CITY OF PORTLAND, MAINE  
EXECUTIVE DEPARTMENT

July 7, 1945

Earle M. Neill Randall Post No 142  
American Legion  
Peaks Island  
Maine

Gentlemen:

Your request for permission to erect an Honor Roll on City property at the corner of Welch Street and Island Avenue is hereby granted, with the understanding, of course, that you maintain it in a satisfactory condition. The board, we understand, should be painted probably every six months in order to keep it in good condition.

Yours very truly,

(Signed) J. E. Barlow

HESSIN

June 25, 1934

Mr. Mitchell D. Goffin  
129 Dartmouth Street  
Portland, Maine

Dear Sir:

Upon examination of the supporting underwork at the Gem Theatre, Peaks Island, we find the following conditions which require immediate attention, in fact before approval is given for opening the theatre:

New concrete piers are required on account of the condition of the wooden posts at the following locations (the post locations are referenced to the blue print of the layout which you furnished several years ago): A-2; A-3; C-5; E-4; F-7a; H-8a; K-9; L-9; L-9a and L-9b; K-5; Q-5; Q-9a and Q-9b; and J-2.

The post at F-7a requires wedging up on the pier to make it tight.

At J-2 there is a girder which does not get adequate bearing on the post. It may be necessary to provide a new post setting on a concrete pier at this point.

One post near K-1 and another near L-1 are leaning badly. These posts were called to your attention last year and nothing was done about them. I doubt if it will be possible to straighten these posts to make them worth anything. Probably it will be necessary to provide concrete piers under both of them and wedge the posts up tight against the girders.

There is a loose brace at K-7. This, too, was called to your attention last year and not repaired.

The concrete pier formerly provided at H-9 has deteriorated so badly that it is necessary to provide a new pier, or at least a new top on the old pier, if the bottom of it is sound. It is quite evident that the reason for the deterioration of this pier is because the pier originally put in was too narrow at the top.

The post at Q-7 is leaning very badly and it may be necessary to provide a new pier under this post.

Please let me know what you propose to do about these matters promptly, as I do not feel that I can add my approval to the theatre license until these matters are all taken care of.

July 8, 1931

Messrs. Mitchell Coffin & J. Azger  
128 Parkside Street  
Portland, Maine

Gentlemen:

Referring to the changes that you are making in the foundation of the building on Peaks Island known as the Gen. Ballroom, after a careful examination of most of the foundation posts under the building, I find that in addition to the eighteen footings which you planned this year, it will be necessary to provide footings also for the following posts, reference being made to Hibbet & Griffin's plan for the post indications: A-1, B-7, F-1-a, F-1-b, F-1-c, I-1, I-2, K-2, L-1-a, L-1-b, and K-3. The post indicated as I-1 is one that lies about halfway between posts 1 and 2, line 1. In addition to these, we find that a place in the sill on the side of the building towards Main Street between posts B-2 and Z-1 has a splice in the sill with no support under it. It will be necessary to provide a concrete pier to adequately support this splice. All of this work must be done this year as these posts are not in satisfactory condition to carry over the winter, or to insure the further use of the building without repair. So found seven other posts which will undoubtedly require new footings next year besides three of the footings which were set last year which were not done properly, and will have to be altered in place next year.

With regard to the platform on the westerly side of the building, it will be necessary to entirely rebuild this platform including supplying new posts throughout. If the platform is to be designed as indicated, it will be necessary to use plank tongued and grooved for the surface of the walk, and we will require that the posts be set in concrete around a substantial curb around the platform should be provided, of course. The walk is in extremely bad shape at the present time, and it will be necessary for you to proceed without delay to have it rebuilt. Unless immediate steps are taken to replace the platform, I am inclined to think that the Inspection Board will see the necessity of requiring that the building be closed until the platform is replaced.

You should come to this office and make an amendment to the permit which Mr. Leo has issued including the footings for posts mentioned above which were not included in the original application and including the construction of the new platform on the westerly side. We shall want a detail of the supports of the posts of this platform furnished with the amended application.

