AP-1115 Washington Avenue

June 12, 1962

Vincent Mortefuso
Vincent Construction Company
1041 Washington Avenue

cc to: Paul Bridges
38 Edgewood Ave.

Gentlemen:

Permit to construct a 1-story frame dwelling with attached 1-car garage 69' wide by 24'8" long is being issued subject to revision of plans received this date and the following:

1. Building is to be set back 40 feet from the street line of Washington Avenue to comply with the setback requirements for this street as per Section 21 of the Zoning Ordinance.
2. Area of dwelling to be used as a Beauty Shop home occupation is to be 14 feet wide and 17 feet deep with a household storage area to the rear of this room.
3. Sills for garage and adjoining beauty shop and storage areas will need to be no less than 4x6 inch members.
4. As the 4x8 inch hemiclock header is inadequate to support the Building Code design roof loads over the 10 foot opening then a solid 4x12 inch Douglas Fir member will be needed.
5. As the 4x6 inch hemiclock headers over the 8 foot wide window openings under eaves are inadequate to support the truss roof loads then 4x10 inch Douglas Fir headers will be required at these sections.
6. The 4x10 inch header above the 9 foot wide overhead garage door opening will need to be of Douglas Fir.

Very truly yours,

Gerald E. Mayberry
Deputy Building Inspection Director

1115 Washington Ave. - 6/1/62 - Allan 172-C-1,3

AP - 1107-1113 Washington Ave.

June 6, 1962

Vincent Construction Co.
1041 Washington Ave.

cc to: Mr. Paul Bridges
38 Edgewood Ave.

Gentlemen:

Building permit for construction of a one story single family dwelling approximately 25 feet by 41 feet with addition 25 feet by 28 feet on end of it to be used for the home occupation of a beauty parlor and single car garage is not issuable under the Zoning Ordinance for the following reasons:

1. The area of that part of the dwelling unit to be used for beauty parlor purposes is indicated as about 35% of that part of the area of the unit devoted to living quarters, which is in excess of the 25% permitted to be so occupied under the definition of "Home Occupation" in Section 27 of the Ordinance.
2. The building is shown located only 30 feet back from the street line instead of the 40-foot setback required by Section 21 of the Ordinance for that part of Washington Avenue where the property is located.

While the discrepancy as to setback from the street line is subject to appeal, the Appeal Board does not have the authority to grant a variance concerning the area of the building to be used for the beauty parlor. There are a number of questions in regard to compliance with Building Code requirements in relation to the construction shown on the plans, but it hardly seems best to go into detail about them until questions as to zoning have been resolved.

Very truly yours,

Albert J. Sears
Director of Building Inspection

CITY OF PORTLAND, MAINE
DEPARTMENT OF BUILDING INSPECTION

July 10, 1962

Mr. Philip Plummer,
32 Woodlawn Ave.
Westbrook, Maine

Dear Mr. Plummer:

With relation to permit applied for to demolish a building or ~~part of a building~~ at 1115 Washington Ave. it is unlawful to commence demolition work until a permit has been issued from this department.

Section 6 of the ordinance for rodent and vermin control provides: "It shall be unlawful to demolish any building or structure unless provision is made for rodent and vermin eradication. No permit for the demolition of a building or structure shall be issued by the Building Inspector until and unless provisions for rodent and vermin eradication have been carried out under supervision of a pest control operator registered with the Health Department.

The building permit for demolition cannot be issued until the provisions of this section have been satisfied. It is the obligation of owner or demolition contractor or both to take up with the Health Department the matter of complying with this section, being prepared to inform that department what registered pest control operator is to be employed.

Very truly yours,

Albert J. Sears

15. The permit holder must notify the permit office of any change in the cost of the work to be done.

AP 1111-1113 Washington Ave.
Construction of outside masonry chimney for & by Philip E. Plummer

Sept. 22, 1959

Mr. Philip E. Plummer
1115 Washington Avenue

Dear Mr. Plummer;

Building permit for the above chimney is issued subject to the following conditions, without prejudice to the defective conditions formerly brought to your attention. Unless you have the necessary equipment and are sure you have the "know-how" to build this chimney sound and plumb, you are urged to employ an experienced mason to lay up the masonry.

If you decide to build on the base of the former chimney, you are to excavate by the side of the base, and, if this foundation extends at least 4' below the surface of the ground, you are to notify this office for inspection so that we can check upon that depth. If the foundation does not extend to that depth you are not to build upon it but to construct a new foundation. If you decide to build the chimney at some other location, you are to excavate for the foundation so that the depth will be at least 4' or to ledge if ledge is encountered at a less depth, construct forms on all sides of the foundation and then notify this office for inspection and wait for our Field Inspector's approval sticker to be attached to the permit card, before anything at all is placed in the forms.

