**Memorandum from Department of Building Inspection, Portland, Maine**

601 Washington Avenue--Erection of projecting signs for Gulf Oil Corp. by  
United Neon Display

Building permit is issued subject to the following:

Projection of the outside edge of circular sign from the street line (inside edge of public sidewalk) must not exceed 6'. If it should, the sign would be in violation of Section 211c7 of the Building Code since the top of the sign and the upper horizontal arm will be more than 17' above the sidewalk. The location plan filed with the application carries the notation "no part of sign to extend more than 6' over sidewalk", but this is on the original of the plan and it is quite possible that the erector has no duplicate. The standard detailed plan of the sign and mast indicates that the outside edge of disc of sign would be 7' from the mast. Thus it appears that the edge of the mast nearer the inside edge of sidewalk would have to be no less than one foot inside of that edge of sidewalk which is ordinarily the street line. Please see t. it that this feature is taken care of.

Note also that top and bottom hangers of the sign are required to be bolted to the horizontal arms by bolts through both hanger and arm.

AP 795-803 Washington Avenue,  
Corner of Ocean Avenue-I  
(Tank installations)

August 30, 1919

Mr. Ralph Romano, Jr.  
322 Spring Street  
Gulf Oil Corporation  
Attn: Mr. Northon  
621 Lanforth Street

Subject: Permit for installation of various  
underground tanks at 795-803 Washington  
Avenue, corner of Ocean Avenue

Gentlemen:

We are not holding precisely to the requirements of the Building Code in this case, but rather than delay issuance of the permit, it is being issued with this letter to Ralph Romano, Jr., the installer, c/o Gulf Oil Corporation, with a copy of this letter.

The Building Code actually provides that the building permit for such installation may only be issued to the actual installer who, in this case, is Ralph Romano, Jr. Therefore we are addressing the envelope to him and making out the permit to him as installer with the caveat that Gulf Oil will deliver the permit to him. It would have been according to our usual practice if Mr. Romano had filed the application for the permit rather than Mr. Mackell of Gulf Oil. Suffice to say that we are compelled to hold the installer responsible for the details, for notice to Fire Headquarters and approval of Fire Department before covering up the tanks. Normally this department would expect the fuel oil tank before covering up because it is to be connected with oil burning equipment for which we will later issue a permit to the installer. This equipment. To avoid duplication, however, it seems best that the Fire Department Inspector inspect all five of the tanks on the assumption that they will all be ready at the same time. If, however, the 500 gallon fuel oil tank is to be installed at a later date than the gasoline tank and waste oil tank, notice should be given to this department for inspection of it.

The permit is issued on the basis that all of the tanks will be installed precisely in the location indicated on the plat plan accompanying application for building permit for construction of the building. If this is not to be the case, the correct location should be indicated by plan filed at this office before any of the tanks are installed. If the correct locations proposed are shown on the plat plan, but in actual installation it is found best to locate any of the tanks differently, the corrected information as to location should be filed at this office on the plat plan which we have or a supplementary plan.

It is very important, especially with the gasoline tanks that the record here show precisely where the tanks are located so that they may be reached unerringly in case of need.

Very truly yours,

McD/O

August 19, 1949

Gulf Oil Company  
601 Danforth Street  
Portland, Maine

Subject: Permit for construction of Ser-  
vice Station at 797-803 Washington Ave.

Attn: Mr. A. C. Denner, Dist. Mgr.

Gentlemen:

Location of the building on the lot having been checked, an inspection of the revised plans shows that all of the questions raised in our letter of May 12, 1949, which was sent with the permit when issued, have been taken care of. I wish to call to your attention, however, the following matters:

1. The use of the suspended floor furnace has now been approved subject to its bearing the label of the Underwriters Laboratories, Inc. approving its use in garages and hangars, to its being installed with the flame at least eight feet above the floor and to the burner being not more than fifteen feet above the fuel supply. Also to be taken into consideration in making the installation is the fact that clearances from combustible material above the furnace and smokepipe and from all sides of the furnace must be maintained as specified by the Building Code. With the installation of this type of heating equipment the need for an enclosure of the heater room and for taking a portion of the circulated air from outside the building is eliminated. Also eliminated is the necessity for the step-up from the floor of the lubricatorium to the sales space and for the provision of a fire door and frame in the doorway at this location. Separate permits issuable only to the installers are required for the installation of this heating equipment and also for the tanks and pumps.
2. A structural metal frame is required for the fire door in the rear wall of the lubricatorium rather than a wood one covered with metal.
3. Two signs projecting over the sidewalk, one on Ocean Avenue and the other on Washington Avenue, are noted on the plat plan. These signs are required to be erected only by a bonded sign hanger and a permit for each sign issuable only to such a sign hanger is required for their erection.

