INSPECTION COPY

November 5, 1957 .P = 23 Ambierst Street cc to: Mr. A. E. Strout 23 Amherst Street Mr. Karl Furst 19 Invermesa Street Building permit for construction of a one story addition 16 feet by 25 feet on rear or dwelling at the above location is issued herewith based on plan filed with application for permit but subject to the following conditions: 1. Ceiling joists are to run the same way of addition as floor joists instead of bearing on partition between Family Room and Laundry as shown. 2. If addition is to have a plastered ceiling, the span of the 2x6 ceiling timbers indicated is so great as likely to cause excessive deflection and cracking of plaster. Thus, if plaster is to be used ceiling timbers will need to be no less than 2x8, but may be spaced that inches instead of the 16 inches on centers. Very truly yours, Albert J. Sears Deputy Inspector of Buildings ajs:M
