Re: 601 Danforth St.

Dear Mr. Kelley:

In reply to your letter of September 15, 1975 in which you ask the zone of the property at the above named location and whether additional replacement petroleum storage facilities can be erected on this property, this location is zoned I-3b, Industrial. We would allow a replacement of the storage facilities, same size or smaller, in same location. We would not allow additional storage facilities on this property under Sec. 602.13A.13 of the Zoning Ordinance.

If I can be of any further help to you, please do not hesitate to call me here at this office in City Hall.

Dear Mr. Soule:

I would greatly appreciate your checking the city zoning laws to determine whether additional or replacement petroleum storage facilities can be erected on property owned by Gulf Oil Corporation of Danforth Street. The site is identified as Assessors Plan No. 72, parcels A 3,4,5,7 and ~~2~~ 3.6 15 and D 2 and 3. I should also like to be certain of the exact zoning of the property. I plan to be in Portland this week and will contact you, however, I would appreciate a written reply to my office.

Thanking you in advance.

Sincerely yours,

In reply to your letter of September 15, 1975 in which you ask the zone of the property at the above named location and whether additional replacement petroleum storage facilities can be erected on this property, this location is zoned I-3b, Industrial. We would allow a replacement of the storage facilities, same size or smaller, in same location. We cannot allow additional storage facilities on this property under Sec. 602.13A.13 of the Zoning Ordinance.

If I can be of any further help to you, please do not hesitate to call me here at this office in City Hall.

Very truly yours,

A. Allan Soule

Gentlemen:

Permit to partition off second floor for offices as per plans is being issued herewith subject to the following Building Code requirements:

1. The new fire escape indicated on the rear elevation plan shows a sliding escape ladder which must be eliminated because it is dangerous to those who might have occasion to use it.

A regular drop ladder is to be used at this location and it should not be more than 10 feet above grade.

If it should be found that the new drop ladder interferes with the large window opening you may wish to relocate it in some manner. If you have some other idea concerning a drop ladder please let us know before starting the work.

2. The exit doors should be equipped with a push bar or vestibule latchset. It should also have an exit light on the inside with a white light on the outside and these are to be operated by a single switch.

Very truly yours,

Earle S. Smith
