Memorandum from Department of Building Inspection, Portland, Maine

35 Westminister Avenue--Installation of oil burning equipment for Douglas H. Marshall
by Ballard Oil & Equipment Co.,--August 4, 1949

Permit is issued subject to the conditions:

1. The fuel oil tank (a 55 gallon drum is indicated) must not have a less thickness of shell than # 14 gauge.
2. Despite the small size of the fuel oil tank, both fill pipe and vent pipe are required to extend outside of the building in the same manner as for a larger tank and the same minimum size of vent pipe is required.
3. The tank requires non-burnable supports and to be firmly anchored to the supports and supports to the floor or otherwise so that there is not danger of mechanical injury to tank or piping, especially when the tank is nearly empty.

Dear Mr. McDonald:

Regarding Permit No. 01219 issued August 4th 1949 to installed oil burning equipment for Douglass H. Marshall, 35 Westminster Ave., in making the application for oil burner permit, a notation was made on our survey to move 275 gallon drum in order for us to get the 275 gallon tank into the cellar. This drum does not have any connection with the storage of oil for furnace burner but is used solely for the storage of oil for a kitchen range. We are returning the permit with a corrected application.

An error was made in applying for the permit of Charles H. Deering of 510 Ocean Ave. instead of 570 Ocean Ave. We are passing this so that the inspector will not be misled when he makes his inspection.

Yours very truly,

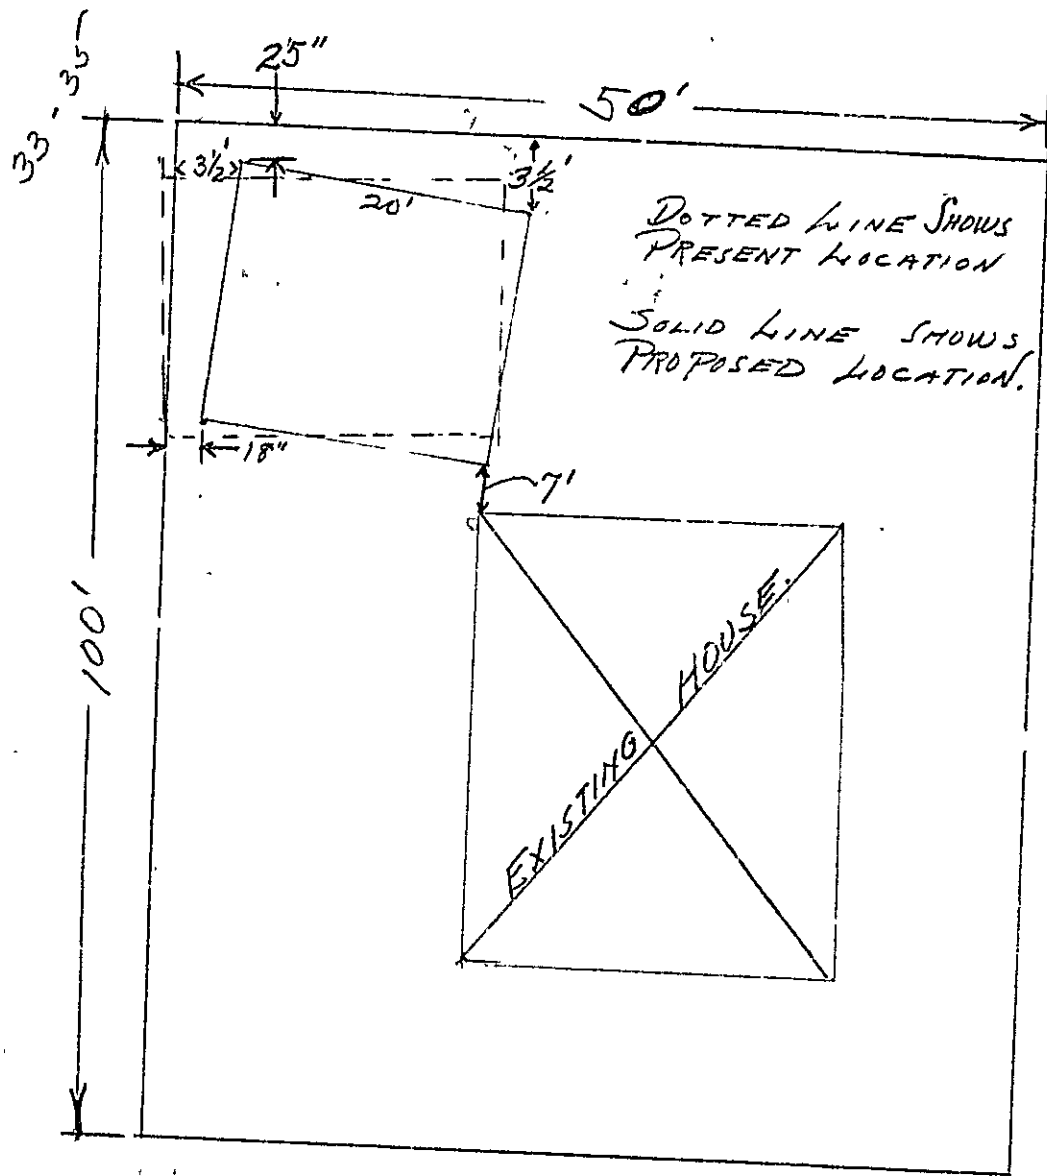

BALLARD OIL & EQUIPMENT CO.
