereby ordered to repair this dangerous condition at once, and report its completion within the next ten days or face legal action by this department.

Very truly yours,

R. Lovell Brown
Director of Building Inspection & Services

210 Danforth Street

W. H. Demmons, Inc.
322 Commercial Street

Gentlemen:

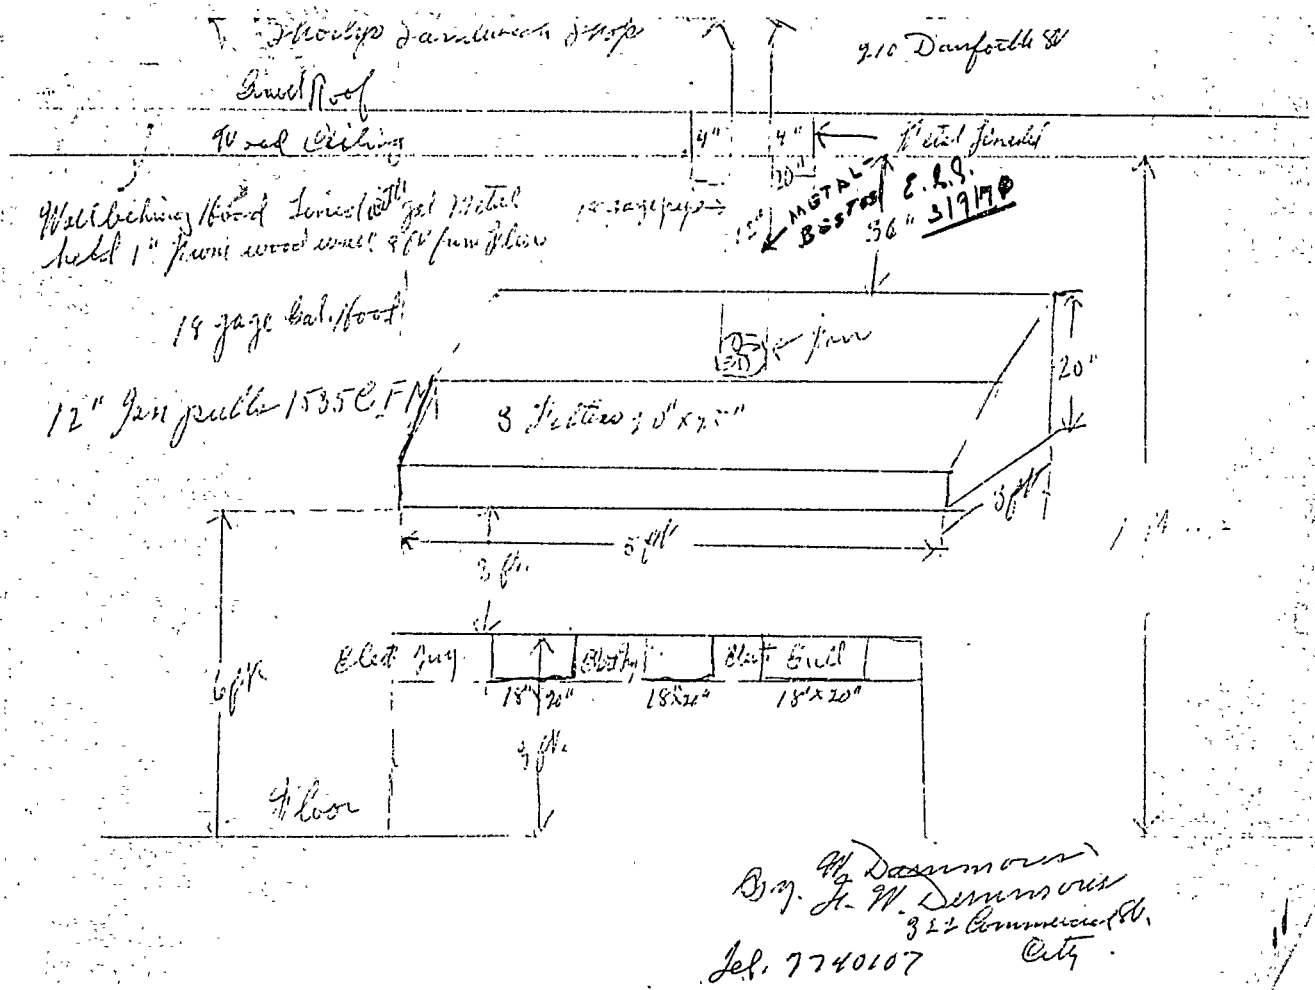

The Building Code specifies that a metal thimble at least 12" greater in diameter than the duct extending from the ceiling to a point at least 9" above the surface of the roof and spaced out at least 1" from combustible material at the sides of the thimble shall be provided for a duct passage through roof construction. The opening at the top of the thimble around the duct is required to be kept open to the air and protected by a weather hood attached to the duct and so located that there will be at least a 3" clearance between the weather hood and the top of the thimble. If desired, the space between the side of the duct and the thimble may be filled with mineral wool insulation, but the top of the insulation must be left exposed to the open air.

The back and sides of the hood are required to be kept at least 18" from combustible walls and partition unless a shield of at least 28 gauge sheet metal spaced out at least 1" from partition on incombustible spaces is provided. Such a shield is required to extend to all directions at least 18" beyond the hood.

Very truly yours,

Earle S. Smith
Plan Examiner