Flue lining no less than nominal 8"x8" is to be used, a chimney is to be built to such a height that no roof surface or any other part of the building will be closer than 10' measured horizontally, to its top, and, if that height is more than ten times the least cross-sectional dimension of the chimney, the chimney must be braced to the building using non-burnable material. The tile lining must run from the bottom to the top of flue, and the cast iron cleanout door and frame is to be provided in a place easily reached for cleaning out and with the bottom of the door no more than 12 inches above the bottom of flue.

The concrete chimney blocks cannot be used for that part of the chimney where the smokepipe connects to it. That part will have to be done by a competent mason and must be built of brick, and the brick corbelled out from the chimney so that the masonry passes through the board wall of the building to the inside face where the metal smokepipe may be connected. At all other parts the chimney wall must be at least 1" from the woodwork of the building or, if closer than that, the outside of the wall of the building must be protected by a layer of asbestos lumber, 3/8-inch thick or two-ply of 3/16-inch asbestos board. Of course the space

Mr. Philip B. Plummer

Page 2

Sept. 22, 1959

or crack between the chimney and the building wall will have to be caulked or flashed to protect from the weather.

If you are not willing to comply with these conditions, it is important that you do not start the work and return the permit card. If you are willing to comply, and have questions about the above or anything else in connection with the building, please contact the undersigned about them without delay.

Very truly yours,

Warren McDonald
Acting Deputy Inspr. of Bldgs.

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, Oct. 3, 1957

PERMIT ISSUED 01552 OCT 8 1957 CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 1125 Washington Ave. Use of Building Dwelling No. Stories 1 1/2 New Building Existing Name and address of owner of appliance F.E. Plummer, 1125 Washington Ave. Installer's name and address Utility Gas Store, 915 Forest Ave. Telephone 4-0387

General Description of Work

To install Gas-fired heater (putting in 2-100 lb. gas tanks)

IF HEATER OR POWER BOILER

Location of appliance Living Room window Any burnable material in floor surface or beneath? If so, how protected? Kind of fuel? L.P. Gas Minimum distance to burnable material, from top of appliance or casing top of furnace Front top of smoke pipe incorporated From front of appliance From sides or back of appliance Size of chimney flue vent Other connections to same flue If gas fired, how vented? incorporate vent Rated maximum demand per hour 45,000 BTU Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? yes

IF OIL BURNER

Name and type of burner Labelled by underwriters' laboratories? Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? Type of floor beneath burner Size of vent pipe Location of oil storage Number and capacity tanks Low water shut off Make No. Will all tanks be more than five feet from any flame? How many tanks enclosed? Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath? If so, how protected? Height of Legs, if any Skirting at bottom of appliance? Distance to combustible material from top of appliance? From front of appliance From sides and back From top of smokepipe Size of chimney flue Other connections to same flue Is hood to be provided? If so, how vented? Forced or gravity? If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Model N45 Suburban Novent Manufactured by Suburban Appliance Company, Route 10 Whippany (office) New Jersey Hunt Heater Corp. Nashville & Dayton, Tenn factory---Dayton, Tennessee. all clearances to combustibles are as specified A.C.A. Permit Issued with Letters

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

APPROVED: Carl P. Johnson CHIEF OF FIRE DEPT.

Will there be in charge on the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes Utility Gas Store

NOTES

Vertical lined area for notes, mostly blank with some faint markings.

October 8, 1957

AP (called) 1125 Washington Ave.—Installation of central recessed
gas-fired heater for F. E. Plummer

Utility Gas Store
Att: Mr. Horton
915 Forest Ave.
Mr. F. E. Plummer
1125 Washington Ave.

Gentlemen:

Building permit for the above installation is issued to
Utility Gas Store, herewith, subject to the following conditions.

To meet the need of the owner as quickly as possible, this
letter is being dictated before the approval of the Chief of the
Fire Department has been given upon the location and arrangement
for supporting the containers for the liquefied petroleum gas, and
is written on the assumption that he will approve the arrangement
shown on the Utility Gas Store sketch.

The heater is listed and approved by the American Gas
Association based on installation of the heater in a wooden frame
wall, but the Association adds the injunction that the heater
must be installed in strict compliance with the instructions of
the manufacturer; also that suitable protection shall be provided
around the heater for the combustible material. The permit is
issued on the basis that the installer will take all of these pre-
cautions.

