APPLICATION FOR PERMIT

PEHMIT ISSUE) AUG 30 1986

UNATEROF TO YILL Third Class Class of Building or Type of Structure_

PORTLAND, MAINE, August 30, 1966 To the INSPECTOR OF BUILDINGS, Portland, Mc. The undersigned hereby applies for a permit 20 repair or renew roof covering of the following described building in accordance with the laws of Maine, the Building Code of the City of Portland, and the following specifications: Nelson H Ward, 16 Cherry St. Owner's name, and address_ Contractor's name and address owner Dwelling Use of building-Present Dwelling Asphalt ____Type of present roof covering-No. Stories 12 Style of roof pitch Type and Grade of roofing to be used Asphalt Class C Und Label.

GENERAL DESCRIPTION OF NEW WORK

To cover entire roof.

Signature of Owner by: INSPECTION COPY

A.P.- 16 Cherry St.

Juga 13, 1966

Hr. Helson H. Ward 16 Charry Street

Dear Hr. Ward:

Permit to construct open porch 8'x12' on side of dwelling at the above named address is being issued subject to compliance with the Building Code restrictions as follows:

- 1. Sills are to be solid 4x6 inch upright members lapped spliced at the corners instead of the double 2x8's asked for on the application.
- 2. Gedar posts are to be spaced six feet on centers on end of porch which carries the floor load.
- 5. Headers carrying the roof load on a six foot span will need to be solid upright 4x6 inch members.
- 4. Roof rafters on an 8 foot span with 42 inch pitch per foot will need to be 2x5 inch rafters spaced 16 inches on centers.

Very truly yours,

G. Allan Soule Inspector

June 10, 1966

Hr. Nelson H. Ward 16 Cherry Street

Dear Hr. Ward:

In checking your application to construct an 8x12 foot porch on side of the dwelling at the above named location we find that we are unable to continue processing your permit until further information is provided as follows:

- 1. We will need a diagram showing the framing of the porch in cross-section. The diagram will need to show such things as rafters, wooden posts, floor joists, sills, foundation, etc.
- 2. We will need to know the spacing of the cedar posts under the sill both on the sides and rear of porch.

6.8. Sills can be no less than solid 4x6 inch members.

4. The size of the floor joists will have to be increased unless the span of the joists are decreased by a gird under the center of the floor.

5. We will need to know the spacing of the wooden posts to support the roof. L'O.C

6. What size header to support the roof load over the wooden posts? 416 - 6' synh - 3 - 4'x4" pasts as Supports

2. The wine of roof rafters will have to be increased. 2x6x 8 5p

Very truly yours,

A. Allan Soule Inspector
