AP 2-6, 8-12, and 14-16 Colonial Court

The Minat Corporation
220 Cumberland Ave.

Gentlemen:-

Building permits for construction of three dwellings at the above location is issued herewith based on plans filed with applications and your letter of March 11, 1955, but subject to the following conditions:-

1. Before notices for inspection of forms and check of location are given prior to pouring concrete information is to be furnished as to the size of headers to be used across bay window openings. OK

2. By acceptance of permit you agree to use Douglas Fir lumber for ~~6x8~~ girders indicated since full size spruce or hemlock will not figure out.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/G

March 10, 1955

AP - 2-6, 8-12, 14-16 Colonial Court

The Minat Corporation
220 Cumberland Ave.

Gentlemen:-

More information is needed before permits for construction of three dwellings at the above location can be issued, as follows:-

1. Because of the irregularities in the surface of the ground where these lots are located, unusual conditions as to height and support of the foundation walls are involved. Architectural plans filed with applications for permits give no indication of these unusual conditions nor as to how they are to be cared for. Therefore, either grading plans are needed for each of these lots indicating finished grade of ground outside all of the foundation walls and height, thickness, and depth of walls below grade at all critical points or else the architectural plans need to be revised to show the true conditions.
2. We understand that you contemplate finding ledge on at least one of the lots. Where ledge conditions are found, what construction is to be provided where foundation walls are to rest partly on earth and partly on ledge in such cases where it is not feasible to extend all parts of them to ledge?
3. Since you are sub-dividing this land in a different manner from that shown on the recorded plan, it should be borne in mind that before any approval can be given of forms prior to pouring of concrete, it is necessary that, as well as having the street lines clearly marked on the ground by the Public Works Department, you have the new lots surveyed by a competent surveyor and that all corners of each lot shall be clearly indicated on the ground.

Very truly yours,

Albert J. Sears
Deputy Inspector of Buildings
