Maine

Subject: Installation of heaters and  
oil burning equipment in new dwell-  
ings at 59-05 Chenery Street and 59-06  
Chenery Street

Dear Sir:

You are reported to be the person responsible for the installa-  
tion of the heaters and oil burners in the new houses at the above loca-  
tions. A permit from this department is required for each of these in-  
stallations and should have been applied for and secured before the work  
was started. It is necessary that you file at once applications for  
related permits for these installations. In the future please see to  
it that such permits are in your possession and the permit cards posted  
on the premises as required by law before any work on the installation  
is started. We shall expect this matter to be taken care of before  
April 8, 1949.

Very truly yours,

Inspector of Buildings

October 5, 1948

Mr. Herbert G. Cail  
52 Maplewood Street  
Portland, Maine

Subject: Amendment to permit #48/1649 covering  
construction of rear porch and change in first  
floor framing of dwelling at 99 Cheney Street

Dear Sir:

The amendment for the above work is issued herewith subject  
to the following:

1. No less than a 4x6 instead of a 2x6 is required for the  
sill of rear porch.

2. The amendment is issued on the basis that the girders  
throughout the first floor framing are to be 6x10 dressed hemlock  
as indicated in original application instead of the built-up 4x8  
girders shown on plan, which will not figure out.

Very truly yours,

AJC/g

INSPECTION COPY

AP 99 Chenery Street-I

September 13, 1948

Mr. Herbert G. Call  
52 Maplewood Street  
Portland, Maine

Subject: Building permit for construction of one  
family dwelling and garage at 99 Chenery Street  
corner of Clifton Street

Dear Sir:

The permit for the above work is issued herewith, excluding the porch on the rear of the building since no framing of floor or roof is shown on the plans filed with application, and subject to the following:

1. The trench wall foundations of rear porch and garage are required to be no less than 8" thick at the top and 10" thick at the bottom instead of the 6" thickness shown on the plan.
2. The ceiling of the garage as well as the garage side of the wall between house and garage is required to be covered with plaster on perforated gypsum or metal lath. The door from garage to dwelling must be either a Class C labelled fire door or a standard fire-resist door constructed as specified in Section 303-c-4 of the Building Code. The door is to be made self-closing by some suitable device.
3. Since the second floor timbers run parallel to the walls which support the rafters of the dwelling, some suitable means is to be adopted to provide the tie across the building at the plate line which is usually provided by these timbers.
4. It is understood that the ceiling timbers of the garage are to run the 20' way of building, the same way as the rafters, and are to be hung up to the rafters at a point about midway of the span of rafters. Rafters and ceiling timbers are to be 2x8's spaced 16" on centers. No size for headers over the large garage door openings is indicated on the plans but no less than 4x8 will furnish the required strength to take care of the loads involved. The sill for the garage is required to be no less than 4x6 securely bolted to the concrete trench foundation walls.
5. Before any work is started on the rear porch, an amendment to this permit covering its erection should be applied for and issued. With the application should be furnished information as to the sills, floor framing and roof framing of the porch, as well as the manner in which the roof of main house is to be supported across this porch.

Very truly yours,

Inspector of Buildings

STATEMENT ACCOMPANYING APPLICATION FOR BUILDING PERMIT

for dwelling house Date Sept. 9, 1948  
at 99 Chelery St., corner of  
Clifton St.

1. In whose name is the title of the property now recorded? Beatrice V. Kalber
2. Are the boundaries of the property in the vicinity of the proposed work shown clearly on the ground, and how? stakes
3. Is the outline of the proposed work now staked out upon the ground? no  
If not, will you notify the Inspection Office when the work is staked out and before any of the work is commenced? \_\_\_\_\_
4. What is to be maximum projection or overhang of eaves or drip? \_\_\_\_\_
5. Do you assume full responsibility for the correctness of the location plan or statement of location filed with this application, and does it show the complete outline of the proposed work on the ground, including bay windows, porches and other projections? yes
6. Do you assume full responsibility for the correctness of all statements in the application concerning the sizes, design and use of the proposed building? yes
7. Do you understand that in case changes are proposed in the location of the work or in any of the details specified in the application that a revised plan and application must be submitted to this office before the changes are made? yes

Albert G. Bair

WARNING !!!

THIS BUILDING PERMIT IS ISSUED  
SUBJECT TO SPECIAL CONDITION:

THAT NO CONCRETE SHALL BE POURED IN FOUNDATION FORMS AND NO  
LAYING OF UNIT MASONRY IN FOUNDATION WALLS SHALL BE STARTED UNTIL  
NOTICE HAS BEEN GIVEN AT THE DEPARTMENT OF BUILDING INSPECTION OF  
READINESS TO START ACTUAL MASONRY WORK, AND UNTIL RE-CHECK OF  
LOCATION HAS BEEN MADE BY INSPECTOR.

\* \* \*

Original markings of corners of lot and especially stakes on  
street line set by Dept. of Public Works must be kept intact and  
easily accessible for re-check--not covered by excavated earth  
or building materials. Otherwise the "go-ahead" cannot be given.  
Dept. of Public Works cannot re-set their stakes.

\* \* \*

Obviously the notice for re-check must be given at such a time  
as to allow reasonable opportunity to make re-check.

Warren McDonald  
Inspector of Buildings

Memorandum from Department of Building Inspection, Portland, Maine

93-97 Clenery Street—Installation of heating system for Beatrice V.  
Kelber by C. B. Hrnnaford, Jr., installer—4/9/49

Inasmuch as the application indicates that the top of the plenum chamber of the furnace is to be only four inches below combustible material above, with a shield provided, thus taking advantage of an allowance of the Building Code applicable in the case of plenum chambers of warm air furnaces where the movement of warm air through the ducts is actuated by mechanical means thermostatically controlled, please note that the shield is to be of rigid asbestos board at least 3/16" in thickness or equivalent, that the shield is to extend at least two inches beyond the edges of the plenum chamber all-around and is to be suspended about half way between the top of the plenum chamber and the combustible woodwork above on non-burnable hangers.
