Mr. Sterling Grant 5 Ivie Place Falmouth, Maine

Dear Mr. Grank:

Building permit for construction of a two story single femily duelling at the above named location is issued herewith based on plans filed with application for permit, but subject to the following conditions:

- 1. Permit is issued on the basis that a yard at least 12 feet deep between the rear wall of building and the rear lot line is to be maintained.
- 2. The Lx10 girder will not figure out on the spans indicated. Either a full size 6x10 hemlock or a dressed 6x10 Douglas fir girder is required on the 8 foot spans specified.
- 3. Sill of garage is to be a solid 400 boltud to wall at intervals of not over 6 feet instead of 200 indicated.
- 4. The 4m6 rear corner posts are to extend in one longth from sill no plate supporting rafters or lapped splices not less than 16 inches long are to be used.
- 5. Stude in second story walls and hearing partition are to extend down to double 2x4 girts and not supported on a shoe on top of second floor vimbers.

Very truly yours,

Wr. Sterling Grant 5 Ivie Place Falmouth, Haine

cc to: Corporation Counsel

Dear Mr. Crant:

Building permit for construction of a two-family dwelling 25 feet by 29% feet with attached garage 12% feet by 21 feet at the above named location is not issuable under the Zoning Ordinance because the rear wall of the dwelling is to be only 10 feet from the rear lot line instead of the minimum of 12 feet required by Section 6-b-2 of the Ordinance for a two-story building in the R-5 nesidence Zone where the property is located, as controlled by Section 19-G covering a situation where a dwelling is to be located on a corner lot with its front yard facing the long side o. the lot.

We unders and that you would like to exercise your as peal rights concerning this discrepancy. Accordingly, we are certifyeing the case to the Corporation Counsel, to whose office in LOOM 208, City Hall, you should go to file the appeal.

Very truly yours,
