JOHN DOES A I -

November 1, 1962

City of Portland, Maine Department of Building Inspection 110 City Hall, Portland, Maine

Attn. Mr. Albert J. Sears, Director

Re: St. Patrick's Church and Rectory, Congres Street Portland, Maine

Dear Mr. Sears,

In connection with the construction of subject Project, the undersigned sertifies to comply with your requirements stipulated in your letter of October 31, 1962, namely as follows:

- 1. The concealed space between the ceiling of the main building and the wooden roof construction shall be protected by the required sprinkler system. Also, a metal access door will be provided at ceiling above balcony in order to service sprinkler heads.
- 2. Indicated wood 4 x 6 perlins, suspending metul furring, metal lath and plaster, will be changed to steel.
- 3. Double Class "A" Doors will be installed at openings between Church and Rectory.

In view of this Affidavit, kindly issue an advance permit for foundation work, at your earliest convenience.

A new set of drawings, incorporating the foregoing changes, will be sent to you for your record.

Sincerely yours,

D'Orsi & Company

17 Frances St., Fortland

Gentlemen:

confirming conversation with ir. Dicrai in regard to required sprinkler system for new church at the above named location in this city, it will be satisfactory if only the concealed space between the ceiling of the main building and the wooden roof e-matruction is so protected and the infe ceiling supports are made of incombustible material as it is unierated the strapping is to be. It will also be naccessary to provide access to the concealed space for servicing of sprinkler heads.

As previously indicated, it will also be necessary to provide a four-hour fire separation between the church and the rectory with double Class "A" fire doors on any openings in it. The concrete and 12 inch concrete black walls indicated at this location will provide the required fire resistance so that the only change from conditions shown will be the addition of the fire doors.

If this arrangement is to be followed, please notify this office to that effect, so that there may be no further delay in issuance of an advance permit for excavation and foundation.

Very truly yours,

Alment J. Sears Ed. Ling Inscription Misster

tion I dien:

named location in this city has been shared and rectory at the above requirements about which it seems been to inform you without do averaged of the wooden roof construction of the church, it must be classified as second class construction. The rectory with its wooden wall, floor and roof construction, even mough walls are brief eneered, must be rated as in it class construction.

under labor square foot, it will need to be equipped with an intenstic sprinkler system or subtivided by four-sour fire walls into areas of SCO square feet or less in order to asset requirements of fact on 302-g-1 of the done. It will be necessary in any case for the church and rectory to be separated by partitions of four-sour fire-resistance. To permit can be issued, even for construction of the foundation, until it is known how this question is to be resolved. The of excavating for the project has already started without authorization from this department and we are not disposed to make an issue of units, are must insist that no foundation work be started until a percit authorizing it has been issued.

Yery trul; yours,

Albert J. Jears ... Link in James of ...

a:Cla

Jet. 29, 1952

bt. Patrick's church & meetory 17 Frances Street

ca to: Stewart : dillims, Inc. ca to: Normi & Company ca to: Corporation Command

Contlemen:

In connection with chec. of plans for processed church and rectory at the above named location, it appears that off-street parking required by the coming originance on the basis of the scatting capacity of the mayor is not to be provided on the lot on which the church is no be located, but that some arrangement is to be made for the use of the existing purking lot of the store mext door. The approval of the import of appeals must be some of or such an arrangement under the provisions of Jection 11,— of the coming declinance. Tarking for at least of cars will be neglect to satisfy the requirements of Jection 14.—B-11 of the Ordinance.

In order to get to the loard of Apprais, it is necessary that a request be addressed by letter to this department etating the number of spaces on the existing parking lot to be so used together with a lease or letter of autorization from the conner of the lot for such use. A certification letter on which an appeal may be based can then be written.

