File: Rept. 3579B-I

May 24, 1937

Mr. George Chase,  
84 Roberts Street,  
Portland, Maine

Dear Sir:

We are issuing to J. H. Kennedy a building permit to cover an extension upon your garage at 62-64 Roberts Street.

This addition is proposed to be approximately two feet deep in the rear of the present garage. The building Code requires that the extreme outside of the overhang of the eaves, in other words sometimes called the drip, be at least two feet from the rear property line. In trying to check the location of the proposed addition, an Inspector from this office finds that there is a fence which has been standing for many years at the rear of your property which may or may not be the actual established property line. If we take the fence as the line, the distance from the new addition, or the extreme outside of it, appears to be satisfactorily in compliance with the Ordinance. . . taking some measurements to identify the nature of this fence, however, it seems quite likely that the fence is not on the actual property line established on paper when the property was subdivided, but that the actual theoretical property line is somewhat closer to Roberts Street, thus indicating that the overhang of the proposed addition would be closer than two feet to the theoretical property line.

We are not disposed to raise any question about this dimension and are willing to accept the fence as the property line as far as the proposition of issuing the building permit is concerned, but it is only fair to you to advise you that in case the property owner in the rear is able to establish that the fence is not the property line, it will follow that the location of the addition is in violation of the Building Code in that it is not two feet from the actual property line. This may be a very remote possibility, but it seems best to us that you know the full particulars.

