Mr. Chris Brown 724 Allen Ave. Portland, ME 04103

re: 33 Allen Ave.

Dear Sir:

Your application to make a change of use - from vacant to paintball playing field with office - has been been reviewed, and a permut is herewith issued subject to the following requirements:

No certificate of occupancy can be issued until all requirements of this letter are met.

- 1. The play area shall be lotated at a minimum of 200 feet from any occupied residential property.
- occupied residential property.

 2. All requirements of the City's land use ordinance, Section 14-247 (external effect standards) shall be adhered to.
 - 3. Means of egress shall be illuminated Section 24-28.
- 4. Means of egress shall have signs with emergency back-up Section 24-2.10.
- 5. Fortable fire extinguishers shall be provided(1) Section 24-3.5.3

If you have any questions regarding these requirements, plane do not hesitate to contact this office.

Sincerely,

Chief of Inspection Services

DYE HARD PAINTBALL

February 16, 1993

City of Portland William D. Giroux Zoning Administrator

Dear Mr. Giroux,

This letter is in reference to my proposed paintball game located at, 33 Allen Ave. I have answered questions a ced in your letter concerning the game and playing area.

- 1. I was unable to find any information regarding decibal levels on CO2 guns after contacting several manufacturers and distributors. The gun I would be using is made by Air Concepts in California. I spoke with Mr. Dannis form Air Concepts who informed me that their product liability did not require any ear protection. However, the sound is minimal as heard by Mr. Giroux on our site walk when demonstrating the CO2 gun.
- 2. Average accurate range of a psintball is 100 Ft. At that distance a ball can be dodged. (Action Pursuit Magazine article May 1992, page 16.) At and beyond that distance the ball has lost most of its speed due to its round shape. After shooting 12 balls the furthest distance I was able to achieve was 62 yards. This was done aiming the gun at its optimal angle for distance.
- 3. The contexts of a paintball are made with a water soluable, nontoxic and biodegradable dye. This information was provided by National Survival Games. Their address is P. O. Box 1439, New Lencon, NH 03257.
- 4. The play area is to be controlled by two or three referees on the field. The play area is enclosed by 3 inch safety tape. The whole cutside area is enclosed by chain-link fence. No one will be allowed in these areas unless they are participating in the game. The play area is enclosed in yellow on the map.
- 5. There will be five employees.
- 6. There will be no lighting on the playing field as the games will be played during daylight hours.
- 7. The parking area is 80 Ft. \times 40 Ft. and is outlined in red on the site map. The area is gravel and will be roped off to keep parking contained in

Sincerely, Chris G. Brum Chris A. Brum

CITY OF PORTLAND

February 12, 1993

Chris Brum 724 Allen Ave Portland, ME 04103

> Re: 33 Allen Ave Dya Hard Paintball

Dear Mr. Brum,

This letter it in reference to your application on February 8, 1993 regarding "DYE HARD" paintball playing area. Your use appears to be permitted in the I-2 zone where this property is located. The submitted information however does not address several issues we consider to be pertinent. Please provide the following:

- 1. Decibal level of CO2 guns.
- 2. Maximum range of guns.
- 3. Contents of paintball.
- 4. How is play area to be contained and controlled.
- 5. Please provide the number of employees.

6. Type of lighting proposed, ie: lumens, location, and direction.

I have reviewed your submitted site sketch and it will be necessary for me to visit the site. I would like to meet you there on Tursday, February 16th, at 10:30 a.m. Please call to confirm . This is an acceptable time.

Sincerely,

William D. Giroux Zoning Administrator

Chirs Brit 724 Allen A.O. Parrland the cultos 033-5114 an site Mip 156 Dye fried Auntbill Gome Back of Building) CF Tek Inc. Auburn, ME Androscoggin County SCRAP TIRE PROCESSING FACILITY #S-20487-05-A-N

SOLID WASTE AND SITE LOCATION ORDER

FINDINGS OF FACT AND ORDER

5. The proposed facility will be located on soil types which are suitable to the project and will not cause unreasonable erosion of soil or sediment in that the project will not disturb soils beyond normal maintenance practices.

The proposed factive will not pose an unreasonable risk that a discharge to a significant ground water aguifer will occur in that the processing and storage is contained.

- 7. The applicant has made adequate provisions for solid waste disposal in that any solid waste generated at the facility will be sold as tire-derived fuel, recycled or disposed of at the Mid-Maine waste action Corporation facility in Auburn, Maine.
- 8. The activity will not unreasonably cause or increase the flooding of the property or create an unreasonable flood hazard to any structure in that the proposed activity is outside the 100 year flood plain.

