NOTES

Nov 1/78

There is a question on the filled land. Footings have been placed 1 ft in depth approx 2 1/2 in width. The contractor has reinforced the footings on the side of house. I will check with Mr. Brown & Mr. Smith regarding this.

Permit No. 78/0898
 Location 890 LA-14 St. S.W.
 Owner Paula J. Smith
 Date of permit 10-16-78
 Approved 10-17-78

Nov 3/78^{8:30} Mr. Rosa called & said he would saturate the foundation all around with 2" reinforced metal rods. I expressed my concern for the stability of the foundation even with all the additional reinforcing; I felt it would be better to go back to the original soil & place a large reinforced footing. The spring & summer of fall have been exceptionally dry so that when this soil becomes saturated with a wet condition an unfavorable action may take place & the back of the dwelling may settle. This area has a high water table area & this year has been unusually dry. 1:30 I've talked this over with Mr. Brown & Mr. Smith of the property & they said they would inspect the decision. I suggested that the contractor go down to original soil & start again at that point with the footing.

NOTICE RELATING TO SEWAGE DISPOSAL

x means copy sent to the parties Peaks Island Date April 16, 1974
Location 91-N3 Crystal Rd. Description cottage
Owner and Address Everett P. Skillings -14 Harlow St. Scarborough
Contractor and Address owner
Actual Area of Lot 35,725 Sq. Ft. Zone R#3
Area required by Zoning Ord. if sewer were available 6,500 sq. ft.

Where septic tank systems are required for sewage disposal, the Zoning Ordinance provides that the least allowable area of the lot shall be determined by the rate of percolation of the soil, this being the capacity of the soil to allow liquids to pass through as determined by tests. The Building Code directs that, where a septic tank is to be used, a building permit shall not be issued unless the proposed method of sewage disposal has been approved by the Director of Health.

Since application for the above permit indicates that connection to a sewer is not possible, it is necessary for the owner or his agent to file a site plan with the Health Department, to explain the method of sewage disposal proposed, and to make arrangements for a percolation test to be made under supervision of that department.

After the rate of percolation has been determined, the Director of Health will notify this department of the area of lot required on the basis of the results of the test. If the lot area required by the tests is equal to or less than the actual area of the lot and not less than the minimum lot area required in the zone in which the property is located for cases where connection to a sewer is available, the building permit can be issued; otherwise the permit cannot be issued unless authorization is secured from the Board of Appeals.

Director of Building & Inspections

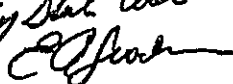

2 copies to Health Director

(This space for Health Department use)

Inspector of Buildings

Rate of Percolation is 5 minutes. On this basis area required by Zoning Ordinance is 9100 sq. feet.

Comments in event zoning appeal is filed: Sumner Carthy, Only
