March 31, 1937

Mr. S. P. Ginn,
97 Pitt Street,
Portland, Maine

Dear Sir:

In connection with the combined dwelling house and garage which you are building at 199 Clifton Street and 209 Clifton Street, your attention is called to the following information relating to the requirements for a fire door between the dwelling house and the garage:

The Building Code reads: "All doors leading from the garage to the dwelling house part of the building shall be approved fire doors, shall be made to fit the opening tightly; shall be equipped with an approved self-closing device, and the sill shall be raised at least six inches above the level of the garage floor."

There has been frequent disregard of the word "approved" in the above sentence and consequently we are finding fire doors installed in such locations, which are so inadequate to resist the spread of a fire that may occur in the garage part, that this office cannot approve them. Providing such inadequate doors leads to inconvenience and unnecessary expense on the part of owner or contractor or both. It is clearly the responsibility of contractor or owner to find out what type of door will be approved before the door is made. To be helpful in this connection the following minimum standard practice for such fire doors, frames, sills and self-closing devices is established, applying to jobs now underway and those contemplated hereafter:

The wooden core of the door shall be covered all over, including all edges, with galvanized metal no less than No. 26 gauge or with new tin, all joints to be locked joints, all nailing to be covered by the lead-over of the joints, and no solder to be used. This work is to be done in such a manner as to exclude air from the wood inside. The frame and sill shall be covered on both sides of the opening in a similar manner, the sheet metal to be lapped or flashed beneath the fire resistive covering on the garage side of the common partition. The self-closing device shall be a door check, a spring, weight or other device so installed and operative as to keep the door tightly closed at all times except when passage is desired through the doorway.

Where such fire doors are in locations which make appearance desirable, paneled doors, which are manufactured and covered to look as well as wooden doors, are on the market.

Please be governed accordingly.

Very truly yours,

HOD/H

Inspector of Buildings

Original Permit No. PERM 15000

Amendment No. _____

AMENDMENT TO APPLICATION FOR PERMIT

NOV 26 1936

Portland, Maine, November 25, 1936

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for an amendment to Permit No. 18/2041 pertaining to the building or structure comprised in the original application in accordance with the laws of the State of Maine, the Building Code of the City of Portland, plans and specifications, if any, submitted herewith, and the following specifications:

Location 200 CLIFTON STREET Ward 2 With the Fire Limits? no Dist. No. _____

Owner's or lessor's name and address E. F. Ginn, 97 Pitt St, 20201

Contractor's name and address _____

Plans filed as part of this Amendment Y46 No. of Sheets 1

Increased cost of work _____ Additional fee .25

Description of Proposed Work

To change size of building as per plan submitted with this amendment
to be 24' x 24' - one story building with dormer on rear side of roof
ceiling to be 24' collar to be 24' to have room over garage

Signature of Owner E. F. Ginn

Approved: _____

STATEMENT ACCOMPANYING APPLICATION FOR BUILDING PERMIT

for one family dwelling house with one car garage attached
at 209 Clifton Street. Date 11/19/36

1. In whose name in the title of the property now recorded? E. F. Ginn
2. Are the boundaries of the property in the vicinity of the proposed work shown clearly on the ground, and how? street lines
3. Is the outline of the proposed work now staked out upon the ground? yes - If not, will you notify the Inspection Office when the work is staked out and before any of the work is commenced?
4. What is to be maximum projection or overhang of eaves or drip? 8"
5. Do you assume full responsibility for the correctness of the location plan or statement of location filed with this application, and does it show the complete outline of the proposed work on the ground, including bay windows, porches, and other projections? yes
6. Do you assume full responsibility for the correctness of all statements in the application concerning the sizes, design and use of the proposed building? yes
7. Do you understand that in case changes are proposed in the location of the work or in any of the details specified in the application that a revised plan and application must be submitted to this office before the changes are made? yes
