Helen B. Prescott,  
Mechanic St., Peale Island  
Mr. Joseph Kedlon,  
50 Purchase St. (Sagamore Village)

Subject: Approved Amendment to Building  
Permit to Cover Alterations in Cottage  
owned by Helen B. Prescott on Mechanic St.,  
Peale Island (Accessors' Lot No. 87-U-9)

Dear Madam and Sir:

Above approved amendment is herewith, issued subject to the following:

1. Your attention is called to my letter of May 29 of which each of you received a copy, and which contained certain cautions as to required framing of the addition. You are required to give another notice of readiness for inspection and to have left at the job the "closure certificate" (green tag) before any of the work on this addition covered under the amendment is covered from view.

2. This permit and this amendment have been issued on the basis that the building is not to be used for a year-round dwelling, until the frame and supports of the original main building have been strengthened more consistent with Building Code requirements for strength. The last word so had from the owner is that she did not intend this for a year-round dwelling. Should she change her mind, it is best to have a competent builder work out what needs to be done to strengthen the original building in permanent fashion, and then advise this office so that the work may be checked upon before it is started.

Very truly yours,

(Signed) 

Inspector of Buildings

Mr. Joseph Redlon,  
295 Park A vs.

Subject: Building Permit to Cover Enclosing Portion  
of Piazza and Other Alterations of Cottage of Helen B.  
Provost on Mechanic St., Peaks Island.

Dear Madam and Sir:

Above permit is herewith, subject to the following:

1. Assume that Mr. Redlon is aware of the requirements of the Building Code for framing this work, for instance that the studs in outside walls must be no less than 2x4, set vertically, no more than 16 inches from center to center, if this is ever to be a year-round dwelling, and no more than 24 inches from center to center if the building is to remain a summer cottage; that a doubled 2x4 plate is required at the tops of the studs all around, that doubled 2x4 headers are to be used over all ordinary window and door opening, larger headers over such openings wider than ordinary, and in either case a short 2x4 (jack) stud under each end of each header. The corner post to be no less than 4x6, solid.
2. The 4x6 sills are to be set with the 6-inch dimension upright. A corner post is required under each end of the 4x6 under the new front wall of enclosure, and another under the center of the 4x6 sill under the side exterior wall of enclosure. All cedar posts to extend at least four feet below the surface of the ground unless solid ledge is encountered at a less depth.

Very truly yours,

  
Inspector of Buildings.
