# APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

**PERMIT ISSUED**  
11-2-33  
SEP 4 1948  
CITY of PORTLAND

To the DIRECTOR OF BUILDINGS, PORTLAND, MAINE  
Portland, Maine, September 3, 1948

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 37-41 Clinton St Use of Building Dwelling house No. Stories      New Building XXXXXX  
Name and address of owner of appliance Ralph Jackson, 73 Hill Street  
Installer's name and address Metevier Bros., 75 High St., Westbrook Telephone 1595

### General Description of Work

To install oil burning equipment in connection with forced hot water heating system

### IF HEATER, OR POWER BOILER

Location of appliance or source of heat      Type of floor beneath appliance       
If wood, how protected?      Kind of fuel       
Minimum distance to wood or combustible material, from top of appliance or casing top of furnace       
From top of smoke pipe      From front of appliance      From sides or back of appliance       
Size of chimney flue      Other connections to same flue       
If gas fired, how vented?      Rated maximum demand per hour     

### IF OIL BURNER

Name and type of burner American Standard Labelled by underwriter's laboratories? yes  
Will operator be always in attendance?      Does oil supply line feed from top or bottom of tank? bottom  
Type of floor beneath burner concrete  
Location of oil storage cellar Number and capacity of tanks 1-275 gal.  
If two 275-gallon tanks, will three-way valve be provided?       
Will all tanks be more than five feet from any flame? yes How many tanks fire proofed?       
Total capacity of any existing storage tanks for furnace burners none

### IF COOKING APPLIANCE

Location of appliance      Kind of fuel      Type of floor beneath appliance       
If wood, how protected?       
Minimum distance to wood or combustible material from top of appliance       
From front of appliance      From sides and back      From top of smokepipe       
Size of chimney flue      Other connections to same flue       
Is hood to be provided?      If so, how vented?       
If gas fired, how vented?      Rated maximum demand per hour     

### MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

APPROVED:

FR

AP 37-41 Clinton Street-I

November 8, 1947

Mr. Ralph C. Jackson  
71 Alba Street  
Portland, Maine

Subject: Application for permit for construction of 2 car wood frame garage 20' x 22' at 37-41 Clinton Street

Dear Sir:

Since you propose providing a cellar beneath this garage, a question of compliance with Zoning Law requirements is raised. While the use of a one story building for garage purposes is considered one use incident to a dwelling on the same lot, and is thus allowable under the Zoning Law, it is doubtful if such a building with a cellar could be so considered. However, before making any decision on the matter, we would appreciate more information from you concerning use of cellar, whether there will be any heat or stairway to cellar provided inside the building.

It is noted in application that the height from grade to top of plate is to be only 6'. This seems rather low and is called to your attention because if a greater height is desired we wish to caution that the average height (that is a point midway between plate and ridge) above the grade at the front of building is limited to twelve feet. It is also noted that application calls for a 2x4 sill. No less than a 4x6 all one piece in cross section is required or a built-up sill may be used if desired.

We have not been able to check the proposed location of the building on the ground since it has never been staked out. This must be done before we shall be able to issue a permit for the building.

Very truly yours,

Inspector of Buildings

*11/10/47 - Mr. Jackson says that whether or not cellar should be permitted depends upon whether it is a structure or not. Only entrance is to be from outside building. It is to be used as storage. Consult with dwelling unit. It is to be used as a garden with access to lot, etc. No heat in building.*

# RESIDENCE ZONE - C APPLICATION FOR PERMIT

# Certificate of Occupancy

Date of Issue September 4, 1948

Issued to Ralyn & Kathleen Jackson

This is to certify that the building, premises, or part thereof, indicated below, and built—  
~~under Building Permit No. 47/3001~~ at 37-41 Clinton Street  
under Building Permit No. 47/3001, has had final inspection, has been found to conform substan-  
tially to requirements of Zoning Ordinance and Building Code of the City, and is hereby approved  
for occupancy, limited or otherwise, as indicated below.

PORTION OF BUILDING OR PREMISES

Entire Building

APPROVED OCCUPANCY

One-family Dwelling House

Limiting Conditions:

This certificate supersedes  
certificate issued

Inspector of Buildings

Notice: This certificate identifies lawful use of building or premises, and ought to be transferred from  
owner to owner when property changes hands. Copy will be furnished to owner or lessee for one dollar.

AP 37-41 Clinton Street-I

November 4, 1947

Mr. Ralph C. Jackson  
71 Alba Street  
Portland, Maine

Subject: Permit for construction  
of new dwelling at 37-41 Clinton  
Street

Dear Sir:

Permit for the above work is issued herewith, subject to the following:

1. In the absence of a foundation plan we are unable to determine the exact spacing of columns beneath 6x8 girder. However, if the spacing is to be as much as 8' as given in the application, the 6x8 full size timber noted will not figure out on that span. Either more columns should be introduced, thus cutting down the span or a 6x10 full size hemlock timber with pipe columns no more than 8' on centers may be used if desired.

2. It is not clear what foundation under rear entry is to be. If a concrete wall is to be used and the space inside the wall is to be excavated, then a minimum of 10" at the grade and 12" at the bottom is required for the thickness of this wall. Otherwise a thickness of 8" and 10" is all right for a trench wall. If this addition is to be two stories high, a masonry pier or wall foundation is required anyway.

Very truly yours,

Inspector of Buildings
