APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, May 24, 1956

PERMIT ISSUED

00387 MAY 24 1956

CITY of PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 53 Canco Road Use of Building Dwelling No. Stories New Building Existing
Name and address of owner of appliance Mrs. Bernice Berryman, 53 Canco Rd.
Installer's name and address A. E. Moody, 479 Auburn St Telephone 2-0072

General Description of Work

To install forced hot water heat in place of existing warm air heat and install new oil burner.

IF HEATER, OR POWER BOILER

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Kind of fuel?
Minimum distance to burnable material, from top of appliance or casing top of furnace
From top of smoke pipe From front of appliance From sides or back of appliance
Size of chimney flue Other connections to same flue
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion?

IF OIL BURNER

Name and type of burner Hart Labeled by underwriters' laboratories? yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bottom
Type of floor beneath burner concrete Size of vent pipe 1 1/2"
Location of oil storage existing in garage Number and capacity of tanks 1-275 gal.
Low water shut off Make No.
Will all tanks be more than five feet from any flame? yes How many tanks enclosed?
Total capacity of any existing storage tanks for furnace burners None

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? 2.00 (\$3.00 for one heater, etc, 50 cents additional for each additional heater, etc, in same building at same time.)

APPROVED

Handwritten signature and date: M. J. 5.24.56.

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes

May 25, 1951

Mr. Carl E. Selberg
47 Canco Road
Portland, Maine

Copy to, Mrs. Alice G. Davis
53 Canco Road

Dear Mr. Selberg:

Building permit for construction of a one story addition 5 1/2' x 11' on the side of the dwelling at 53 Canco Road, corner of Wellington Road, is issued herewith subject to the following:

1. It is understood that about five feet of the concrete foundation wall of the existing dwelling adjoining the new addition is to be removed and that a corresponding length of wood wall directly above is also to be taken out. Since the first floor and ceiling joists of both the existing building and the addition run parallel to the walls to be removed and since the opening is in the gable end of the building, no added construction will be needed to carry the negligible loads across these openings, the sill being a 4x8 laid flatways.

2. Presumably the small entrance porch at the end of the addition which scales about 3x3' and projects into the front yard of the dwelling is to have no roof over it since none is indicated. Foundations of this platform are required to extend at least 4' below grade and if pipe columns are used for this purpose, they are required to have an outside diameter of not less than 3". Sills of platform are required to be no less than 4x6, all one piece in cross section, with the floor joists either resting on top of the sills or notched over no less than 2x3 nailing strips spiked to the sides of them.

3. Since the wall of the addition will be closer than 5' to the existing garage on the lot, protection as indicated in the application for permit is to be provided on the inside faces of the studs of the garage wall wherever they are closer than 5' to any part of the addition.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/B

P. S. This permit is issued for the convenience of owner and contractor without sufficient information to show compliance with the Building Code. On basis, if the above is not fully understood, or, if you are unable or willing to abide by the conditions note, it is important that you refrain from starting the work and return the permit for adjustment.

Johnson Automatic Heat
15 Brackett Street
Mr. John E. Davis
53 Canco Road

Subject: Building permit for installation of oil
burning equipment in combined dwelling house
and garage at 53 Canco Road

Gentlemen:

There is not enough information on the application for the permit to show compliance with Building Code requirements. Rather than delay issuance of the permit longer, it is issued herewith subject to all requirements of the Building Code and especially to the following:

1. Application indicates that the floor furnace bears "label of the Underwriters Laboratories Inc., and examination of the Underwriters approval information shows that, since this furnace is to be installed in a wooden floor, to comply with their approval, it must be of the type identified as C-9. If this floor furnace is not identified as this type, it should not be installed, but report made to this office and the approved type secured.

2. The question on the application as to minimum distance from furnace to combustible material is answered by the word "contact". I presume this means that the register over the furnace is in contact with the woodwork, but not the furnace itself or any other part that would tend to ignite the woodwork. In this connection the Underwriters' approval statement carries the precaution: "Proper precautions must be taken to prevent covering the register with combustible material and to avoid injury to persons when burner is operated at full capacity".

3. It is noted that a gas stove is connected to the same chimney flue as will be the proposed furnace. If this gas stove is automatic in any manner so that a pilot light is used in such a way that should the pilot light become extinguished, the unburned gas from it would reach the flue, then the gas-fired appliance should be equipped with a device which would shut off all gas to the appliance in event the pilot light were extinguished.

4. The weight of this appliance is not known but presumably it is to be hung upon the present floor construction, and the installer must make sure that the floor construction is suitably reinforced to take the additional load if not undoubtedly strong enough now. Presumably one or more of the floor timbers will have to be headed off in order to give space for the register, and this should be done by a competent carpenter thoroughly accustomed to doing such work under Building Code requirements, so that the header and trimmer beams are properly put in, and joints doubled, if necessary.

5. It is usual to install such a storage tank in the room where the oil burner assembly is located. The fact that this tank is to be installed in the attached garage is unusual, but I can find no regulation prohibiting it. However, the owner and installer should understand that extra precautions should be taken in venting the tank so that should a fire (usually a very quick one in a garage) take place in the garage, the quickly building expansion of the gas on the top of the oil within the tank would

Johnson Automatic Heat
Mr. John E. Davis ----- 2

September 19, 1946

be certainly relieved before a disastrous explosion of the tank could take place.

Very truly yours,

Inspector of Buildings

WMcD/S
