

City of Portland, Maine Board of Appeals _ZONING_

May 6, 1955

To the Board of Appeals:

, who is the owner Philman Coolbroth , respectfully petitions the Board of Appeals Your appellant, property at 49 Almwood Street of the City of Portland to permit an exception to the regulations of the Zoning Ordinance relating to this property, as provided by Section 18, Paragraph E of said Zoning Ordinance.

Building permit to authorize construction of a one-story enclosed porch, about 8 feet by 12 feet, on the building at 49 Elmwood Street is not issuable under the Zoning Ordinance because the wall of the porch would be only 12 feet from the street line of Oakwood Avenue (a platted but undeveloped street) instead of the 15 feet stipulated by Section 16J of the Ordinance as applied to the Residence C Zone where the property is located.

The facts and conditions which make this exception legally permissible are as follows: An exception is necessary in this case to grant reasonable use of property and can be granted without substantially departing from the intent and purpose of the Zoning Ordinance.

Laraine S. Castarett

the Board of Appeals finds that an exception is necessary in this case to grant reasonable use of property and can be granted without substantially departing from the intent and purpose of the Zoning Ordinance.

It is, therefore, determined that exception to the Zoning Ordinance may

be permitted

in this specific case.

Mr. Missiml Core, President Filmat Corp. 221 Garbeiland Ave.

Door St. Cope :-

lines our discussion of the proposition of finishing exterior valls of duell-ingo on the cutaide, using merely 15 pound felt seroes the face of the stude or up-rights and outside of the felt vertical one inch (nominal thickness) tongue and growed shostning exposed on the outside, I have examined the homes, at the locations listed above, and have settled it in my mind that the construction work is in violation of Sect. 312c3.14 of the Building Code.

At our conference the cettlement of the problem was left in an incomclusive monor because you desired to produce written statements from matever people or perionced in building construction and maintenance, to appoint your view that this type of construction does emply with the Building Code. In econoction with other features of dwellings certain matters, notably the rows finished on the second floor of a Calch St. house, without a possit, have been left in the case inconclusive fashion upon your process to care for them and have corrections sade. In the case of the Calch St. house, the matter of the finished roms and the "T" girders has never been brought up since, and as far as I know, nothing has been done to correct the situation over these mony months. For this reason it because necessary to proceed with more precision in this exterior wall case.

Therefore, this letter is notice that the above four houses, being built under your direction, are in violation of the Building Code in that the read sheething on the outside of the walls, backed-up by only 15 p and felt, is neither undoubtedly weather redictive and of such a character so to be paramently durable for outside emposito, nor is the shoothing covered with saterial that is weather remistive and permanently durable for outside exposure.

As authorised and directed by Sect. 109 of the Building Code, copy enclosed, you are hereby required to have those violations made good before May 19th, 1953.

This date is for enough may to give you asple time to exercise your appeal rights under the Brilding Code - Nect. 115. Such an appeal would be what is called a reversal expeal in that you would be seeking a decision from the Board of Municipal Officers to the effect that the construction you have used is in compliance with the Dullding Code.

The date given above for compliance with tide order is far enough away so that, if you move without delay, the matter can come to hearing on May 15th before which time In sporty he appe to brognes apprease angence den was tirm to entiant four case.

Vory truly yours,