It has been explained to us that the products of combustion
from the burning of the gas flame is vented directly out of doors
through the outside casing of the heater, and the permit is issued
on the basis that this means of venting is actually provided.

Very truly yours,

WMCD/E

September 20, 1957

1111-1113 Washington Ave.—Violation of the Building Code and order relating thereto

Mr. Philip E. Plummer
1115 Washington Ave.

Dear Mr. Plummer:

On August 21 a field inspector from this office found that you had seen fit to make substantial alterations in the building which you are reported to own at 1111-1113 Washington Ave. by way of constructing one or more dormer windows, removing a portion of the building and providing a flat roof over the remainder, and perhaps some other work—this without first securing a building permit required by the Building Law. He further found out that the portion of work done does not comply with the requirements for construction. Among other things the rafters of the dormer are 30 inches from center to center instead of the minimum of 24 inches required by the Building Code. From the looks of the photograph which he took, I doubt if the roof is framed substantially or to comply with the requirements of law.

The record shows that you have owned this property since around 1948. It seems almost inconceivable, Mr. Plummer, that you would have owned property and perhaps lived in the City of Portland for eight or nine years and be unaware that a building permit is required before alterations are started. At any rate that is the fact.

By carrying on the work without first securing the permit you not only made yourself liable for violation of law, but you lost the opportunity that you otherwise might have had for finding out what is required, which you would have to have known and explained to us before a permit could be issued.

In the meantime, as you were told by our inspector, you are not to do any more work on the project, and before September 30, 1957 you must work out some method of making the job comply with all Building Code requirements and file belated application for a permit to cover the work already done and to continue it. With the application will be necessary for you to show full details of all of the work to comply with the Building Code, and especially to show how you intend to make that part of it which is contrary to the Building Code now, comply with the law.

You can rest assured, Mr. Plummer, that we want to help you even out of this difficulty, but just how it can be done without undue expense to you is not apparent.

On September 16 you applied for a permit to construct an outside

Mr. Philip Z. Plummer

2

September 20, 1957

brick chimney at the rear of the dwelling. Obviously, with the building and yourself in violation of the Building Law, we are unable to issue the permit to construct this chimney. How you propose to do that will have to be explained at the same time as the other part of the work.

Very truly yours,

Warren McDonald

Original Permit No. 38/1501

Amendment No. 1

AMENDMENT TO APPLICATION FOR PERMIT

Portland, Maine, October 25, 1938

111-1113

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for an amendment to Permit No. 38/1501 pertaining to the building or structure comprised in the original application in accordance with the Laws of the State of Maine, the Building Code of the City of Portland, plans and specifications, if any, submitted herewith, and the following specifications:

Location 1115 Washington Ave. Ward 9 Within Fire Limits? no Dist. No. _____

Owner's or lessor's name and address R. H. Sweetser, 1118 Washington Ave.

Contractor's name and address Ira Dresser, 1550 Congress Street

Plans filed as part of this Amendment no No. of Sheets _____

Increased cost of work _____ Additional fee .25

Description of Proposed Work

To locate garage 12" from dwelling as shown in red on original plan, instead of 15" as shown on plan.

The inside of the garage will be covered, where required by law, with sheets of combined asbestos and cement not less than 3/8" in thickness with all joints filled with cement mortar.

Signature of Owner *Raymond A. Sweetser*

Approved: *Chas. V. Nicholson*

Chief of Fire Department

P.30/1501-I

10-22-38-S

October 24, 1938

Mr. R. H. Sweetsir,
1118 Washington Avenue,
Portland, Maine

Dear Sir:

Inspection on September 27th shows that you had not then moved the garage at 1115 Washington Avenue to the location indicated in the sketch attached to your application for the permit.

That sketch indicates that the garage would be 5 feet from the house while on the date mentioned the garage was only 18 inches from the house. If this is where you propose to leave the garage, it will be necessary for you to file an amendment to the original permit and since the garage would be closer than five feet to the dwelling house, all parts of the inside of the outside wall of the garage closer than five feet to any part of the dwelling house will be required to be protected by a three-eighths inch thickness of so-called asbestos lumber cemented at the joints or by plaster on metal lath or perforated gypsum lath. The approval of the Chief of the Fire Department would have to be secured again, of course.

Just now, unless the garage has been changed from its location on September 27th, the building is in violation of the Building Code, for which you are personally responsible.

Please let me hear from you at least by October 27, 1938 as to what you propose to do under these circumstances.

Very truly yours,

W McD/H
