Owner Shaw's

Date of Permit 3-13-95

Final Inspection 3-16-95

By Inspector John H. [Signature]

Permit Application Register No. 2004

1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing resources.

3. Once the information is gathered, the next step is to analyze it and identify the key factors that influence the outcome. This may involve using statistical methods or other analytical tools.

4. After analysis, the next step is to develop a plan or strategy to address the problem. This plan should be based on the information gathered and the analysis performed.

5. The final step is to implement the plan and monitor the results. This involves putting the plan into action and tracking progress to ensure that the problem is being addressed effectively.
