Gentlemen:

Permit to construct a one-story open porch 12'x24' on rear of dwelling and to demolish existing concrete steps is being issued on the basis that Building Code requirements be met as follows:

1. The 8-inch uniform thickness concrete foundation wall will need to set on a poured concrete footing at least 8 inches in thickness and 10 inches in width or this wall will need to be battered from a width of 10 inches at the bottom to 8 inches at the top. *Change to 10" uniform wall*
2. Sill at the top of the foundation wall will need to be a solid 4x4 inch member rather than the 2x4 sill shown. *Will do*
3. Before the form inspection is called for information: will need to be furnished as to how the 10 inch roof overhang is to be supported from the wall framing. *OK shown on plan*

Very truly yours,

Gerald E. Mayberry  
Deputy Director of  
Building Inspection

cc to: Corporation Counsel

Gentlemen:

Building permit for construction of a screened porch 12 feet by 24 feet on rear of dwelling at the above named location is not issuable under the Zoning Ordinance because there will be only about 16 feet between the rear of the porch and the rear lot line instead of the 25 feet required by Section 4-R-1 of the Ordinance applying to the R-3 Residence Zone in which the property is located.

While this discrepancy is subject to appeal, we cannot tell in advance what action the Appeal Board might take on such an appeal. If the owner desires to exercise his appeal rights, he should go to the office of the Corporation Counsel in Room 208, City Hall, where appeals are filed and where a copy of this letter is being sent.

Very truly yours,

Albert J. Sears  
Building Inspection Director

ALBERT J. SEARS  
INSPECTOR OF BUILDINGS

CITY OF PORTLAND, MAINE  
IN THE BOARD OF APPEALS

July 13, 1964

TO WHOM IT MAY CONCERN:

The Board of Appeals will hold a public hearing in the Council Chamber, City Hall, Portland, Maine, on Thursday, July 16, 1964, at 4:00 p.m. to hear the appeal of Richard J. Levy requesting an exception to the Zoning Ordinance to permit construction of a screened porch 24 feet by 24 feet on rear of dwelling at 20-24 Austin Street.

This permit is presently not issuable under the Zoning Ordinance because there will be only about 16 feet between the rear of the porch and the rear lot line instead of the 25 feet required by Section 4-B-1 of the Ordinance applying to the R-3 Residence Zone in which the property is located.

All persons interested either for or against this appeal will be heard at the above time and place.

BOARD OF APPEALS

Franklin G. Hinckley  
Chairman

cc: Mrs. Helen C. Greenlaw, Perham Road, Farmington, Maine

ALBERT J. SEARS  
INSPECTOR OF BUILDINGS

CITY OF PORTLAND, MAINE  
IN THE BOARD OF APPEALS

MISCELLANEOUS APPEAL

Richard J. Levy, owner of property at 20-24 Austin Street  
under the provisions of Section 24 of the Zoning Ordinance of the City of Portland, hereby  
respectfully petitions the Board of Appeals to permit: construction of a screened porch  
12 feet by 24 feet on rear of dwelling. This permit is presently not issuable under the  
Zoning Ordinance because there will be only about 16 feet between the rear of the porch  
and the rear lot line instead of the 25 feet required by Section 4-B-1 of the Ordinance  
applying to the R-3 Residence Zone in which the property is located.

LEGAL BASIS OF APPEAL: Such permit may be granted only if the Board of Appeals finds that  
enforcement of the terms of the Ordinance would result in undue hardship and desirable relief  
may be granted without substantially departing from the intent and purpose of the Ordinance.

Richard J. Levy  
APPELLANT

DECISION

After public hearing held July 16, 1964 the Board of Appeals finds that enforcement  
of the terms of the Ordinance would result in undue hardship and desirable relief  
may be granted without substantially departing from the intent and purpose of the  
Ordinance.

It is, therefore, determined that such permit may be issued.

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

PERMIT ISSUED 01092 AUG 30 1961

Portland, Maine, August 30, 1961

CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 20-24 Austin St. Use of Building Dwelling No. Stories 2 New Building Existing
Name and address of owner of appliance Richard J. L. W. 38 Highland St.
Installer's name and address Knight Bros. Co. Main St. Westbrook Me. Telephone UL-4-2233

General Description of Work

To install Forced hot water heating system and oil burning equipment.