THEREFORE, the Department APPROVES with the attached condition the application of CP Tek, Inc., to establish and operate a Waste Rubber Processing Facility in accordance with the following conditions:

- 1. The Standard Conditions of Approval, a copy attached.
- Waste rubber and processed rubber may not be stored outside the processing building except in enclosed trailers or roll-off
- 3. Should CP Tek. Inc. elect to relocate the processing facility to a location which has been previously approved for industrial use under the State Mite Location of Development Statute, and for which he variances are required under Mainu's holid Maste Management Rules, notice must be provided to the Eureau of Solid Waste Management Rules, sixty days prior to relocation. If CF Tek, Inc. selects to relocat site Processing facility to a site that has not previously received appropriate siting and design criteria of the Maine Solid Waste Management Rules, CP Tek, Inc. shall sobmit an application to the Department for review and approval prior to such relocation.

CITY OF PORTLAND

October 14 1993

RE: 33 Allen Avenue - Portland

Portland Olympic Boxing 295 Forest Avenue Portland, ME 04101

Dear Sir:

Your application to change the use from vacant space to gymnasium has been reviewed and a permit is herewith issued subject to the following requirements:

No Certificate of Occupancy can be issued until all requirements of this letter are met.

Site Plan Review Requirements
Inspection Services Approved William Giroux
Fire Department Approved LT. Gaylen McDougall
Planning Division Kandi Talbot
Public Works OK

Building & Fire Requirements
All exit signs, lights and means of egress lighting shall be done in accordance with Article 8 section and subsection 822 and 823 of the City's building code. (The BOCA National Building Code/1990)

lf you have any questions regarding these requirements, please $\mbox{d} \sigma$ not hesitate to contact this office.

Sincerely,

PA Samuel Hoffses Chief of Inspection Services

/e1

Suite 341
295 Forest Avenue
Portland, ME 04101

RE: 33 Allen Avenue

Dear Mr. Giglio: '

on october 1, 1993 the Portland Planning Authority granted minor sits Plan approval for the change of use at 33 Allen Avenue from variant space to gymnasium.

The approval is based on the submitted site plan. If you need to make any modifications to the approved site rian, you must submit a revised site plan for thaff review and approval. The site plan approval will be deemed to have expired unless work in the development has connected within one (1) 1007 to one approval or within a time period agreed upon in writing by the City and the applicant.

It there are any questions, , ease contact the Planning Staff.

Sincerely

Josephie, Cray, Jr.

Engineered Recycled Products

November 4, 1991

Mr. Bill Giroux City of Portland Planning Office 389 Congress Street Portland, Maine 04101

Dear Bill:

I am submitting for your inspection and approval a request for "change of use" for the property located at 33 Allen Avenue in Portland. As you know, we have been utilizing the site for storage of chipped tire materials. We currently store about 6,000 tons of material at this site. We request minor site plan approval for change of use of a 5200 square foot building from storage to manufacturing. This will enable us to process these chips into usable form.

We are licensed by the State of Maine DEP to process used tires into TDF, which is tire derived fuel. We currently operate a facility in Auburn which we plan to close and relocate in Portland. We are also working with another company in southern Maine which we plan to utilize for chipping of tires. In about two weeks, if this project goes as planned, we will not process whole tires in Portland except for local supply. All contract tires from major suppliers will be processed at this other location. Our plan for the Portland site is as follows: as follows:

Traffic: We plan to receive and ship a total of 15 to 20 tractor trailer loads per week. These will be for having tire chips in and out of the property. We will utilize the truck scale already located on the property. Weight limits will run up to 100,000 pounds per load. Access will be to our location from the Maine Turnpike.

Administration: We will locate a 12 x 60 office trailer at the site as administrative offices. We will conduct business with our customers from these offices. We will utilize an old office area in the warehouse for rest rooms and as a break room for employees.

P.O. Box 1627

1593 Hotel Road

Auburn, ME 04211

207-783-7550

Employment: We currently employ 15 to 20 employees in Auburn. We would employ a similar number of workers in Portland. We plan to move only 4 or 5 current employees. We currently generate sales in the \$1,000,000 rang. Once in Portland, we plan to expand and should double or triple this amount within a year.

Noise: Our processing equipment will be located inside. The noise level of the equipment during operations is lower than 80 decibels beside the equipment. We also generate our own electricity with a diesel generator. It is containerized and has a residential muffler. It will be located outside near our manufacturing building. The noise level of this generator without an enclosure is 86 decibels at 50 feet. Our unit is enclosed. We also operate a bobcat and a front-end loader which generate normal tractor noises.

