File: P. 34/84-1
H-2-24-30

February 15, 1938

James A. Taylor & Son, Inc.
37 Exchange Street
Portland, Maine

Gentlemen:

In the warm air furnace which you have installed for A. J. Thomas at 15 Arlington Street, we are unable to find any evidence of a high limit control inside the bonnet of the furnace calculated to shut down the burner in case abnormally high and dangerous temperatures are produced in the top of the furnace. This control is required by the Building Code.

Please arrange to have one of the type approved by the Underwriters' Laboratories, Inc. installed at least by February 25, 1938.

I believe your Mr. Sarah undertook to explain to Mr. Hamilton of this office that this feature of safety was taken care of by the combination constant level valve and fire protection shut off located outside of the furnace at about the floor level. Inquiry from the Underwriters' Laboratories, Inc. develops that this combination device is arranged to prevent an abnormal discharge of oil into the firing chamber and that the fusible element in this device is intended to act to shut down the oil burner in case a fire takes place outside of the furnace in the room or cellar where the heater is located.

Very truly yours,

RMd/H

Inspector of Buildings

Portland, Maine, March 3, 1936

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to ~~erect~~ alter ~~install~~ the following building structure equipment in accordance with the Laws of the State of Maine, the Building Code of the City of Portland, plans and specifications, if any, submitted herewith and the following specifications:

Location 17 Arlington Street Ward 8 Within Fire Limits? no Dist. No. _____
 Owner's or Lessee's name and address Gertrude Thomas, 17 Arlington St. Telephone _____
 Contractor's name and address A. Olson, 11 St. Lawrence St. Telephone no
 Architect's name and address _____
 Proposed use of building dwelling house with one car garage attached No. families 2
 Other buildings on same lot 1 car garage
 Plans filed as part of this application? yes No. of sheets 3
 Estimated cost \$ 500. Fee \$.75

Description of Present Building to be Altered

Material wood No. stories 2 Heat hot air Style of roof pitch Roofing Asphalt
 Last use dwelling house No. families 2

General Description of New Work

To raise roof on southeast side of ell 24' long, 4'6" to square out existing rooms, 2d floor.
 To build one new outside brick chimney, with fireplace on first floor, southeast side of main house - the brickwork of the chimney is to be corbelled so as to pass through the outside wall of the building at the point where the smokepipe enters so as to obviate the need of carrying the smokepipe through the outside wall.
 To remove 12' partition, putting in 4x8 spruce for support, to provide space 12' x 20' for one car in one story frame addition on rear of building - the inside of the garage will be covered, where required by law, with sheets of combined asbestos and cement not less than 1/8" in thickness with all joints filled with cement mortar.
 To ~~enlarge~~ existing single door to double garage door

It is understood that this permit does not include installation of heating apparatus which is to be taken out separately by and in the name of the heating contractor.

NOTES

- 3/11/36 - Work started
- 3/16/36 - Went over for p^{er} construction with master A.J.S.
- 3/18/36 - Fire place chimney up. Work started on raising roof.
- 3/24/36 - Gave green tag to close by new downer with notation that we were going to be covered until inspection and approval.
- Went over garage requirements.
- Mr. Thomas

4/29/36 - Garage in use. One thickness of 3/8" asbestos lumber has been used for protection and this covers only part of all between house and garage. Told Corrie Thomas that entire wall must be covered with two thicknesses of protective material floor into house not yet covered with metal. Roof not properly supported. Spoke to Mr. Thomas about these other matters.

A.J.S.
6/17/36 - Apparently nothing done as yet in matters. A.J.
