Gentlemen:-

Permit for installation of several systems of mechanical ventilation in the building under construction at the above location is issued herewith based on plans filed with application for permit, but subject to the following conditions:-

1. Details of all installations are to comply with requirements of "Standards of the National Board of Fire Underwriters for the Installation of Air Conditioning, Warm Air Heating, Air Cooling and Ventilating Systems as recommended by the National Fire Protection Association (Pamphlet No. 90).
2. Ventilating systems for the repair and storage garage areas in basement are to be capable of changing the air in all such parts at the rate of one cubic foot per minute per square foot of area.

Very truly yours,

Warren McConrad
Inspector of Buildings

Ventilation of spray painting booth in new building of Central Maine Power
Company at 138-202 Canco Road

This application for a permit for installation of a number of systems of
mechanical ventilation in the building under construction at the above location
includes one for ventilation of a paint spraying room or booth, which is required
to have your approval as specified by Section 212-f-4 of the Building Code. The
details of this installation are indicated on Sheet H2R of the plans attached. Are
you able to approve the installation of this particular system?

We have not yet received information as to the details of construction
of the booth itself, but as soon as they are furnished we will send them to you for
consideration.

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

PERMIT ISSUED 0203 NOV 17 1954 CITY OF PORTLAND N-E 05

Portland, Maine, Nov. 8, 1954

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 138-202 Canco Road Use of Building Service Building No. Stories 2 New Building
Name and address of owner of appliance H. E. Mutual Life Insurance Co., 501 Boylston St., Boston, Mass. Existing
Installer's name and address Fels Co., Inc., 42 Union St. Telephone 2-1939

General Description of Work

To install steam boiler and oil burning equipment

sent to Fire Dept. 11/8/54 Rec'd from Fire Dept. 11/16/54

2-1401

IF HEATER, OR POWER BOILER

Location of appliance boiler room Any burnable material in floor surface or beneath? no
If so, how protected? Kind of fuel? oil
Minimum distance to burnable material, from top of appliance or casing top of furnace *
From top of smoke pipe * From front of appliance * From sides or back of appliance *
Size of chimney flue 24x24 Other connections to same flue none
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? yes

IF OIL BURNER

Name and type of burner Iron Fireman Labeled by underwriters' laboratories? yes
Will operator be always in attendance? Does oil supply line lead from top or bottom of tank? top
Type of floor beneath burner concrete Size of vent pipe 2"
Location of oil storage outside below ground Number and capacity of tanks 1-6,000 gal.
Low water shut off yes Make McDonnell Miller No. 150
Will all tanks be more than five feet from any flame? yes How many tanks enclosed?
Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

*No combustible material
Tank will be 3' underground Tank bears Underwriters label see regulations

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

Gentlemen:

Evidently the required Underwriters' label on the oil burner was a "decal" of some similar material; and reportedly an accidental backfire or something of the sort during installation destroyed the label except a very small part of it--not sufficient for complete identification.

The Building Code requires that the burner shall actually bear upon it the label of Underwriters' Laboratories, Inc. Our inspector believes that the theory of Mathews Sales & Service, the company which installed the oil burning equipment, is correct and that the burner actually did bear the label upon it. However, it seems best to ask you as agents of the owners to pass upon this situation and decide whether or not the oil burner as it stands is acceptable to the owners, rather than have some question come up later and have the owners feel that we had not carried out our assignments. If the owner feels satisfied with the situation as it is, that position will be agreeable to this department.

If the owner is not satisfied, the proposition of making good the label is quite long drawn out. The Mathews Co. would have to contact the manufacturer of the burner. The manufacturer would have to contact Underwriters' Laboratories, Inc. in Chicago identifying the particular burner. The Laboratories would send the specifications for the burner and the label to their local representative in Portland. The representative would examine the installation and compare it with the specifications. If all was found in order, he would attach the label.

Upon report of our inspector of the model number and the manufacturer of the burner, we have checked against the Underwriters' list and find that this burner is evidently entitled to carry the label, and the mutilated label is in the correct place on the equipment as indicated in the Underwriters' list.

Very truly yours,

Warren McDonald
Inspector of Buildings

Memorandum from Department of Building Inspection, Portland, Maine

136-202 Canco Road--Installation of oil heating equipment for N. E. Mutual
Life Insurance Co. of Maine Co., Inc. installers

Before tank and piping is covered from view, installer is required to notify Fire Department Headquarters of readiness for inspection and to refrain from covering up until approved by the Fire Department.

This tank of 1000 gallons capacity is required to be of steel or wrought iron no less in thickness than No. 10 gauge: before installation is required to be protected against corrosion, even though galvanized, by two preliminary coats of red lead and heavy coat of hot asphalt, or equivalent.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double ending joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

Alonzo J. Harriman, Inc.

Gentlemen:-

A quick review of your plans of the service building reveals a few questions which should be called to your attention at once without waiting for further check.

