Permit No. 0362

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, April 8, 1936

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 4 Devonshire Street Use of Building Cleaning & Pressing
Name and address of owner Nelson W. Dyer, 4 Devonshire St. Ward 7
Contractor's name and address Alasco Burners Co., Inc. Winchendon, Mass. Telephone _____

General Description of Work

To install high pressure steam boiler (3h.p.) in connection with existing pressing machines
which have been operating by two boilers

IF HEATER, POWER BOILER OR COOKING DEVICE

Is heater or source of heat to be in cellar? yes If not, which story _____ Kind of Fuel Oil
Material of supports of heater or equipment (concrete floor or what kind) concrete
Minimum distance to wood or combustible material, from top of boiler or casing top of furnace, 2' 2 1/2"
from top of smoke pipe 10' shield will be provided, from front of heater over 4' from sides or back of heater over 4'
Size of chimney flue 12x12 Other connections to same flue none automatic gas hot water heater with safety pilot

IF OIL BURNER

Name and type of burner Alasco Model B Labeled and approved by Underwriters' Laboratories? yes no
Will operator be always in attendance? yes Type of oil feed (gravity or pressure) pressure gains
Location oil storage basement No. and capacity of tanks 1 - 115 gal., 275 gal.
Will all tanks be more than seven feet from any flame? yes How many tanks fireproofed? _____

Amount of fee enclosed? 1.00 (\$1.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)
Alasco Burners Co., Inc.

NOTES
4/13/36. Burner ok for pressing machine, but remote controls. Operator not always

in attendance as stated on application. Side of boiler is but 20" from sheathed partition, to provide shield. Warm air heater shown on plans to be removed, will remain. The one pipe heater in the adjoining cell may be removed, if not, this will make three connections on this flue. The existing smoke pipe of the warm air heater is but 5" below the girder, this should be lowered. Ok 4/30/36. New burner as covered by amendment installed. Protection has been put on wall. Mr Dyke said one pipe furnace will be removed next fall. Vent for this boiler is 7" below girder where it enters chimney, but metal shield on. Ok

File: P.36/362-I

April 10, 1936

Mr. Nelson W. Dyer,
4 Devonshire Street,
Portland, Maine

Dear Sir:

Wednesday, April 8, 1936 we issued a permit covering the installation of a small high pressure boiler, with an industrial oil burner connected to it, in your plant at 4 Devonshire Street and I desire that you shall be fully advised as to the conditions surrounding this installation.

The application for this permit was signed by J. H. Powell and in the application he stated that there would always be a competent attendant on duty, approximately in the room where the oil burner is in operation, at all times while the oil burner is operating. This is an important distinction, because, without that statement the permit for the burner could not have been issued as this particular burner does not carry upon it the metal label of the Underwriters' Laboratories, Inc. which label is necessary according to law, if a competent attendant is not to be constantly on duty approximately in the room where the burner is in operation.

The applicant stated your original plan included disconnecting the warm air heater in the cellar and adapting some sort of feed coil to be connected to the new boiler for heating your plant when heat is necessary. He was told that such a use of this oil burner is not legal because it obviously requires that the burner be in operation at night and other times when no person is present in the establishment.

I am writing you this letter so that you may be fully advised of the situation well in advance of the time when you will require heat in the building. When that time is reached the installer will have closed his contract and be out of town and out of reach so that we shall be compelled to hold you responsible for any conditions that then develop.

Please be governed accordingly.

Very truly yours,

McS/H

Inquiry 4 Devonshire St.

April 24, 1943

Mr. Nelson W. Dyer,
4 Devonshire Street,
Portland, Maine

Subject: Question of Installing New Coal-fired
5-horse power boiler in dry cleaning establish-
ment of Nelson W. Dyer at 4 Devonshire St.

Dear Sir:

I am assuming that you plan to install the new coal-fired boiler as an auxiliary to the present 5-horse power boiler, both to be connected to the same chimney flue with the possibility that both boilers will be operating at the same time. If this is the case and irrespective of the fact that your establishment is for dry cleaning, unless the chimney is built for a high pressure boiler (walls of the chimney at least eight inches thick with the inside four inches for a height of at least 15 feet above the highest smoke pipe connection and at least two feet below the lowest smoke pipe connection to be fire brick laid in fire clay) the chimney would not be safe for such high heat and I could not approve it.

Since your establishment is for dry cleaning, your question brings up others in my mind which will certainly come up when you apply for a permit either to build a new chimney or to install the new boiler. It is my recollection that your establishment has always been allowed in this building and under the circumstances as to protection because the solvent you were using was non-inflammable and non-explosive. I have had the impression from time to time since the war emergency that securing non-inflammable and non-explosive solvents has been steadily retarded until perhaps they are not obtainable at all. It is my impression that some of the cleaning establishments have seen fit to go to more or less inflammable and explosive solvents. If you find yourself in that situation you can see what a difficult problem arises if you will carefully examine Section 205 (especially paragraphs a-2, b-4, c-1, e-1.2 and e-2, f-2, f-5, h-1).