Very truly yours,

Warren McDonald  
Inspector of Buildings

May 12, 1949

Gulf Oil Company  
Attn: Mr. A. G. Benner  
District Manager  
601 Danforth Street  
Portland, Maine

Subject: Permit for construction of Service  
Station building at 797-803 Washington  
Avenue

Gentlemen:

The appeal under the Zoning Ordinance having been sustained, the permit for the above work is issued herewith based on the revised plans received May 6, 1949 and subject to the following:

1. Separate permits are required for the demolition of the existing buildings on the lots and should be secured before any demolition work is started.
2. It is usual practice to require staking out of the building on the lot for checking before issuance of a permit, but because of the existing buildings it is impractical in this case. Therefore the permit is issued on the basis that after batter boards and lines have been put up, notice for checking the location will be given this department before any excavation for the building is started.
3. The Commissioner of Public Works for the City was informed us that he will be unable to approve the arrangement of driveway entrances to the lot as shown on the revised plot plan. We suggest that you get in touch with him as soon as possible to determine what arrangement may be acceptable, as the location and width of the driveways may have some bearing upon the location of the equipment on the lot.
4. Wherever fire doors are to be provided in masonry walls, structural metal frames rather than wood metal covered are required. The Glass "B" fire door to be provided in the partition between the service garage and the sales space is required to be either automatic or self-closing, but self-closing operation is preferable.
5. The bottom of the opening of the duct taking the return air from the sales space to the warm air heater is required to be at least four feet above the floor of the sales space. A separate permit issuable only to the installer is required for the installation of the heating equipment as well as for the installation of tanks and pumps for inflammable liquids.
6. In order to offset the spreading action from the thrust of the cables roof over sales section, care should be taken to provide ties from ceiling timbers to walls of this section.
7. It should be noted that this permit will lapse if no work is started on the project within three months from the date it is issued and that the rights secured by the zoning appeal will expire unless work is started within a period of six months from the date of April 18, 1949 when the appeal was sustained.
8. We shall appreciate receiving the name of the contractor who is to do the work as soon as he has been selected.

Very truly yours,

**City of Portland, Maine**  
**Board of Appeals**  
**—ZONING—**

February 21, . 19 49

To the Board of Appeals:

Your appellant, Gulf Oil Corporation, who is the owner of property at 797-803 Washington Ave., respectfully petitions the Board of Appeals of the City of Portland to permit an exception to the regulations of the Zoning Ordinance relating to this property, as provided by Section 17, Paragraph E of the Zoning Ordinance,

Building permit to cover construction of Service Station building at 797-803 Washington Avenue, about 35' x 52', is not issuable because this property is within a Local Business Zone where Section 6A8 of the Zoning Ordinance provides that such a use is not allowable unless first authorized by the Board of Appeals after the usual appeal procedure.

The facts and conditions which make this exception legally permissible are as follows:—

An exception is necessary in this case to grant reasonable use of property and can be granted without substantially departing from the intent and purpose of the Zoning Ordinance.

Original exception granted on this property on October 31, 1947, but has now expired. Work was not begun at that time because company's program on owned and fee stations was not then ready.

GULF OIL CORPORATION  
By *A. J. Brown* District Manager  
Appellant

**City of Portland, Maine**  
**Board of Appeals**  
**—ZONING—**

**Decision**

Public hearing was held on the \_\_\_\_\_ 18th day of March, 1949,  
on petition of Gulf Oil Corporation, owner of property at  
797-803 Washington Avenue, seeking to be permitted an exception to the regulations of  
the Zoning Ordinance relating to this property.

Building permit to cover construction of Service Station building at 797-803  
Washington Avenue, about 35' x 52', is not issuable because this property is  
within a Local Business Zone where Section 6aB of the Zoning Ordinance pro-  
vides that such a use is not allowable unless first authorized by the Board of  
Appeals after the usual appeal procedure.

The Board finds that an exception is necessary in this case to grant reasonable  
use of property and can be granted without substantially departing from the  
intent and purpose of the Zoning Ordinance.

It is, therefore, determined that exception to the Zoning Ordinance may be permitted  
in this specific case.

