21 Berkeley Street
Portland 5, Maine

Subject: The effective conditions as to chimney in the building at 1111 Congress Street.

Dear Madam:

Upon inspecting the furnace installations at 1111 Congress Street, an inspector from this office reports as regards the chimney in the cellar to which this furnace is connected, that there are one or more loose bricks in the walls of the chimney, that the joints of the masonry require repairs by way of pointing up, and that the floor timbers of the first floor are in contact with the outside of the chimney wall. All of these are considered dangerous from the standpoint of fire, and in addition the chimney has no standard clean out device at the bottom of the flue.

As authorized by a portion of Revised Statutes of Maine (copy enclosed herewith) you are hereby directed to have these unsafe conditions corrected in permanent fashion without delay.

The wooden framing of the first floor should be set back in some acceptable manner so that all of the woodwork will be at least one inch away from the chimney wall. Care must be used in doing this work so as not to weaken the first floor condition. After the woodwork has been set back, an opening will be left between the woodwork and the chimney wall at least one inch wide, this opening required to be firestopped with incombustible material so that a fire taking place in the cellar will not draw up quickly between the chimney and first floor framing. This firestop is usually made by tacking strips of metal to the under side of the timbers on the four sides of the chimney, the strips to be wide enough and to be so arranged that they will run out and fit snugly against the chimney wall, thus preventing a draft of any proportion up into the concealed space. A tighter job is often affected by using mineral wool above the metal, mineral wool being non-burnable.

Very truly yours,

Inspector of Buildings

Enc
WMcD/L

P.S. The chimney flue should be thoroughly cleaned out if found necessary.

FILL IN COMPLETELY AND SIGN WITH INK

Portland, Maine.

Gentlemen:

With relation to your application for a permit to cover the erection of two poster panels on the property at 1101-1107 Congress Street, a preliminary permit has been issued to cover the construction of the poster panel which was intended to face Congress Street, only.

With relation to the other board - the one intended to face Park Avenue - Mr. Curry and I have had some discussion about the location of this board as regards its location so close to the street line of Park Avenue. I understood from him that you were intending to take the matter up directly with Mr. Deering, Chairman on Zoning and Building Ordinance Appeals.

Since I heard nothing from you further, I have taken the matter up with the Chairman on Zoning and Building Ordinance Appeals showing him the photograph which Mr. Curry sent to me.

The Chairman of the Committee feels that the proper place for the board is flat against the wall of the building on the corner, that eliminating any possibility of accumulation of rubbish and committing of nuisances behind the board. In any event the Committee is unwilling to approve the board if any part of it is to be located close to the street line of Park Avenue and the front line of the dwelling house just east of the proposed location.

Under these circumstances, please advise what you wish to do so that we can clear our records of the final permit. If you decide to place the board flat against the building and will change the application and plan accordingly, I will be able to issue the permit at once.

Very truly yours,

KED/H

Inspector of Buildings.
