Dear Mr. Cope:

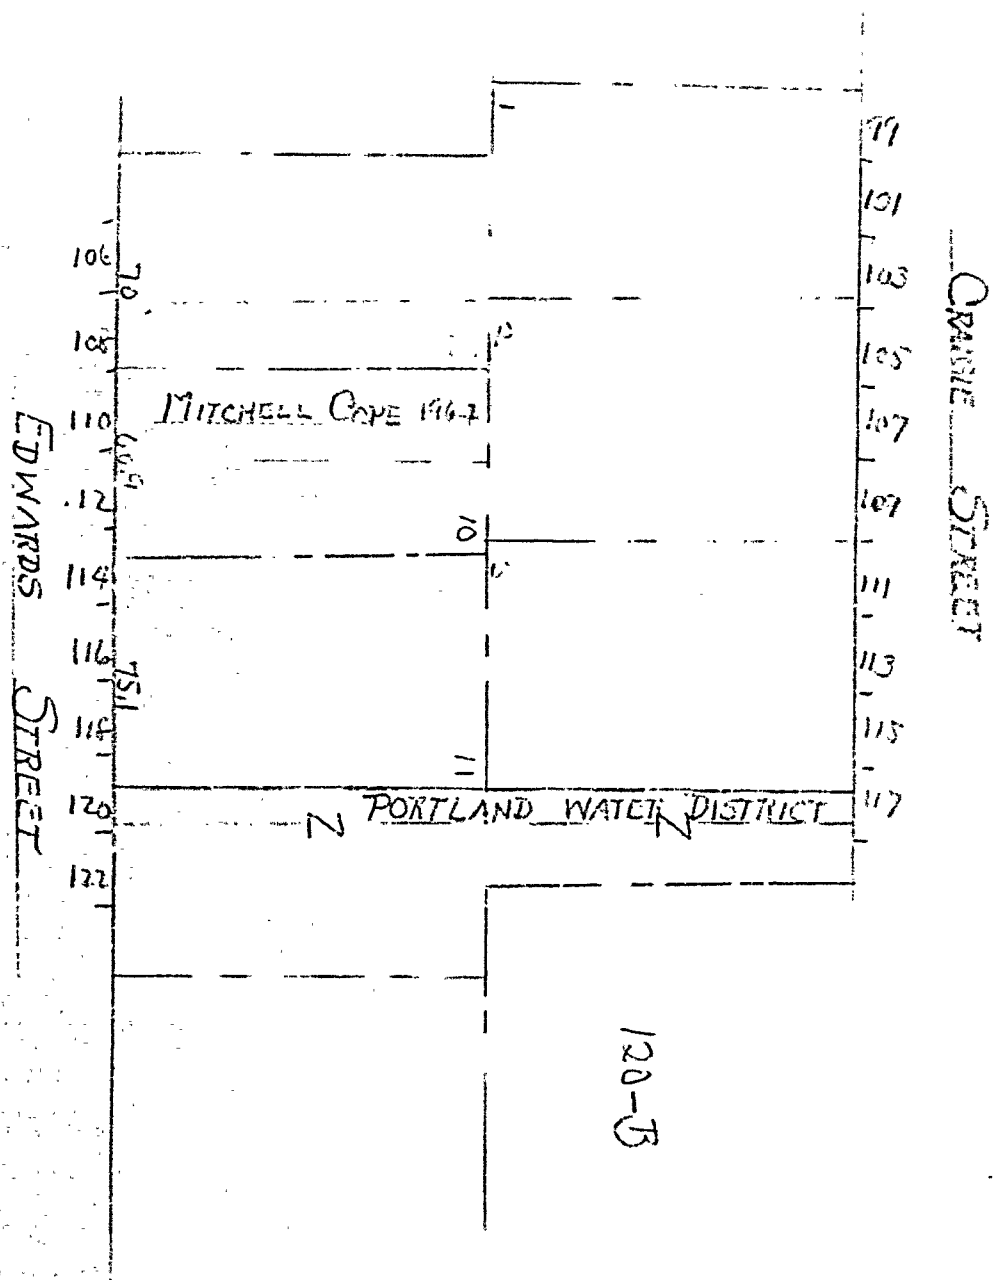

Permit to construct 1½ story frame dwelling 48' x 24' with garage in basement is being issued subject to plans received with application and in compliance with Zoning Ordinance and Building Code restrictions as follows:

1. Anchor bolts need to be 6' on centers instead of the 8' on centers as shown on plans.
2. In the two-story part of dwelling the corner posts are to extend in one piece with 18" lap splices allowed from either the solid sill or from the first floor shoe (sole plate, where a box sill is allowed to the double plate which supports the roof rafters at the eave level. The second floor studs in the exterior walls are to extend down to the double 2x4 inch plate upon which the second floor joists rests with the second floor joist being spiked to these studs. In a garrison type overhang the studs and corner posts may rest upon the 2x4 inch shoe of the second floor.
3. Ceiling of garage must be one hour fire resistance.

Very truly yours,

A. Allan Soule
Field Inspector

Gentlemen:

In connection with the checking of an application for a permit to construct a dwelling on the lot at the above named location, a question has arisen concerning the possibility that a "paper" street which appeared on an old development plan of the property may be located within the bounds of the lot in question and may never have been legally vacated. Before we can issue a permit for construction at this location, we shall need to have authoritative information that the lot in question is legally free and clear of any such encumbrance.

Very truly yours,

Albert J. Sears