The service building must be classified as Metal Frame Construction because the outside walls are not completely of masonry or reinforced concrete.

The following details (and there may be others) do not comply with the requirements in Sect. 302d of the Code for Metal Frame Construction. It appears that the large exterior doors of both truck docks have plywood panels even if the frame of the doors is not of wood. This proposition was brought to Mr. Doucette's attention when we had our conference.

In the design of the cornices you have evidently relied on Sect. 308b6(c) but the backing-up of eight inch masonry does not appear, nor have we found any indication of fire stops at each 24 feet of length of the cornice.

Very truly yours,

Warron McDonald
Inspector of Buildings

Gentlemen:

We are issuing herewith advance permit for construction of foundation only for new service building for the Central Maine Power Company at 138-202 Canco Road this City based on revised plans received July 15, 1954. We note that in accordance with our letter of June 25 the thickness of the cinder block rear wall of the stockroom area has been increased from 8 inches to 12 inches, but that no change has been made in the thickness of the concrete foundation wall supporting it. This is very likely due to an oversight in revising the plans, since the foundation wall will need to be made at least as thick as the wall above.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJJ/B

Dear Mr. Doucette:

Will you please send us the statement of design required to be affixed to the plans? In case you have mislaid a blank copy previously sent you, we are enclosing another copy of this statement for your use.

Gentlemen:-

In line with conversation with Mr. Arthur Cullinan, advance permit covering excavation only for foundation of two story service building to be erected at 138-202 Canco Road, corner of Bay Street extension, is issued herewith on basis of outline drawings filed with application for permit and without prejudice as to compliance with any conditions stated in the deed transferring the property from City ownership.

We understand that the building is to be decreased in length somewhat from the size originally planned and that the architects are now working on a revision of the plans in accordance with this and perhaps other changes contemplated, prints of which are to be filed as soon as ready with the application for general construction permit already made.

Very truly yours,

Warren McDonald
Inspector of Buildings

Dear Sir,

Re: Central Maine Power Company
Service Building and Repair Garage

We hereby are applying for a permit to build
the foundations for the above captioned job.

Enclosed find a check for \$1.50 covering the
fee. If this is not the correct amount please
let us know.

The plans and specifications are being sent
to you under separate cover.

Very truly yours,

ALONZO J. HARRIMAN, INC.

June 1, 1954

Mr. Edward B. Doucette
Alonzo J. Harriman, Inc.
292 Court St.
Auburn, Maine

Dear Mr. Doucette:

Acknowledging your letter of May 27 relating to the new Central Maine Power Company Service Building and Repair Garage on Canco Road in this City and two sets of blueprints and two copies of the specifications, in order for us to put this work in our regular line of checking, it is necessary for us to have a formal application for the permit for filing plans and specifications.

For your convenience we are enclosing the file copy and inspection copy of our application form, made out as best we can. Please fill in the present estimated cost of the building, sign both copies and return both to complete our record.

Evidently there was some misunderstanding about the fee, since your check is for one dollar and a half. Perhaps I did not make clear to you that the fee is based upon the estimated cost of the work and is one dollar per thousand up to a maximum of one hundred and fifty dollars. Since the building will undoubtedly cost several times one hundred and fifty thousand dollars, your check should be for one hundred and fifty dollars, and the original check is returned herewith.

You will recollect that this method of having the architect file application for the permit and paying the fee is merely a vehicle for putting the job in our active checking list. After you have paid the fee, checking will get suitable priority in our list of active jobs. If you desire and will so instruct us, we will withhold issuance of the permit, merely notifying you and the owner of any discrepancies which we may find.

When the contractor is known, you can return the receipt for the fee which you paid here, whereupon the money will be refunded, and the contractor can file permanent application for the permit, give the true estimated cost (his estimate should include everything, however, whether in his contract or not), and paying his own fee.

Unless there are changes in plans and specifications, we can use and would prefer to use the set of plans and specifications which we will have checked, so that the contractor need not file a complete new set. If, however, there are changes in any of the plans and specifications from those we now have, revised plans and specifications should be filed by the contractor, if possible with notations as to what has been changed to save us the time of checking the plans and specifications against the new ones all the way through.

We need only one set of plans and specifications; so. "

Mr. Edward B. Doucette 2

June 1, 1954

you sent will be held here for a time for you to send for if you desire.

Along with the preliminary application and your check for the fee, please send also the signed statement of design called for by Section 104b3—a copy being enclosed for your convenience.

Very truly yours,

Warren McDonald
Inspector of Buildings

WHCD/B

Enclosures: Your check, two copies of application, statement of design blank.

P. S. Our Mr. Sears has just called my attention to the fact that the two buildings are detached. Under these circumstances a separate application will be required for each building and a separate fee according to the estimated cost of each. Also we are including a separate application for each building and two blank statements of design.
