Hovember 20, 1952

Mrs. dulla Gornam Portland, Haine

Copies to; Scribner & Ivareon with permit to by Union Street replace steam boiler

Callerd Oil & Equipment Co., 135 Marginal May

Dear Era. Corham:

Probably after your recent harrowing experience with your steam boiler, this latter is unnecessary, but I would like to make sure that you realine the importance of having an automatic low water cut-off in-Stalled when your new boiler is set in and the cil burner arranged to serva it.

After our telephone conversation about the situation, perhaps you understand that this safety control does. It same apparent in the case of your toiller that through some cause all of the veter con out or wes removated from the briler. If your heating when her been accurred that or your tolder that through some cause all of the water can out or wen evaporated from the biller. If your heating plant had been equipped with one of these low water cut-offs, when the water is the boiler reached a predetermined low level, the oil burner would have been shut off unte-matically and the trouble and danger avoided.

like all automatic arrangements some attention should be given to this low water cut-off device regularly—an altention which can hardly be afforced by anyone except the owner of the balliding. This servicing consists merely of flushing the water cut of the low water cut-off control once or twice a month to make sure that corresion and sediment do not afford the device so that it would not be appraised. Herefit our control onte or twice a south to make sale that corresion and seed-ment do not affect the device so that it would not be operative. Usually the instructions for this servicing are attached right to the device, and should be left so attached so that all will know the need.

Very truly yours,

Warren Molonald Inspector of Buildings

Whed/B

### APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

PERMIT ISSUED OSOSO (19 1950 )

1.	Portland, Maine, October 16, 1950 City of PORILA
