Mr. John Currier, Jr.
31 Cushman Street
Mr. C. J. Korkego
60 Carlyle Road

Subject: Application for permit to construct one
story addition 12'x12' on rear of dwelling house
at 60 Carlyle Road

Gentlemen:

It is our understanding that if this addition were to be built it would cover up the window and door which now furnish light and ventilation for the kitchen in the dwelling. Section 212d1 of the Building Code reads as follows:

"An operative window of adequate size to admit light and air shall open directly upon a street, alley, yard or court from every room used for living quarters, except kitchenettes not more than 70 square feet in area and rooms containing water closets or urinals."

If as we assume this kitchen is more than 70 square feet in area, this requirement of the Building Code would not be met if such an addition as you propose were to be built. Under these circumstances we are unable to issue a permit for this work.

If by chance the area of the kitchen is not more than 70 square feet, the Building Code provides that such a room may be ventilated by a duct of incombustible material having a minimum cross sectional area of 57 square inches and projecting through the roof of the building. Should you find it impossible to work out a method of providing an addition in compliance with Building Code regulations, the permit fee paid at time of filing application will be refunded if the receipt for the fee is returned to this office within ten days.

Very truly yours,

Inspector of Buildings

CITY OF PORTLAND, MAINE
DEPARTMENT OF BUILDING INSPECTION

Room 21, City Hall

58-60
Gentlemen:

In connection with the installation of oil burning equipment as indicated in statement below, please sign this statement and return to this office as promptly as possible so that the permit may be issued if everything else is found in order, retaining the copy for your file.

Very truly yours,

(Signed) Warren McDonald
Inspector of Buildings.

* * * * *

1. This statement is to become as much a part of the application for a permit to cover installation of oil burning equipment for George Korkege at 58-60 Carlyle Road, as though written on the application form.

2. A switch or other manual control capable of completely stopping flow of oil to the burner will be provided, such device to be so located as to be conveniently reached and operated without being exposed to danger that may exist at or near the burner. If feasible this switch or similar device will be located at or near the top of the cellar stairs. In case the burner is of a type without electrical controls, a quick-closing valve will be provided in the oil supply line so located and arranged that the valve may be manually closed from the top of the cellar stairs, or outside of the room where the burner is located or from outside the building.

3. A quick action, self-closing valve designed to close at 160 to 165 degrees Fahrenheit will be provided in oil supply line.

4. Readily accessible shut-off valves, one of which may be the self-closing valve indicated in No. 3 if capable of manual operation, will be installed in oil supply line near each burner and close to supply tank. Shut-off valves will be installed on each side of oil strainers which are not a part of the oil burner unit or which are connected to oil burner unit without intervening piping or tubing. Shut-off valves will be provided both on the discharge side and the suction side of oil pumps, if any, which pump directly to the burner but which are not a part of the burner unit.

5. If there is to be a shut-off valve in the discharge line of an oil pump, a suitable pressure relief valve will be connected into the discharge line between pump and shut-off valve and arranged to return surplus oil to the storage tank or to by-pass it around the pump.
