S.

This garage is to adjoin  
the dwelling, that is the  
side of the house is the  
side of the garage and  
there is a door between  
nothing in the building  
car to cover it, but I think  
there should be plaster  
on metal lath, asbestos  
lumber or plaster board  
cemented tight at joints  
on the garage side of the  
partition between and that  
the door should be tight  
fitting with an approved  
check on it to keep it  
closed

Wm. J.  
11/14

They agree to test the gangways  
with ~~flint~~ sheet rock - line down

on garage side with metal and  
joint on door edge
