AP 123 Ashmont Street

August 7, 1952

Mr. Frank Jollotta
123 Ashmont Street
Portland, Maine

Dear Mr. Jolotta:

Building permit for replacement of cedar post foundation of the dwelling at 123 Ashmont Street with a concrete foundation wall and brick underpinning is issued herewith subject to the following conditions:

1. All parts of the sills, studding and floor framing which are rotted are to be replaced.
2. A new 6x6 girder with a post at the center of the span is to be provided beneath the floor timbers of the front room. Extra floor timbers are to be provided where the existing ones are now excessive distances apart.
3. Existing 6x6 and 4x6 sills are to be securely fastened together and where there are not sills of at least 4x6, new sills of that size are to be provided.
4. The 6x4 girder on an 8' span supporting the 2x5 floor joists of one section of the building will not figure out. If feasible, this girder is to be turned up so that its vertical dimension will be 6 in., otherwise it is to be reinforced so as to provide the required carrying capacity.
5. New 6x6 sills supported on concrete piers at least 8 in. square at the top and 10 in. square at the bottom extending at least 4 feet below grade are to be provided for the shed on the rear of the building. Floor joists of 2x6 spaced 16 in. on centers on an 8 foot span are to be provided for the shed. Studs in walls are to be replaced where rotted.
6. The chimneys are to be provided with cast iron cleanout doors and repaired where necessary.
7. Any other work necessary to strengthen the floor framing and walls of existing building is to be done so as to provide structurally safe conditions.
8. It is understood that pipe columns are to be used in the locations shown on the plan submitted for support of the girders. These are to have an outside diameter of at least 4 inches unless genuine Lally or Deane columns are used, in which case 3 1/2 in. diameter columns may be used.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/B

AP 123 Ashmont Street

July 25, 1952

Mr. Frank Jolotta
123 Ashmont Street
Portland, Maine

Dear Mr. Jolotta:-

We are unable to issue a permit for replacing the cedar post foundation under your dwelling at 123 Ashmont Street with a concrete wall 10" thick at the top and 12" thick at the bottom and to provide a cellar throughout until you have furnished information as to how you are to properly support the floor of the building. The existing floor framing is apparently rather sketchy and much too light in some instances, so that reinforcement by way of girders may be necessary.

It is necessary that you furnish a framing plan of the entire floor, showing size, span and spacing of all floor joists, and indicate how you propose to reinforce it to bring the strength up to that required for dwelling house use. We note that, according to the application, you plan to provide concrete piers 10" square at the top and 12" square at the bottom to support a girder. While there is no objection to the use of such piers, if they are to be within the cellar space, it is customary to use some sort of girder supports that will take up less room. For instance, the use of 4" outside diameter pipe columns, supported on concrete footings with plates top and bottom and securely fastened to the girder, are acceptable. The plan should indicate the size, location, and material of girder supports.

It is likely that much of the sill construction of the building is rotten, as well as possibly the bottom of the wall studding. What are your plans as regards replacement of any such defective material? Do you plan to provide a concrete floor for the cellar?

Very truly yours,

Warren McDonald
Inspector of Buildings

CITY OF PORTLAND, MAINE
DEPARTMENT OF BUILDING INSPECTION

Mrs. Sara C Wright
947 Broadway
South Portland Maine

June 12, 1961

Dear Madam:

With relation to permit applied for to demolish a building or portion of building at 129 Ashmont St. it is unlawful to commence demolition work until a permit has been issued from this department.

Section 6 of the ordinance for rodent and vermin control provides: "It shall be unlawful to demolish any building or structure unless provision is made for rodent and vermin eradication. No permit for the demolition of a building or structure shall be issued by the Building Inspector until and unless provisions for rodent and vermin eradication have been carried out under supervision of a pest control operator registered with the Health Department.

The building permit for demolition cannot be issued until the provisions of this section have been satisfied. It is the obligation of owner or demolition contractor or both to take up with the Health Department the matter of complying with this section, being prepared to inform that department what registered pest control operator is to be employed.

Very truly yours,

Albert J. Sears