Security: The property is enclosed with a chainlink fence--some of it in disrepair. We will repair as much as possible with our staff. We will operate two shifts at the site and therefore, will have some present from 6:00 a.m. to midnight, five days a week. We will supply either a security guard or a security service for weekends and nights. The gate at the entrance to the property will be locked when we are not open for business.

We will consider putting in security cameras, if it becomes necessary to protect our equipment and property after we move in.

Storage of Materials: We plan to store tires and chips in buildings as shown in the plant diagram. We will store reclaimed steel from the tires outside on asphalt for preparation or reprocessing to be shipped south. We remove most of the wire from the chips during our processing. We occasionally will also collect tire rims, and these also will be store outside. We ship these out when we have a sufficient supply. These are stored in containers.

We have a 3,000 gallon diesel tant which is housed in a steel container. This diesel is used to fuel our generator. It is piped directly to the generator. We also have a tap to fuel our loader and bobcat.

Rail Siding: We plan to bring in from 2 to 10 railcars per week to the Allen Avenue location. These are unloaded by our bobcat, and the material is stored in an open building with a roof and no walls. We can enclose this building if desired by installing plastic woven material to the beams that support the roof.

Waste: We will locate a waste hopper for the containment and disbursement of trash from the site.
Our process has no by-products that require

disposal. All of the materials extracted from the processing procedure have value and are sold to appropriate markets. Some storage is required prior to shipment.

Process Water and Dust Control: We use a slight amount of water in our process for lubrication. The water also servies as dust control during the processing. Very little dust is generated from processing, and all is contained within the building. Any rubber being processed that contains materials that can cause dust will be contained, in order to prevent the generation of dust off of the property. Water is used in the process to facilitate better removal of contaminants.

Water used in our process is collected by a floor drain system and returned to a collection tank which recycles the water. Periodically, the drain system is cleaned to remove all contaminants.

Odor: We have materials now stored at the site in Portland which come from a tire fire in Montreal. This material does have a slight odo; which is not offensive. It becomes stronger only when we work the pile. We anticipate processing this material during January or February, and we are not accepting any more materials from this Montreal clean-up. Normally, our materials have only the slight odor of rubber, which is typical of a tire dealer.

Fire Suppression and Control: The site has several fire hydrants in close proximity to the processing and storage sites. We have fire extinguishers located inside the processing building. If a third access or escape door is required for the processing building, we are prepared to install it in the furthest corner from the other two exits. Fire protection from the city is nearby on Forest Avenue and Washington Avenue.

Lighting: We plan to install and repair existing lighting to keep the site illuminated during night operations and as security for the site.

Process equipment will be well lit with existing mercury vapor lighting.

I hope I have addressed all pertinent questions which could arise from our move to the Allen Avenue site. The change of use for the 5200 square foot building will allow us to process the shreds which are presently being stored at the site. The finished product from processing can be used by many paper companies in Maine, including S. D. Warren in Westbrook. TOF, when mixed with their other fuels, will increase their effectiveness and reduce the level of pollutants from their present operation.

I hope you will find our application acceptable and reply to us as soon as possible, as our lease in Auburn expires at the end of the year and we must make improvements to the building in Portland that we plan to utilize for processing.

I look forward to hearing from you soon and operating a successful business in the Portland area. Please let me know if you require any further information.

Sincerely yours,

Kohul CLevasseur Robert C. Levasseur

STATE OF MAINE DEPARTMENT OF ENVIRONMENTAL PROTECTION STATE HOUSE STATION 17 AUGUSTA, MAINE 04333

DEPARTMENT ORDER

IN THE MATTER OF

CP Tek Inc.
Auburn, ME Androscoggin County
SCRAP TIRE PROCESSING FACILITY
#S-20487-05-A-N

SOLID WASTE AND SITE LOCATION ORDER

FINDINGS OF FACT AND ORDER

Pursuant to the provisions of 38 M.R.S.A., Sections 471 et. seq. and 1301 et. seq., the Department of Environmental Protection has considered the application of CP Tek Inc., with its supportive data staff summary, agency review comments, and other related materials n file and finds the following facts:

- CP Tek, Inc. proposes to locate a waste rubber p ocessing facility at 1593 Hotel Road in Auburn, Maine.
- The proposed process involves the shredding and granulating of waste rubber, primarily scrap tires.
- 3. The applicant proposes to locate its processing equipment inside an existing enclosed building which has a history of industrial use.
- 4. The applicant proposes to store waste rubber awaiting processing and processed materials in enclosed trailers and roll-off containers at the site.
- 5. The applicant has submitted a copy of a lease dated September 13, 1990 which establishes its right, title and interest in the property at 1593 Hotel Road.
- 6. The applicant has submitted information on noise generation which indicates that each of the two processing units have been found to be at or below 45 decibels 200 feet away from the machine. Due to the location of the processing equipment within an enclosed building and high levels of background noise from heavy traffic on the Hotel Road, the applicant anticipates that the noise level will diminish to a barely perceptible level at the facility boundary. The City of Amburn has commented that the facility will not cause a significant increase in noise already experienced by the surrounding neighborhood.
- 7. The applicant has submitted an operating manual which addresses the following requirements: facility access, transportation, material handling, equipment maintenance, litter control, dust control, vector control, odors, wastewater disposal, fire protection, safety, personnel training and annual reports.
- 8. The applicant has submitted a letter of intent from Champion International Corporation to purchase processed rubber for use as tire-derived fuel in a multi-fuel boiler.

CP Tek Inc. Auburn, ME Androscoggin County SCRAP TIRE PROCESSING FACILITY #S-20487-05-A-N

SOLID WASTE AND SITE LOCATION ORDER

FINDINGS OF FACT AND ORDER

- The applicant has submitted a letter of intent from Maine Metal Recycling Inc. to recycle the steel wire generated by the processing of scrap tires.
- The applicant has provided its projected financial statement for the first year of operation and letters from Key Bark and the Auburn Business Development Corporation proposing to provide financing for
- The applicant has submitted written descriptions of the facility operators' 48 years of combined experience in applied engineering.
- The applicant anticipates that 10 cars, 5 pickup trucks and 10 The applicant anticipates that 10 cars, 5 pickup trucks and 10 commercial trucks per day will enter and exit the facility. Vehicles will arrive and exit the facility via Hotel Road. The of Auburn has commented that no significant impact on traffic conditions are expected from the proposed facility. The City
- A residence is located approximately 400 feet from the existing A residence is located approximately 400 feet from the existing building proposed for use as a processing facility. The application has requested a variance to Chapter 409, Section 4(B)(1) of the Department's Rules which require the maintenance of a 500 foot buffer strip between a solid waste processing facility and the nearest residence. The applicant claims that there will be no perceived difference in their operation from that of other manufacturers. Further, operation of the proposed facility is The applicant manufacturers. Further, operation of the proposed facility is compatible with surrounding land-uses in that the facility in an area which has been zoned for industrial use and in a building which has been used for commercial and industrial numbers since there has been used for commercial and industrial purposes since 1981.
- The applicant proposes to relocate the processing facility to a more flexible site by September of 1991. The applicant has requested before-the-fact approval for relocation to a site which has been previously approved for industrial use under the Site Location of Development Statute and which would require no variance under Maine's Solid Waste Management Rules.

BASED on the above findings of fact, the Dapartment makes the following

The applicant has financial capacity and technical ability to develop the project in a manner consistent with environmental standards and with State law in that it has provided a finant statement and written letters of intent to provide financing project and written descriptions of the operators' technical background in professional engineering. background in professional ergineering.

The applicant has made adequate provision for traffic movement ${\cal A}$ all types into, out of and within the development area.

- The applicant has made adequate provision for fitting the development harmoniously into the existing natural environment in that the development is located in an industrially zoned area.
- The development will not adversely affect existing uses, existing water quality or other natural resources.

Mr. Peier A. Lewis 11 Salem 2d. Azinson, New Hampshire 03811

> RE: 33 Allen Ave. Flea Market

Dear Mr. Lewis,

On October 21, 1994, a permit (#941165) was issued to you "to erect handicap access with renovations". A meeting was held with Mr. Peter Hoglund, Lt. Gaylen McDougall and myself at the site to convey to Mr. Hoglund exactly what had to be done to get a Certificate of Occupancy. The items relating primarily to emergency lighting and exiting have not been completed and no Certificate of Occupancy has been issued, although the flea market has been open for several weekends. Operation of the flea market without a Certificate of Occupancy is a violation of City Ordinance.

You are hereby o'dered to complete all the necessary work to get a Certificate of Occupancy within ten days from the date of this letter. If you should fail to comply with all applicable City Codes, the City will commerce an enforcement action against you.

Sincerely

Arthur Rowe
Code Enforcement Officer