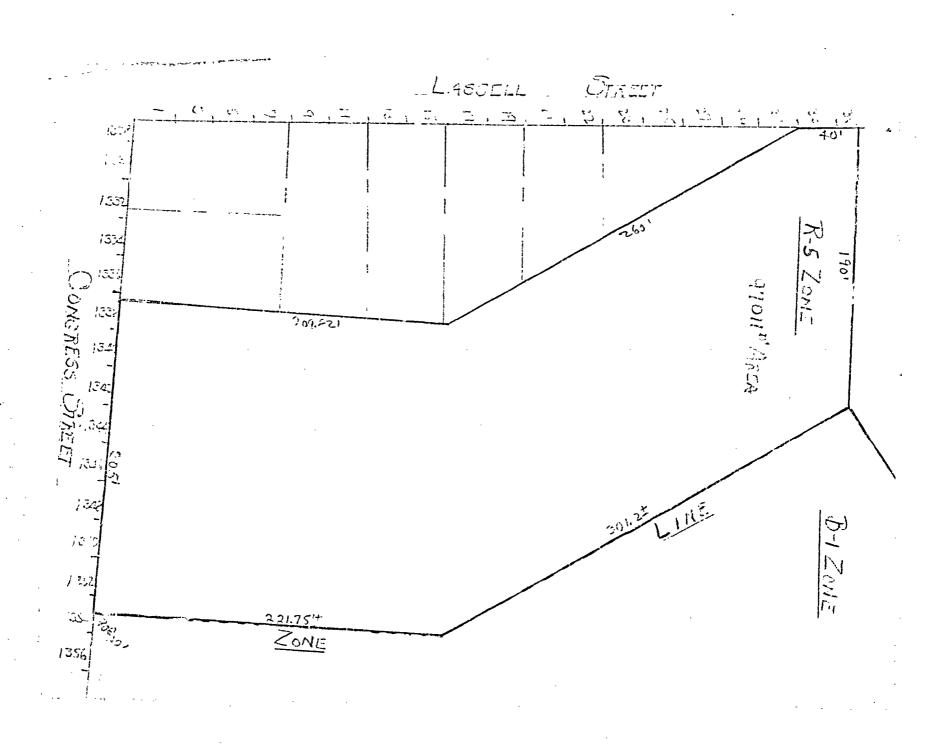

this this fatter may not necessarily delay work on the building, it is important that steps be taken without delay to get it settled, any permits is used before authorization by the Board of Appeals has been secured will necessarily be on the basis that the required off—street parking will be provided on the same lot as the church in authorization and arrangements cannot be made for use of the existing parking lot next door.

Very truly yours,

Albert J. Bears Building Inspection Director

October 23, 1962

Mr. Sears, Building Commissioner Portland City Hall Portland, Maine

Dear Mr. Sears,

As per our telephone conversation of yesterday morning, taking your permission to proceed with the foundation work of Saint 'atrick's Church and Rectory, Congress Street, Portland, Naine, we are sending you under separate cover, two sets of blans, for your approval.

Foundation work, indicated on Drawing Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, S-1, S-2, S-3, S-5 and S-6, dated October 23, 1962, has been designed and drawn up by the undersigned in accordance with the latest rules of Engineering practice and to comply with allowable soil pressures, floor loads, working stresses, etc., required by the Building Code of the City of Portland.

When plans and specifications for the superstructure are completed, they will comply in all respects with the above mentioned requirements.

Very sincerely yours,

D'Orsi & Company

CITY OF PORTLAND, MAINE DEPARTMENT OF BUILDING INSPECTION

March 8, 1960

Roman Catholic Bishop of Portland 317 Congress St.

With relation to permit applied for to demolish a building or portion of building at 1348 Congress Street it is unlawful to commence demolition work until a permit has been issued from this depart-

Section 6 of the ordinance for rodent and vermin control provides: "It shall be unlawful to demolish any building or structure unless provision is made for rodent and vermin eradication. No permit for the demolition of a building or structure shall be issued by the Building Inspector until and unless provisions for rodent and vermin eradication have been carried out under supervision of a pest control operator registered with the Health Department.

The building permit for demolition cannot be issued until the provisions of this section have been satisfied. It is the obligation of owner or demolition contractor or both to take up with the Health Department the matter of complying with this section, being prepared to inform that department what registered pest control operator is to be
