NOTES

September 6, 1927

S. L. Sharpe
55 Fessenden Street
Portland, Maine

Dear Sir:

Referring to your application for a building permit in the name of H. P. Hanson to build a two car private garage at No. 38 Clifton Street, the location plan submitted with your application is unintelligible and means nothing to us whatever.

It will be necessary for us to hold the permit in this office until a location plan is submitted which is clear enough to tell whether or not the garage will be located in compliance with the Ordinances.

In the meantime, it is unlawful for you to proceed with any of the work until the permit card is actually in your possession and posted upon the premises.

Yours truly,

Inspector of Buildings

BUILDING PERMIT REPORT

DATE: August 12, 1986

ADDRESS: 833 Clifton Street

REASON FOR PERMIT: 20' X 38'

BUILDING OWNER: David & Betty Small

CONTRACTOR: A. B. Richards & Company

PERMIT APPLICANT John Thompson

APPROVED: 5-6-7 ~~PERMITTED~~

CONDITION OF APPROVAL OR DENIAL:

- 1.) All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with self-closers.
- 2.) Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
- 3.) Each apartment shall be equipped with an approved single station smoke detector powered by the house current. The detector shall be located in an area which will provide protection for the sleeping areas.
- 4.) The boiler shall be protected by enclosing with one(1) hour fire rated construction including fire doors and ceiling, or by placing over the boiler, two(2) residential sprinkler heads supplied from the domestic water.
- * 5.) Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping rooms must have minimum net clear openings of 5.7 square feet (0.53m²). The minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm).

- * 6.) In addition to any automatic fire alarm system required by Sections 1716.3.2 and 1716.3.3, a minimum of one single station smoke detector shall be installed in each guest room, suite or sleeping area in buildings of Use Groups R-1 and I-1 and in dwelling units in the immediate vicinity of the bedrooms in buildings of Use Group R-2 or R-3. When actuated, the detector shall provide an alarm suitable to warn the occupants within the individual unit (see Section 1717.3.1).

In buildings of Use Groups R-1 and R-2 which have basements, an additional smoke detector shall be installed in the basement. In buildings of Use Group R-3, smoke detectors shall be required on every story of the dwelling unit, including basements.

In dwelling units with split levels, a smoke detector installed on the upper level shall suffice for the adjacent lower level provided the lower level is less than one full story below the upper level. If there is an intervening door between the adjacent levels, a smoke detector shall be installed on both levels.

All detectors shall be installed in an approved location. Where more than one detector is required to be installed within an individual dwelling unit, the detectors shall be wired in such a manner that the actuation of one alarm will actuate all the alarms in the individual unit.

- * 7.) 608.1 Attached garages: Private garages located beneath rooms in buildings of Use Groups R-1, R-2, R-3 or I-1 shall have walls, partitions, floors, and ceilings separating the garage space from the adjacent interior spaces constructed of not less than 1 hour fire-resistance rating. Attached private garages shall be completely separated from the adjacent interior spaces and the attic area by means of 1/2-inch gypsum board or equivalent applied to the garage side. The sills of all door openings between the garage and adjacent interior spaces shall be raised not less than 4 inches (102mm) above the garage floor. The door opening protectives shall be 1 3/4-inch solid core wood doors or approved equivalent.

608.1.1 Separation by breezeway: A garage separated by a breezeway not less than 10 feet (3048mm) in length from a building of Use Group R-3 may be of type 5B construction, but the junction of the garage and breezeway shall be firestopped to comply with the requirements of Section 1420.0.
