cc to: Roman Catholic Bishop of Portland
510 Ocean Avenue

Gentlemen:

Permit to make alterations at the above named location is being issued subject to plans received with the application and in compliance with Building Code restrictions as follows:

1. Toilet rooms are to be vented as required by the Plumbing Inspector.
2. There will need to be an extension of the existing fire alarm system as required by the Fire Department.
3. Exit lights will be required over doors marked B-8 and B-9 for the Assembly Room in the basement.
4. All doors counted as means of egress and leading to the open air or so as to require locks, shall be equipped with anti-panic hardware.
5. A door between the library and classroom 102 on the first floor to be located near the drinking fountains is required so that there will be two means of egress out of each new room in this existing building.

Very truly yours,

A. Allan Soule
Deputy Director of
Building & Inspection Services

AAS:m

P.S. State requirements will need to be met as required by them.

Location: 1251 Congress St.

April 22, 1959

Before tank and piping is covered from view, installer is required to notify Fire Dept. Headquarters of readiness for inspection and to refrain from covering up until approved by Fire Dept. Headquarters.

This tank of 1-1000 gallon capacity is required to be of steel or wrought iron no less in thickness than 10 gauge; and before installation is required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

Memorandum from Department of Building Inspection, Portland, Maine

1251 Congress Street--Installation of gas-fired restaurant range for
St. Patrick's Church by Portland Gas Light Company--
August 12, 1952

Permit for installation of a gas-fired restaurant range in place of three existing ranges in the basement of St. Patrick's Church at 1251 Congress Street is issued herewith. The setting of the new range on a sheet of metal on top of the wood floor is approved only on the basis that the legs supporting the range are to be at least 4 in. high, that any gas burners will be at least 6 in. above the floor, and that the space of 4 in. or greater between the bottom of the range and the floor is to be free and clear of any obstructions, such as a skirting band, so that free circulation of air beneath the range will be maintained at all times.

If the above conditions are not understood, or, if installer is unable or unwilling to comply with them, it is important that the installation shall not be started, and that this office be contacted with more complete information.
