Memorandum from Department of Building Inspection, Portland, Maine
Installation of Oil Burner-- 261 Western Promenade--February 17, 1940

To Installer:

Presumably the oil is to reach the burner from the storage tanks by gravity. If this is the case, since there are two 275-gallon tanks, a three-way valve will be required.

CC Dr. Adam P. Leighton,
261 Western Promenade.

Mr. Warren McDonald
Inspector of Buildings
Portland, Maine

Dear Mr. McDonald:

Regarding the note attached to the permit which you issued for the installation of the new oil burner for Dr. Adam P. Leighton at 261 Western Promenade, relative to the installation of a 3-way valve with the two oil storage tanks.

These two tanks, when installed, will have the oil delivered from them by suction lift, rather than by gravity, so there will be no occasion for a 3-way valve to be installed in this particular case.

Yours very truly,

BALLARD OIL & EQUIPMENT CO. OF MAINE