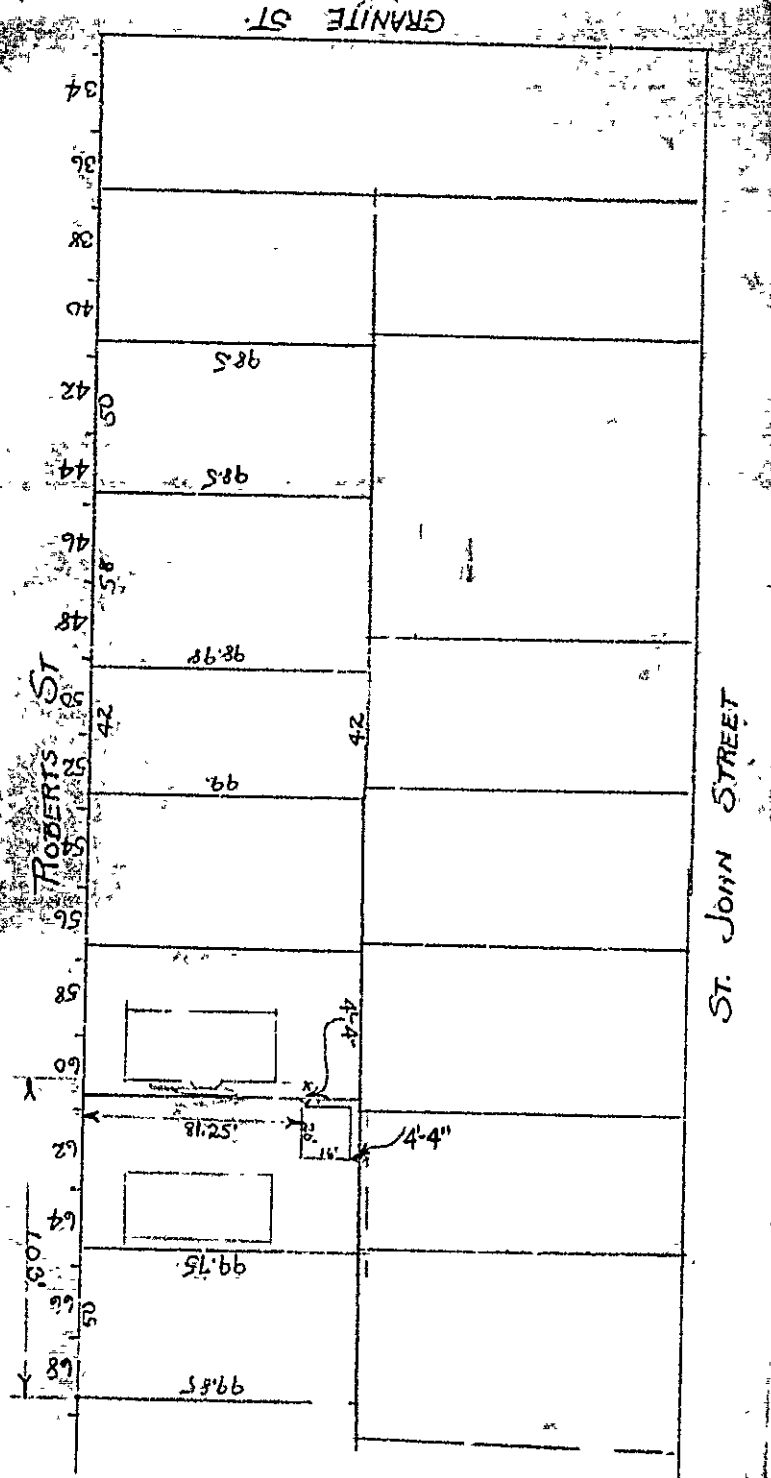

Very truly yours,

McD/H  
CC: J. H. Kennedy

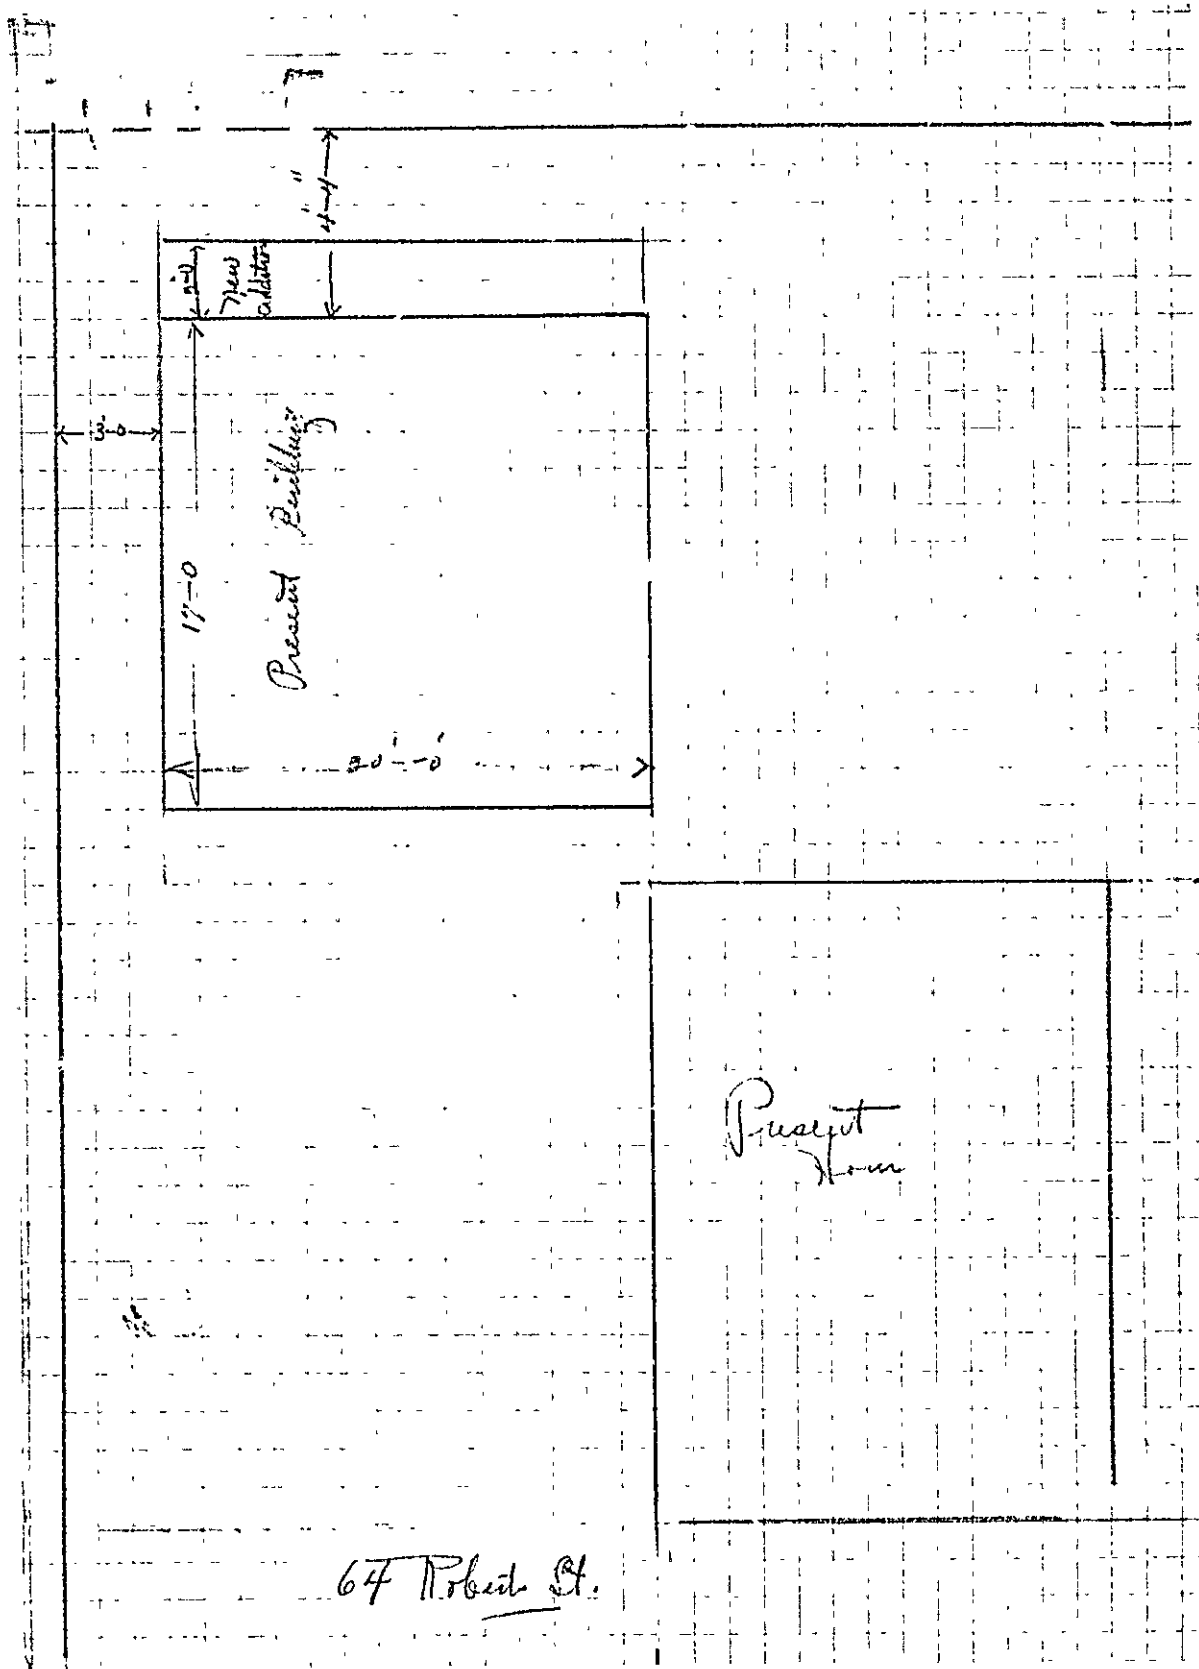

Inspector of Buildings

I believe the floor or sills of this addition as well as the sills of the rear of the existing garage will be a few feet above the grade of the ground at this point. I presume that you will lap-splice the new sills to the old and that you will make full provision for attaching the frame of the addition to the existing frame of the garage.

