STANWALKER
8203-1R

STATEMENT ACCOMPANYING APPLICATION FOR BUILDING PERMIT

for dwelling Date 3/27/53
at 78 Rollon St. 72-74

1. In whose name is the title of the property now recorded? Charles Kaatz
2. Are the boundaries of the property in the vicinity of the proposed work shown clearly on the ground, and how? stakes
3. Is the outline of the proposed work now staked out upon the ground? Yes
If not, will you notify the Inspection Office when the work is staked out and before any of the work is commenced? _____
4. What is to be maximum projection or overhang of eaves or drip? _____
5. Do you assume full responsibility for the correctness of the location plan or statement of location filed with this application, and does it show the complete outline of the proposed work on the ground, including bay windows, porches and other projections? yes
6. Do you assume full responsibility for the correctness of all statements in the application concerning the sizes, design and use of the proposed building? yes
7. Do you understand that in case changes are proposed in the location of the work or in any of the details specified in the application that a revised plan and application must be submitted to this office before the changes are made? yes

Wm. B. Millward
48 Fessenden St.

Dear Mr. Butland:-

We are unable to issue a permit for construction of a single family dwelling 24 feet by 30 feet on the lot at 72-74 Bolton St. because of the reasons listed below. It is necessary that the location and architectural plans be revised to show compliance with Zoning Ordinance and Building Code requirements, that fresh prints be filed with all of the information on them printed from the originals, and that the location be re-staked on the ground for checking. Matters in question are as follows:

- ✓ 1. A side entrance platform not shown on the location plan, but indicated on the architectural plans, would project three feet into a five foot side yard, whereas a clearance of not less than five feet from the platform to the side lot line is required by the Zoning Ordinance.
- ✓ 2. The projection of the front gable 15 inches closer to the street line than the front wall of the main house, as indicated on the architectural plans, is not shown on the location plan and the location has not been staked out on the ground so as to provide at least 15 feet between the street line and the front wall of this projection, as required by the Zoning Ordinance.
- ✓ 3. Are valley rafters to be used where the roof of the front gable is to be connected to the roof framing of the main house or is some other type of construction to be used? If valley rafters are to be used, what is their size to be?
- ✓ 4. What is framing of front and rear entrance platforms to be?
- ✓ 5. What is size of header over picture window in front wall of living room to be?
- ✓ 6. The estimated cost of \$6000.00 given in the applications seems rather low for the type and size of house to be constructed. Please furnish a revised estimate and pay adjusted fee or else furnish a detailed estimate to substantiate the figure given.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/G
