### APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, February 20, 1947

Supersedes application Dec. 16, 1946

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location ... Central Ave., Peaks Island Use of Building Dwelling ... No. Stories 2 ...  Building Existing "

Name and address of owner of appliance Harry S. McLean, Central Avenue, Peaks Island

Installer's name and address Johnson Automatic Heat, 15 Brackett St. ... Telephone 3-9662

#### General Description of Work

To install ~~gravity~~ gravity ~~air~~ air furnace in place of stove heat - one pipe furnace and oil burning equipment

#### IF HEATER, OR POWER BOILER

**INSPECTION NOT COMPLETED**  
Sent to Fire Dept. 2/20/47  
Rec'd from Fire Dept. 2/22/47

Location of appliance or source of heat basement ... Type of floor beneath appliance air

If wood, how protected? ... Kind of fuel oil

Minimum distance to wood or combustible material, from top of appliance or casing top of furnace register

From top of smoke pipe 15" ... From front of appliance Over 4' ... From sides or back of appliance Over 3'

Size of chimney flue 8x8 ... Other connections to same flue none stove

If gas fired, how vented? ... Rated maximum demand per hour

#### IF OIL BURNER

Name and type of burner H. C. Little ... Labelled by underwriters' laboratories? yes

Will operator be always in attendance? ... Does oil supply line feed from top or bottom of tank? bottom

Type of floor beneath burner dirt

Location of oil storage outside above ground ... Number and capacity of tanks 1-100 gal.

If two 275-gallon tanks, will three-way valve be provided? ...

Will all tanks be more than five feet from any flame? yes ... How many tanks fire proofed? ...

#### IF COOKING APPLIANCE

Location of appliance ... Kind of fuel ... Type of floor beneath appliance

If wood, how protected?

Minimum distance to wood or combustible material from top of appliance

From front of appliance ... From sides and back ... From top of smoke pipe

Size of chimney flue ... Other connections to same flue

Is hood to be provided? ... If so, how vented?

If gas fired, how vented? ... Rated maximum demand per hour

#### MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

~~2 1/2 inch pipe fastened to the house and to the side of the house for the tank~~

Amount of fee enclosed? 1.00 ... (\$1.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

APPROVED Oliver T. ...  
CHIEF OF FIRE DEPT.

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes

Johnson Automatic Heat  
P.O. 725

Subject: Installation of gravity warm air furnace  
(floor furnace) with oil burning equipment in  
the dwelling of Harry S. McLean on Central  
Avenue, Peaks Island

Gentlemen:

We have had to delay issuance of this permit because the Building Code requires that we shall have reasonable evidence of compliance with the Building Code requirements before a building permit for any operation is issued. This applies as a number of questions.

The law requires that such oil burning equipment shall be installed to comply with the Underwriters regulations with some few exceptions, these regulations being contained in Pamphlet No. 31, Standards of the National Board of Fire Underwriters for the installation of oil burning equipment, and also that the permit for such an installation shall be issued only to the actual installer. We have no way of knowing whether or not Mr. McLean is thorough, experienced in such work, and property owners are not, as the installation of such equipment with its automatic and safety controls is quite technical, and a failure to get the right would not only be a violation of the law, but even more important, would threaten the safety of the occupants of the building and the building itself. Most home owners do not have experience enough to do a job like this, and while we have no way of knowing how much experience Mr. McLean has, it is true that most home owners are unwilling to experiment in their own homes.

The application says that the fuel oil tanks are to be 2 of 50 gallons capacity each—probably drums, but there is no information as to the gauge of the metal of these drums or tanks. The thickness of the metal is required to be no less than No 16 gauge, which is about 1/16 of an inch. If the owner really intends to be the actual installer, he should advise us as to the gauge of these tanks, and definitely whether he is familiar with all of the requirements as to vent pipe, fill pipe, hand operated and automatic valves, etc., etc.

The application says that these two tanks are to be supported upon the dirt floor of the cellar and that the oil supply line is to lead from the bottom of the tank, in which case the pump in connection with the burner would have to be strong enough to lift the oil up to the burner assembly. Of course the tanks must have incombustible supports and should have sufficient spread of footings under the supports to avoid settlement of the tanks.

I am told that the weight of the furnace is 275 pounds and this must be taken into account as regards strength of the floor framing and the method of heading off any floor joists or girders necessary. Especially if this furnace should come close to the middle of the spans of one or more floor joists, it might overload the floor construction unless some strengthening is provided.

If the owner intends to take full responsibility for this installation, will he be kind enough to give us the above added information on the application for the permit, so that we may have the assurance that he understands the situation and will proceed accordingly?

Mr. Harry S. McLean  
Johnson Automatic Heat ——— 2

January 2, 1947

This burner assembly is entitled to carry the label of the Underwriters Laboratories, and the application states that the label in on the burner. The Underwriters approval carries with it the injunction: "Proper precautions must be taken to prevent covering the register with combustible material and to avoid injury to persons when burner is operated at full capacity."

Very truly yours,

Inspector of Buildings

WHC/D

APARTMENT HOUSE WORK  
APPLICATION FOR PERMIT

Class of Building or Type of Structure Third

Portland, Maine, December 12, 1915

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to ~~alter~~ alter the following building ~~erected~~ erected in accordance with the Laws of the State of Maine, the Building Code and Zoning Ordinance of the City of Portland, plans and specifications, if any, submitted herewith and the following specifications:
