Return to Building Inspection Dept.

MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

August 9, 1968

Location: #1372-1330 Congress St.

Before tank: and piping are covered from view, installer is required to notify the fire Dept. Headquarters of readiness for inspection and to refrain from covering up until approved by the fire Dept. Headquarters

These tanks of 2000gallons capacity are required to be of steel or wrought iron no less in thickness than # 7gauge; and before installation are required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

Gentlemen:

Building permit for excavation and foundation only for 1-story masonry building 140' x 150' as per plans filed with the application at the above named location is being issued subject to the following:

- 1. You must assure responsibility that this foundation will support the building that it is designed for because we cannot make this check until we have the plans of the structure.
- 2. We cannot tell if the use planned is allowable in the B-1 Business Zone in which this property is located under the zoning ordinance. A number of business uses must have the approval of the Board of Appeals to be allowed in this zone.

Very truly yours,

A. Allan Soule Acting Deputy Director of Building & Inspection Services

CITY OF PORTLAND, MAINE IN THE BOARD OF APPEALS

VARIANCE APPEAL

December 11, 1964

Bradley Realty Company
, owner of property at 1352-1384 Congress Street under the provisions of Section 24 of the Zoning Ordinance of the City of Portland, hereby respectfully petitions the Board of Appeals for a variance from the provisions of said Ordinance to permit: erection of an electric sign 2½ feet high by 10 feet long on edge of canopy in front of barber shop in building at the above named location. This permit is presently not issuable because erection of the sign will bring the total area of signs on the premises of the shopping center to about 425 square feet, which is in excess of the maximum of 200 square feet permitted by Section 16-A-4a of the Ordinance applying to the B-1 Business Zone in which the property is located; and the sign is not allowable under the same section of the Ordinance because it is not to be affixed to the wall of the building but is to be located on the edge of the canopy.

LEGAL BASIS OF APPEAL: Such variance may be granted only if the Board of Appeais finds that the strict application of the provisions of the Ordinance would result in undue hardship in the development of property which is inconsistent with the intent and purpose of the Ordinance; that there are exceptional or unique circumstances relating to the property that do not generally apply to other property in the same zone orneighborhood, which have not arisen as a result of action of the applicant subsequent to the adoption of this Ordinance whether in violation of the provisions of the Ordinance or not; that property in the same zone or neighborhood will not be adversely affected by the granting of the variance; and that the granting of the variance will not be contrary to the intent and purpose of the Ordinance.

DECISION

After public hearing held ______, the Board of Appeals finds that all of the above conditions do ______ exist with respect to this property and that a variance should be granted in this case.

It is, therefore, determined that a variance from the provisions of the Zoning Ordinance should be granted in this case.

Gentlemon:

Building permit for erection of an electric sign 22 feet high by 10 feet long on edge of canopy in front of barber due in building at the above named location is not issuable under the loning trainance for the following reasons:

- 1. Erection of the sign will bring the total area of signs on the presides of the shopping center to about 425 square feed, which is in excess of the maximum of 200 square feed permitted by Sec. 16-A-4a of the Ordinance applying to the E-1 Business Zone in which the property is located.
- 2. The Bign is not elements under the same section of the ordinance because it is not to be affixed to the wall of the building but is to be located on the edge of the chappy.

We understand that the owner of the property would like to exercise its appeal rights in the matter. Accordingly an authorized representative should come to this office to file the appeal on forms which are available

very truly yours,
