A.F.- 40 Fya Road

May 6, 1966

Mr. Robert Moulton
122 Label Street

cc to: John Marshall
40 Fya Road

Dear Mr. Moulton:

Permit to demolish the existing side piazza and to construct a 12'x22' one-story frame addition as per your application, plans, and recent zoning appeal is being issued subject to the following:

1. Sonotube foundation for entrance platform will need to be not less than 9 inches in diameter rather than 7 inches as shown.
2. As the 2x6 inch rafters spaced at 16 inches o.c.'s are not adequate to support Building Code design roof loads on a pitch of 3 inches rise to 12 inches run, 2x8 inch rafters spaced at 16 inches o. c.'s will be required.

Very truly yours,

Gerald L. Mayberry
Building Inspection Director

April 18, 1966

John Marshall
40 Pys Road

cc to: Robert Loulton, 122 Label Street
cc to: Corporation Counsel

Dear Mr. Marshall:

Building permit for construction of a one-story frame addition 22'x12' in place of existing side piazza 10'x12' on the right hand side of dwelling at the above named location is not issuable under the zoning Ordinance for the following reason:

The side yard distance of only 5 feet is to be provided instead of the minimum of 6 feet required by Section 4-B-2 of the Ordinance applying to the R-3 Residence Zone in which the property is located.

I understand you would like to exercise your appeal rights in this matter. Accordingly you or your authorized representative should come to this office to file the appeal on forms which are available here.

Very truly yours,

Gerald E. Mayberry
Building Inspection Director

Lot 8 Fya Road
" 14 " "
" 15 " "
" 16 " "
6/18/52 ESS

June 4, 1952

The Kinal Corporation
220 Cumberland Avenue
Portland, Maine

Gentlemen:

We are unable to issue amendments, belatedly applied for, to cover construction of 10'x12' open piazzas on certain dwellings under construction on Fya Road because the construction does not comply with Building Code requirements in all respects. Deficiencies in construction are as follows:

1. Lots # 8, 14, and 15 Fya Road

The 4x6 sills on spans of about 10', which support the floor timbers, will not figure out. It is necessary that additional 3" diameter pipe columns be provided at the center of each of these 10' spans in the case of the piazzas on all of these buildings.

2. Lot # 16 Fya Road

The 4x6 sills supporting the floor joists do not figure out. Neither does the beam supporting the center post carrying the roof, which lands at the center of the span of a 4x6 and 2x8 placed side by side. It is therefore necessary that additional pipe columns, three in all, be provided at the center of each side of the piazza on this dwelling. The pipe column supporting one corner of the piazza leans badly and needs to be placed in a vertical position.

It is necessary that all of this work be taken care of on or before June 10, 1952. Issuance of amendments will be withheld until these details have been cared for in a satisfactory manner. No certificate of occupancy for any of these dwellings will be issued until this has been done.

Very truly yours,

Warren McDonald
Inspector of Buildings

Dear Mr. Spinazola:

Receipt of your application for a conditional use appeal regarding the change of use of the property at 40 Pya Road from a one family dwelling to a two family dwelling, is acknowledged.

This appeal will be scheduled for review before the Board of Appeals on Thursday evening, June 2, 1994, at 7:00 P.M. in Room 209, City Hall, Portland, Maine. You must plan to attend to answer any questions which the Board members may have concerning this appeal.

We will send you a copy of the June 2nd agenda as soon as copies become available for distribution.

Sincerely,

William D. Giroux

- This permit application doesn't preclude the Applicant(s) from meeting applicable State and Federal rules.
- Building permits do not include plumbing, septic or electrical work.
- Building permits are void if work is not started within six (6) months of the date of issuance. False information may invalidate a building permit and stop all work.

Re: 40 Pya Road

Dear Mr. Whitaker:

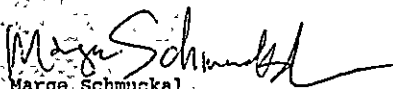

Your application to construct a solarium and bathroom to an existing bedroom has been reviewed and a permit is herewith issued subject to the following requirement(s): This permit doesn't preclude the applicant from meeting applicable State and Federal laws.

No Certificate of Occupancy can be issued until all requirements of this letter are met.

- 1) Separate permits must be taken out for the plumbing and electrical work.
- 2) Before concrete for foundation is placed, approvals from Public Works and Inspection Services must be obtained. (A 24-hour notice is required prior to inspection.)
- 3) Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of special knowledge or separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping room must have minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm), and a minimum net clear opening of 5.7 sq. ft.
- 4) All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the provisions of the building code 919.3.2 (BOCA National Building Code 1993), and NFPA 101 Chapter 18 & 19. (Smoke detectors shall be installed and maintained at the following locations):
 1. In the immediate vicinity of bedrooms;
 2. In all bedrooms; and
 3. In each story within a dwelling unit, including basements.

