Mr. R. Paul Landry
Akers Associates, Inc.
386 Fore Street
Portland, Maine 04101

Dear Mr. Landry:

We can not determine in advance whether or not a lot is buildable without the necessary Soils Analysis Test Results which are usually available on Forms HHE-200 giving the results of the soils tests. This soils test information must be provided the City Plumbing Inspector before an opinion can be given concerning whether or not the lot is buildable.

Lots 37-E-10 and 87-E-11 are not considered to be lots of record when they are owned by an abutter. Section 14-433 of the City Zoning Ordinance states that a Lot of Record in the R-2 Island Residence Zone shall have a minimum of 6,500 square feet unless it is served by a public sewer, in which case it shall have a minimum area of five thousand (5,000) square feet. However, the final determination as to whether or not the lot is buildable rests with the City Plumbing Inspector, Mr. Arnold A. Goodwin. He would need to review the soils test results and the proposed location of the septic field before a building permit can be issued.

Sincerely,

Warren J. Turner
Zoning Enforcement Inspector