Of course if you are still able to operate on the same basis as your plant was originally started, non-inflammable and non-explosive solvents these questions will not arise.

Very truly yours,

WCD/S

 4. To install a new sewer line from the manhole to the street sewer.
 5. To install a new sewer line from the manhole to the street sewer.

#35B-I

June 30, 1933

Mr. Nelson W. Dyer
4 Devonshire Street
Portland, Maine

Dear Sir:

Enclosed is the building permit covering installation of Columbia Super Cleaner outfit for cleansing clothing, this permit having received the approval of the Chief of the Fire Department on account of the non-inflammable nature of the solvent to be used, Trichloroethylene.

As I explained to you, your establishment is located in a Local Business Zone. In my judgment, this device in operation will not produce odors objectionable to the neighborhood, but I think you understand that you will have to assume whatever chances are involved of possible action under the Zoning Ordinance to prevent odors, since it is true that the Zoning Ordinance forbids any business or process in this zone which produces odor detrimental to the neighborhood.

Very truly yours,

Inspector of Buildings.

 Last use Stores and dry cleaning establishment No. families _____

General Description of New Work

To install a Columbia Super Cleaner (using Trichlorethylene as a solvent). This permit is given based on the report that the cleaning agent is not highly inflammable nor explosive, and with the understanding that one part of the machine may be opened so that the cleansing agent is exposed and that at all times when the machine is so opened an automatic exhaust fan freely ventilates the entire equipment and discharges all noxious fumes into flue to outside air

It is understood that this permit does not include installation of heating apparatus which is to be taken out separately by and in the presence of the heating contractor.

~~PERMITS FOR ERECTION OF
PUBLIC SIDEWALK OR STREET
SIGN~~

APPROVED FOR PERMIT TO ERECT SIGN

Director of Sign and Communication

INSPECTOR OF WORKS

APPROVED FOR PERMIT TO ERECT SIGN

C-32-18-1

Copy to Mr. Nelson W. Iyer- 4 Devonshire Street
February 19, 1932

Mr. W. J. Parent
38 Portland Street
Portland, Maine

Dear Sir:

We have discovered that a sign which you made and probably erected has been placed over the public sidewalk of Devonshire Street at the premises of Nelson W. Iyer without a permit from this department to cover the erection of the sign.

If you are responsible for the erection of this sign, it is also evident that you are responsible for violation of the Building Code. You should be aware that such a sign may not legally be erected without first securing a permit from this department, and that such a permit for a sign projecting over the public sidewalk or street may not be issued to any but a bonded sign hanger. I think you are not sound.

We have notified Mr. Iyer of this condition, and requested that he remove the sign. You can readily see that he is going to be put to additional and unnecessary expense in order to make this sign legal. I agree with him that the sign maker in such a case should be familiar with the regulations and not only observe them himself, but advise his client; so that he may observe them.

If you are responsible for erecting the sign in this illegal fashion, I think the least you can do is to see to it that Mr. Iyer is saved from all extra expense on account of the dilemma in which he finds himself. Will you not come to this office at your earliest convenience at some time during the Inspector's office hours named above, and see what can be done to remedy this situation?

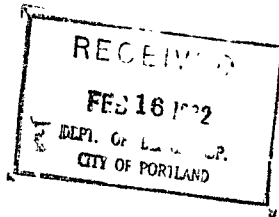

Very truly yours,

Inspector of Buildings.

PORTLAND, MAINE

February 16, 1932

Mr. Warren McDonald
Inspector of Buildings
Portland, Me;

In reply to your letter of February 15th I might state that my sign was built and hung by W. J. Parent on Portland St and I had supposed that he had obtained a permit and that the sign was hung right. I will take the matter up with him immediately and get him to do it right.

It rather seems to me that your office has taken plenty of time to notify me and a very short notice to make the change.

Yours truly
Nelson W. Dyer

C-52-18-1

February 15, 1932

Mr. Nelson W. Iyer
4 Devonshire Street
Portland, Maine

Dear Sir:

Upon examination we find that there is a sign in front of your place of business at 4 Devonshire Street, which projects over the public sidewalk about three feet and has the bottom edge of the sign about ten feet above the sidewalk. This sign apparently has been hung over the public sidewalk without a permit from this department first being secured.

Any sign which projects over the public sidewalk or street of the city requires a permit from this department before erection, and such a permit may only be issued to a bonded sign hanger of which there are several in the city. Furthermore any sign which projects beyond the street line more than two feet is required to be at least fifteen feet above the grade of the sidewalk.

Please arrange to have this sign removed on or before February 20, 1932. If you desire to hang the sign legally, you should make arrangements with some bonded sign hanger to make application for the permit and to hang the sign in legal fashion.

Very truly yours,

Inspector of Buildings.