IF HEATER, OR POWER BOILER

Location of appliance Basement Any burnable material in floor surface or beneath? none
If so, how protected? Kind of fuel? oil
Minimum distance to burnable material, from top of appliance or casing top of furnace 3'
From top of smoke pipe 2' From front of appliance over 4' From sides or back of appliance over 3'
Size of chimney flue 8x10 Other connections to same flue none
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? yes

IF OIL BURNER

Name and type of burner Weil-McLain-guntype Labeled by underwriters' laboratories? yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bottom
Type of floor beneath burner concrete Size of vent pipe 1 1/2"
Location of oil storage basement Number and capacity of tanks 275 gal.
Low water shut off Make No.
Will all tanks be more than five feet from any flame? yes How many tanks enclosed?
Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

APPROVED: 8/30/61 O.K. Allen

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes

Mr. Lindsay Lord  
Amerscoggin Road  
Falmouth Foreside

cc to: Richard J. Levy, 38 Highland Street  
cc to: (Earl M. Christensen, 357 Summit Street)  
C. E. Stanning & Son, 349 Standford St.

Gentlemen:

We are unable to issue a permit to construct the 2-story frame dwelling and 2-car attached garage until the following is in compliance with the Building Code.

1. Depth of chimney and Lally Column footings should be a minimum of 12 inches.
2. The unreinforced 8-inch concrete block walls with 16-inch pilasters do not appear to be adequate to withstand the design loads for these structures. It is recommended that additional reinforced pilasters be added or that some type of reinforcing or bond beams be used to tie the structures from the building to the pilasters.
3. Type, material, and spacing of ties to anchor this wall to the building will need to be shown.
4. No header member has been shown to support the loads above the 4-foot opening between the kitchen and family room.
5. The double 2x8-inch floor joists under the stairwell partitions are not adequate to support the partition, floor, and roof loads above on a 7½-foot span.
6. It will be necessary to have the 4x12-inch beam as support for the roof framing above the closet door in bedroom No. 1. Perhaps this was the intention. However, the note does not definitely indicate the 4x12-inch header is to extend full length above the closet partition.
7. The water table at the second floor window sill level is not to extend through the wall studding.
8. The estimated cost given on application appears to be rather low for the type and size of dwelling involved. It is necessary either that itemized cost figures be furnished substantiating that given or that you submit a revised estimated cost and pay the additional fee involved.
9. If walls of fireplace chimney are to be constructed of stone throughout, a minimum thickness of 12 inches is required. If stone is to be only a veneer, walls will need to have the usual thickness required for a brick chimney with stone tied to brick backing with wire ties. Which do you plan to have and, if veneer is to be used, what will size and spacing of ties be?

Very truly yours,

Gerald S. Mayberry  
Deputy Director of Building Inspection

Gentlemen:

Permit to construct a two-story frame dwelling with two-car attached garage 46 feet by 42 feet is being issued in accordance with plans received on March 13, 1961 and subject to the discussion with Mr. Lord as follows:

1. The pilasters at the end of the 18 foot wall are inadequately designed to prevent overturning and it is agreed that an additional pilaster will be placed behind this wall at the midpoint. These pilasters are to be built so as to have a masonry bond to the wall as well as running the Duowall reinforcing continuous through the pilasters. The two 1/2 inch round reinforcing rods should be placed as near the front and back of the pilaster as possible to provide the maximum tensile strength rather than to be placed side by side at the center of the wall as shown. The voids of the pilaster are to be filled preferably with a portland cement and fine aggregate grout rather than a lime cement mortar.

2. Although the Building Code has no requirements to forbid the use of awning type windows in a dwelling, such windows afford little or no chance of escape in case of a fire or other emergency. There have been too many cases throughout the country where deaths have been caused by inability to escape through windows of a similar type. It has been suggested that particularly in the case of each bedroom at least one window of the double-hung or casement type be provided which can be used for egress in case of an emergency.