If you have any questions regarding these requirement(s), please do not hesitate to contact this office.

Sincerely,

Marge Schmuckal
Assistant Chief of Inspection Services

Lewis H. Whitaker, Jr.

Standard Bay Centers	34'-7/8"
Optional Bay Centers	30'-4/8"

ALUMINUM SOLARIUM SPECIFICATIONS

Structure and Framing - All aluminum structure members are extruded 6063-T6 Minimum wall thickness of .090" thick All vertical structural tubes to be 2 1/4" x 3" or 2 1/4" x 4". All tube members to have integral gutter system to control and transfer water condensation out at the sill.
Glazing - All glass to be 3/4" wide, 1/8" overall dual sealed insulated glass consisting of 1/8" bronze, clear or solar cooled tempered outer lite, 1/8" bronze spacer, 1/8" clear tempered inner lite. All curved glass is tempered over tempered. All roof lites are tempered over tempered standard. Optional tempered over laminated available.

Finish - Standard finish to be PPG Quaker Bronze or White utilizing "Duracron" acrylic baked enamel, applied over properly pretreated aluminum, provide excellent corrosion resistance, film integrity, impact and mar resistant. A wide variety of colors are available upon request.

Gaskets and Seals - All glazing to be separated both above and below glass with a custom extruded keyed Silicone Compatible Rubber Gasket. High grade silicone sealant is provided to guarantee a 100% air and water tight enclosure. All glazing materials meet ASTM and ANSI specifications.

Fasteners - All fasteners and structural connections will be stainless steel or cadmium plated.

Structural Loading - All structures are designed to meet the following minimum loading criteria (check local building codes for loading criteria):

- Dead Load - 5 lbs./ft.²
- Wind Load - 25 lbs./ft.²
- Live Load - 35 lbs./ft.²

Note: Most enclosures are engineered to meet much greater loading criteria. For example, our standard glazing bar (10' long) is designed for a projected snow load of 60 lbs./ft.²

System Specifications -		
2 1/4" x 3"	Glazing Bar	2 1/4" x 4"
2.04	Moments of Inertia	4.80
1.30	Section Modulus	2.30
6063-T6	Aluminum Alloy	6063 T6
60 lbs./ft. ²	Snow Load - 10' span	115 lbs./ft. ²
1/2"	Glass Seat	1/2"
2.1 lbs./ft	Weight	2.8 lbs./ft.
4/12 or 3/12	Roof Pitch	4/12 or 3/12

LAMINATED WOOD SOLARIUM SPECIFICATIONS

Structure and Framing - All wooden structural members to be 2 1/4" wide x 3" thick or 2 1/4" wide x 5" thick laminated wood constructed from 1/4" poplar. Laminated beams to be one piece lean-to type with 36" and 24" internal radius, pre-cut wood beams. All exterior joints and skinning will be extruded glazing bars with a minimum thickness of .060" thick. Main rafters are 3 1/2" on centers and are unfinished.
Glazing - All glass to be 3/4" wide, 1/8" overall dual sealed insulated glass consisting of 1/8" bronze, clear or solar cooled tempered outer lite, 1/8" bronze spacer, 1/8" clear tempered inner lite. All curved glass is tempered over tempered. All roof lites are tempered over tempered standard. Optional tempered over laminated available.

Finish - Standard finish to be PPG Quaker Bronze or White utilizing "Duracron" acrylic baked enamel, applied over properly pretreated aluminum, provide excellent corrosion resistance, film integrity, impact and mar resistance.

Gasket and Seals - All glazing to be separated both above and below glass with a custom extruded keyed Silicone Compatible Rubber Gasket. High grade silicone sealant is provided to guarantee a 100% air and water tight enclosure.

Fasteners - All fasteners and structural connections will be stainless steel or cadmium plated.

Structural Loading - All structures designed to meet the following minimum loading criteria:

- Dead Load - 10 lbs./ft.²
- Wind Load - 25 lbs./ft.²
- Live Load - 35 lbs./ft.²

Note: Most structures are designed far in excess of the minimum loading criteria.

System Specifications -	
2 1/4" x 3"	1/4" Poplar Laminated Wood Beam (Up to 9' projection)
2 1/4" x 5"	1/4" Poplar Laminated Wood Beam (Over 9' projection)
3'	Internal Radius [2' for Straight Eave Models]
31.25	Moments of Inertia
12.50	Section Modulus
35 lbs.	Snow Load (Min.)
1/2"	Glass Seat
4/12	Roof Pitch
