INSPECTION COPY

AP 47 Belfield St.

September 17, 1953

Mr. Fred I. Merrill
22 Somerset St.
South Portland, Me.,
Mr. Frederick O. Erickson
47 Belfield St.

Gentlemen:

Several details of the proposal for construction of a one story addition at 47 Belfield St. do not show compliance with the Building Code, there seems to be inconsistencies between the framing information on the application and that shown on the plan, and at least one detail is probably contrary to the Housing Code, which is administered by the Health Department.

Under these circumstances it is necessary to revise the plan to show compliance with both laws and have the name of the maker of the plan and his address shown on the original, then procure a fresh print and file with the application for the permit.

1. Our inspector reports that the addition would prevent two of the windows in the existing kitchen from opening to outside of the building and would leave only one small double hung window to give light and ventilation for the existing kitchen, the latter being only two feet by two feet six inches. If his information is correct there would be left only five square feet of window area to serve the existing kitchen. The Housing Code, administered by the Health Department, provides that every habitable room shall have windows opening into a street, alley, yard or court open to the sky having an area equal to at least one-twelfth of the floor area of the room, and that at least one-half of the sash area must be openable unless there is provided an approved method of mechanical ventilation.

If our inspector's report is correct, it would mean that the existing kitchen would have to have an area of only 60 square feet (about 6 feet by 10 feet) to satisfy the Housing Code. While we are not directly responsible for enforcing the Housing Code, we are unable to issue building permits which would establish a situation in violation of it.

2. The plan shows both floor joists and roof joists of the addition to be run at right angles to the existing rear wall of the dwelling, and the plan indicates the shallower part of the addition to extend 12 feet from the dwelling and the 16 foot dimension of the addition to be parallel to the rear wall of the dwelling. Thus, according to the plan the span of the floor and roof joists would be a little under 14 feet. Mr. Merrill has indicated on the application, however, that the maximum span of roof joists and floor joists (this span is the distance between supports, not the full length) as 15 feet 6 inches.

It seems desirable for the plan maker and Mr. Merrill to get together on this information, so we can check the proposition and issue the permit. It is to be borne in mind that while, by a special exception in the Building Code, the 2x8 floor joists may be used on spans up to 14 feet, there is no such allowance for the roof joists and the 2x8s would not work out even on the 14 foot span. 2x10s would work out on the 14 foot span of the roof joists, but could be spaced no more than 20 inches from center to center if desired.

3. The plan maker should indicate no less than 1x3 cross bridging approximately in the center of both floor joists and roof joists spans.

File: AP 47 Belfield St.

September 17, 1953

Dr. Edward W. Colby, Health Director

Warren McDonald, Inspector of Buildings

Question of sufficient window area in the kitchen at 47 Belfield St. where an addition is to be built.

This job is the one I phoned you about and the inspection copy of application and the blueprint showing the proposed layout of the addition is attached. Unfortunately, the plan does not show the outline of the existing kitchen, but the two windows shown which would come inside of the addition instead of opening out-of-doors now serve the kitchen, and at the left of the addition, as one looks at the plan, is this small window of about five square feet.

The owner had thought that by putting sufficient openable windows in the addition he would be able to provide plenty of light and air for the kitchen.

The owner is planning a vacation for next week and would like to get the work started the early part of the week, so would appreciate it if you could give the answer to the problem, as far as the Housing Code is concerned, as early as possible on Friday, September 18th.

Inspector of Buildings

WMCD/G
Attachment: Application for Permit and one Blueprint

INTER-OFFICE CORRESPONDENCE

CITY OF PORTLAND, MAINE
HEALTH DEPARTMENT

TO: Warren McDonald, Inspector of Buildings DATE: September 18, 1953
FROM: Dr. Edward W. Colby, Health Director
By: Gordon E. Martin, Housing Supervisor
SUBJECT: Question of sufficient window area
 in the kitchen at 47 Belfield Street
 where an addition is to be built.

We have made measurements of the kitchen at 47 Belfield Street and have applied the available floor area to the window area and find that the proposed plan is in compliance with section three of the City Ordinance "Minimum Standards for Continued Occupancy".