Gentlemen:

The Board of Appeals will hold a public hearing  
in the Council Chamber, City Hall, Portland, Maine on  
Friday, March 18, 1949 at 10:30 a. m. to hear your appeal  
under the Zoning Ordinance relating to the premises at  
797-803 Washington Avenue.

Please be present or be represented at this  
hearing in support of your appeal.

Yours truly,

BOARD OF APPEALS

Robert L. Gatchell

601 Danforth Street,  
Portland, Maine

Subject: Application for building permit  
to cover construction of Service Station  
building (Service Garage under the Building  
Code) at 797-803 Washington Ave.,  
corner of Ocean Avenue

Gentlemen:

You have asked that we proceed under your application for a building permit, completed January 28, 1948, to cover construction of a one story brick Service Station building (Service Garage), about 35' x 52' at 797-803 Washington Avenue, corner of Ocean Avenue, and since all rights under zoning appeal relating to this project and sustained conditionally on October 31, 1947, have expired, the building permit is not issuable because the property is within a Local Business Zone where Section 6A8 of the Zoning Ordinance provides that such a use is not allowable unless first authorized by the Board of Appeals after the usual appeal procedure.

You have indicated your desire to again go through with the appeal procedure, and there is enclosed, therefore, an outline of the appeal procedure.

As regards compliance with the Building Code, in case your appeal should be successful, you no doubt have in your files my letter of February 7, 1948 which indicated certain questions as to compliance with requirements of the Building Code, based on your plans filed here January 28, 1948.

Very truly yours,

(Signed) WARREN McDONALD

Inspector of Buildings

WMAD/G

CITY OF PORTLAND, MAINE

BOARD OF APPEALS

49/3  
April 5, 1949

TO WHOM IT MAY CONCERN:

The Board of Appeals will hold a public hearing in the Council Chamber, City Hall, Portland, Maine on Friday, April 15, 1949 at 10:30 a. m. to hear the following appeals under the Zoning Ordinance:

Sun Oil Company - 550 Ocean Avenue - Construction of one-story service garage.

Gulf Oil Corporation - 797-803 Washington Avenue - Construction of service garage.

Both of these permits are not issuable because the properties are located in a Local Business Zone where filling stations are excluded except as authorized by the Board of Appeals. Exceptions in these cases were granted on May 20, 1946 and October 31, 1947, respectively, but have expired.

These appeals are taken under Section 17h of the Zoning Ordinance which provides that the Board of Appeals, by unanimous vote of its members, may permit exceptions in specific cases so as to grant reasonable use of property where necessary to avoid confiscation and without substantially departing from the intent and purpose of the Zoning Ordinance, subject always to the rule that said board shall give due consideration to promoting public health, safety, convenience and welfare, encouraging the most appropriate use of land and conserving property values, that it shall permit no building or use injurious, noxious, offensive or detrimental to a neighborhood, and that it shall prescribe appropriate conditions and safeguards in each case.

All persons interested either for or against these appeals will be heard at the above time and place, this notice of required public hearing having been sent to the owners of property within 500 feet of these premises as required by law.

BOARD OF APPEALS

Robert L. Getchell

Chairman

CITY OF PORTLAND, MAINE

BOARD OF APPEALS

March 8, 1949

TO WHOM IT MAY CONCERN:

The Board of Appeals will hold a public hearing in the Council Chamber, City Hall, Portland, Maine on Friday, March 18, 1949 at 10:30 a. m. to hear the appeal under the Zoning Ordinance of Gulf Oil Corporation requesting exception to the ordinance to permit construction of service station building at 797-803 Washington Avenue.

This permit is not issuable because this property is within a Local Business Zone where Section 6A8 of the Zoning Ordinance provides that such a use is not allowable unless first authorized by the Board of Appeals after the usual appeal procedure. It should be noted that original exception to permit this service station, which was granted on October 31, 1947, has expired thus necessitating a new hearing.

This appeal is taken under Section 17B of the Zoning Ordinance which provides that the Board of Appeals, by unanimous vote of its members, may permit exceptions in specific cases so as to grant reasonable use of property where necessary to avoid confiscation and without substantially departing from the intent and purpose of the Zoning Ordinance, subject always to the rule that said board shall give due consideration to promoting public health, safety, convenience and welfare, encouraging the most appropriate use of land and conserving property values, that it shall permit no building or use injurious, noxious, offensive or detrimental to a neighborhood, and that it shall prescribe appropriate conditions and safeguards in each case.

All persons interested either for or against this appeal will be heard at the above time and place, this notice of required public hearing having been sent to the owners of property within 500 feet of the premises in question as required by law.