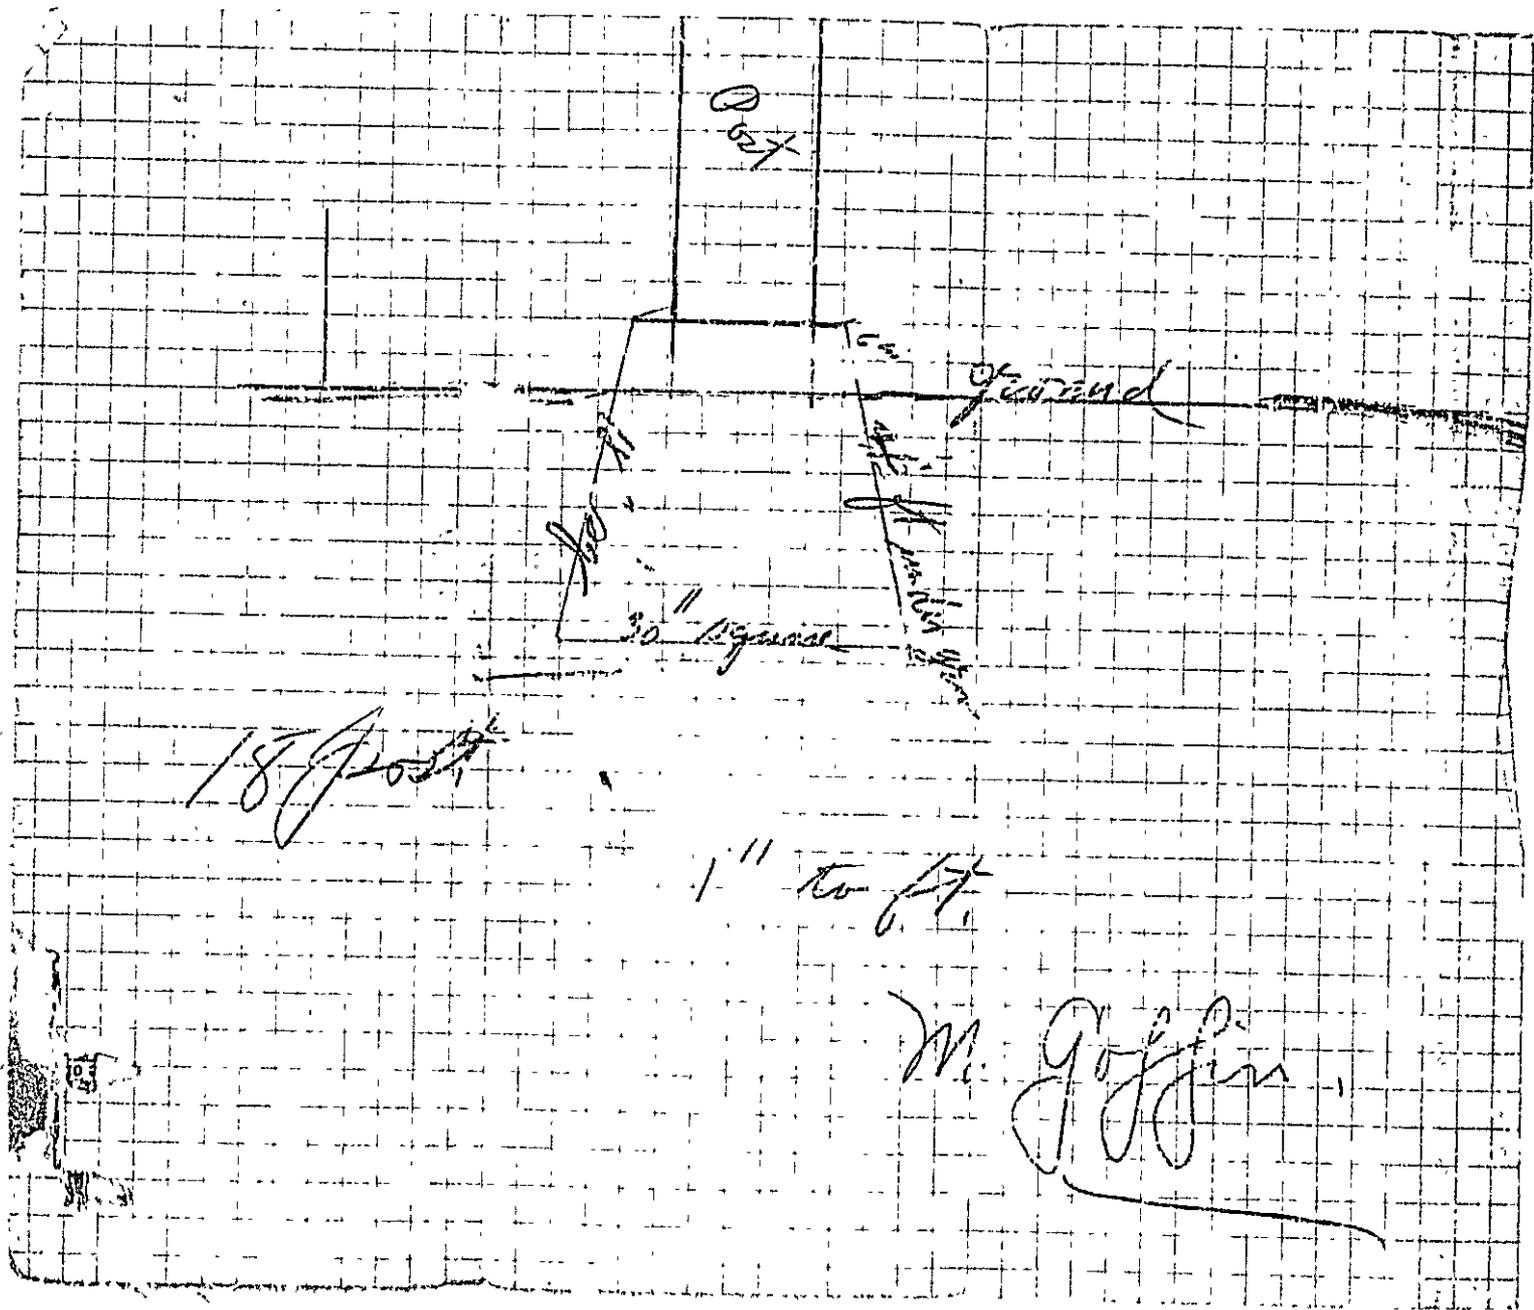

Very truly yours,

Inspector of Buildings.
