AP 110 Coyle Street-I

January 8, 1952

Mr. William Hinton  
150 Frances Street  
Mr. Ralph Allen  
110 Coyle Street

Gentlemen:

Building permit for repair after fire and minor alterations at 110 Coyle Street is issued to Mr. Hinton, herewith, but subject to the following. If these conditions are not understood or if you are unable to abide by them, it is important that you contact this office before commencing the work.

The application does not state what particular part of the building is to be repaired after the fire, but evidently the damage is not extensive in view of the low estimated cost. However if conditions in the areas of repair are found to be dangerously substandard according to Building Code requirements for strength, it is important that the contractor contact this office before starting with the repairs and tell us what he intends to do to make good the substandard conditions.

Contractor should bear in mind the requirement for notice of readiness of closing-in before any of the work, including the header over the new mullion window, is covered from view.

The contractor says that a 4x6 header is to be used over the new mullion window on a span of 6'. While a 4x6 on a 6-foot span is quite a stout timber, we have no data to check whether or not it will be strong enough to prevent undue sag. If the location of the new mullion window is such that the floor joists or roof rafters do not bear on the wall over the mullion window, it is likely that the 4x6 is heavy enough. If both the second floor joists and the rafters should bear on this wall, there is a question about it. If the latter is the case and you wish to be sure before going ahead, we will check the size of the header if you will furnish us a comprehensive sketch showing the span of the floor joists and of the rafters which may bear over this header.

Very truly yours,

Warren McDonald  
Inspector of Buildings

Harry V. Sawyer - 110 Cuyler Street

RECEIVED  
 SEP 29 1939  
 DEPT. OF BLDG. INSP.  
 CITY OF PORTLAND

Inquiry 110 Coyle St.

October 4, 1933

Mrs. Harry T. Sawyer,  
110 Coyle Street,  
Portland, Maine

Dear Madam

Provided the former garage which you propose to move from some location on Ashmont Street to your property in the rear of 110 Coyle Street and facing on Ashmont Street is in good structural condition, I see no reason under the Building Code or the Zoning Law why the building may not be moved as you have enquired.

Apparently the proposed location of the building will be a sufficient distance from Ashmont Street to satisfy Zoning Law requirements.

If you propose to go ahead with the work, both the demolition of the existing shed and the moving of the garage may be covered in a single permit, if both jobs are done at the same time. The application for the permit should have with it a location sketch showing the proposed location of the building on your property with relation to the street line of Ashmont Street (this is the inside edge of the sidewalk) and the greenhouses and other buildings on your property. Perhaps this information can be shown on the sketch which we have attached to your inquiry. We shall also need information as to the size of the garage to be moved, its height, type of roof, type of roof covering, whether or not there would be any heat in it, what kind of floor there is in it, what kind of foundations are to be used and if posts or piers are to be used for foundations, we should have a sketch showing the arrangement and location of them.

Our permit does not include the right to move any building through or across a public street, so arrangements for such a moving ought to be arranged by your contractor with the Commissioner of Public Works.

Very truly yours,

Inspector of Buildings

WMcD/H
