AP - 72 Carlyle Road

Mr. Irving H. Dodd
72 Carlyle Road

Dear Mr. Dodd:-

Building permit for construction of a shed roof dormer on rear of your dwelling at the above location is issued herewith on the basis of additional framing information furnished, as follows:-

1. A beam is to be provided for support of rafters of the new dormer roof at a point about 10 feet in from the face of the dormer wall. This will place it directly over the bearing partition in first story so that the posts supporting it can bear directly upon the double 2x4 plate of this partition.
2. A 4x10 dressed Douglas Fir beam is to be provided across bedroom where span will be about 12 feet and a 4x8 dressed hemlock is to be used elsewhere.
3. Notification is to be given this department for inspection before any wall board or other covering is applied to walls, partitions or ceiling.

Very truly yours,

Albert J. Soars
Deputy Inspector of Buildings

AJS/G

August 31, 1956

AP 70-72 Carlyle Road

Mr. Irving H. Dodd
72 Carlyle Road

Copy to L. C. Andrew
187 Brighton Avenue

Dear Mr. Dodd:-

Examination of application for permit and plan filed therewith for construction of a shed roof dormer on rear of your dwelling at the above location raises questions as to the adequacy of the framing shown. Our records indicate that the pitch of roof of existing dwelling is only 8 inches in 12 inches instead of the 9 inches in 12 inches indicated on plan. However, even if the pitch is 9 inches in 12 inches as indicated, the roof of dormer will be so flat that support for rafters will be needed at or near the ridge of the roof.

This support will want to be located directly above the carrying partition in first story, which our records indicate is off center of the building, so that the load it carries will be transmitted to the girder in the cellar and thence to the ground. One of the partitions of closet beside chimney may be located so it can be used for support part of the way, but beams will be needed between the ends of this partition and the end walls of the building.

We shall be unable to issue a permit for construction of the dormer until information has been furnished as to how this framing is to be cared for.

Very truly yours,

Albert J. Scare
Deputy Inspector of Buildings