Final Notif.

Final Inspn: 6/2/37

Cert. of Occupancy issued None

NOTES

5/21/37 - The rear of this building is apparently 4' from the rear line. The only thing to denote this line is a wooden fence partly fallen over. A 2' addition with a 6" overhang evidently will be closer than 2' from eave to rear line. There is no side line in evidence, but I should judge that there is only about 2' from side of building to line. Present

roof is a shed roof sloping to the west with no overhang on the sides and just a gutter on the east. I understand that this roof is to be removed and a new hip roof with 6" overhang provided. 5/26/37 New roof framed. A. J. S.

6/2/37 - Work completed. A. J. S.

#2509A

August 4, 1930

Dr. William F. Hanson  
12 Exeter Street  
Portland, Maine

Dear Sir:

Enclosed is the building permit covering alterations to the piazza of George S. Chase at 84 Roberts Street.

Please pay particular attention to the special clause in the application which you have signed with relation to the framing and the fastening of the piazza.

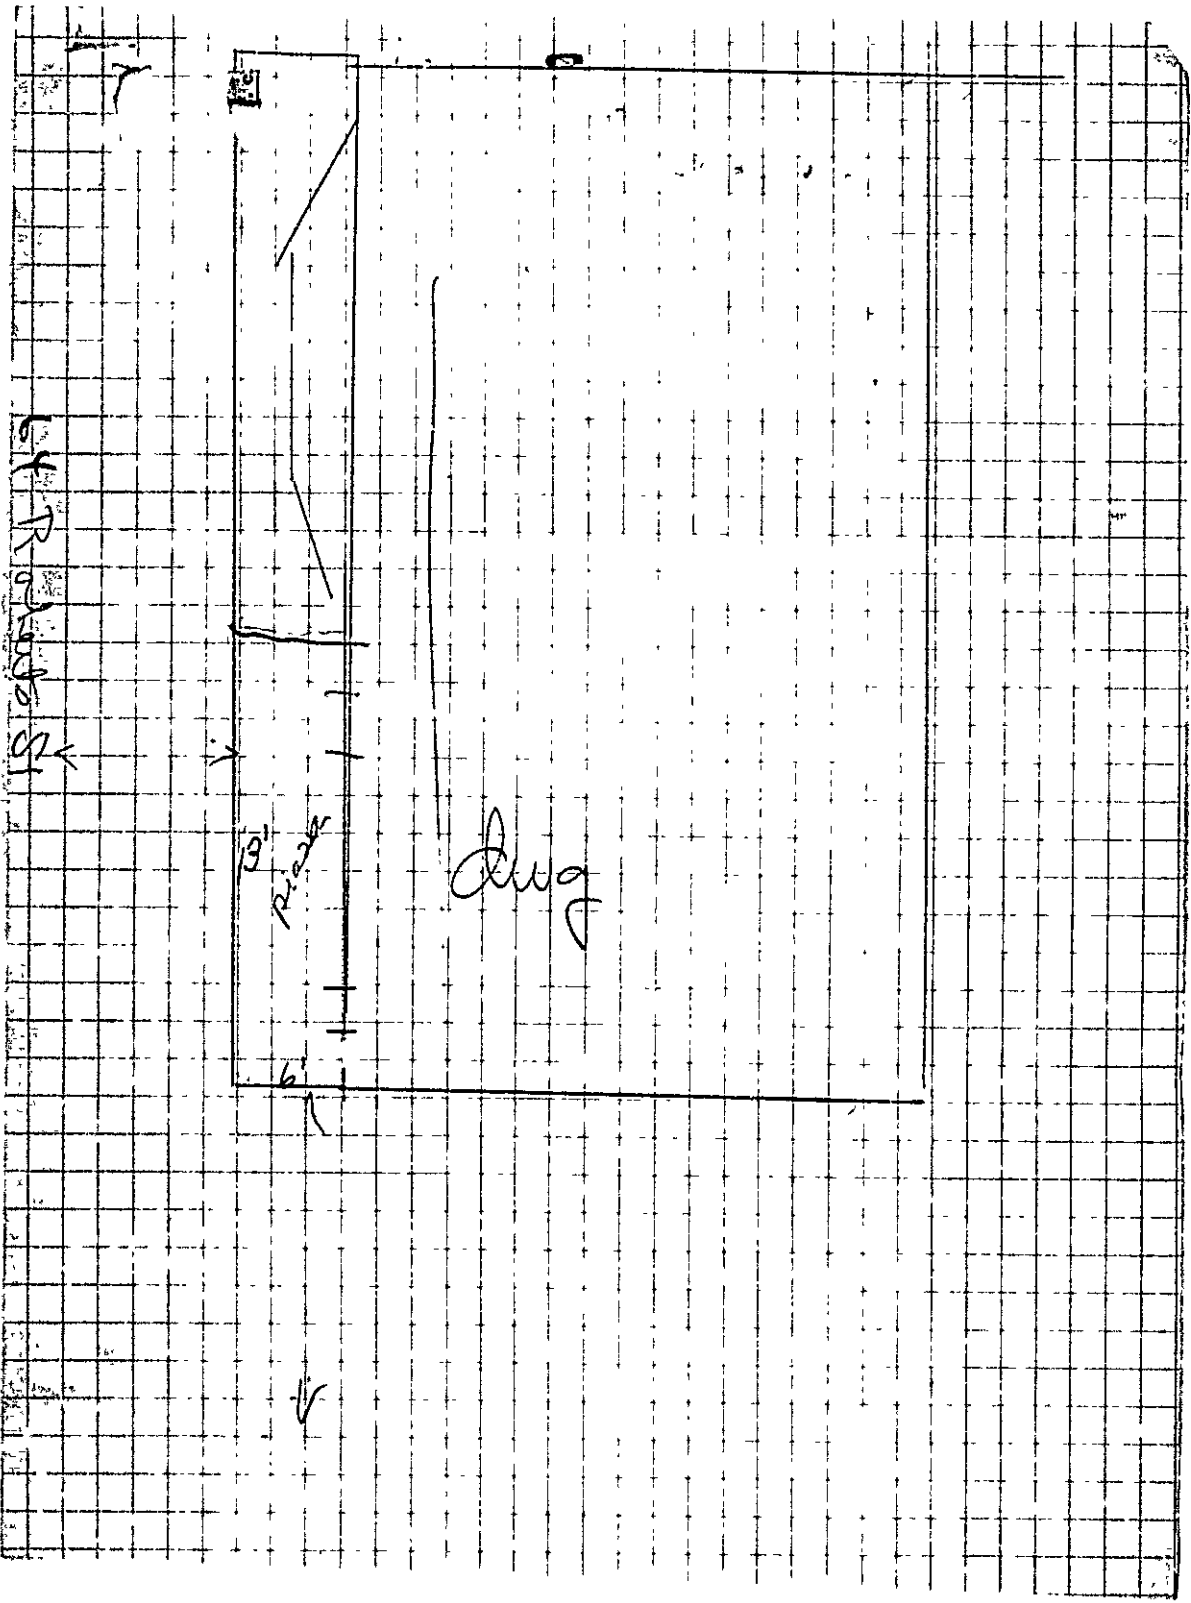

We have had a great deal of trouble with piazza jobs all over the City, and have adopted this uniform procedure in order to get better work generally.

Very truly yours,

Inspector of Buildings.
