Signature of owner Helen S Mienill Los P.M. Rt

Se .. omber 1, 1955

AP - 120 Capisic Street

Contractor—Rouben Merrill 120 Capisic St.

Omer-Helen S. Merrill 120 Capisic St.

Check of application for permit for construction of a single car garage 12 feet by 20 feet at the above location discloses the following discrepancies as to compliance with Building Code requirements:

--you have indicated that the tack sills are to be supported by cedar posts at intervals of 20 feet. On the basis that the sills are to be set with the six tack dimension woright, they will not figure out to carry watchy the floor and roof loads involved unless the supports are provided at intervals of not over five feet beneath the side walls of building. Of course larger size sills with posts spaced farther apart may be used if desired.

will not figure out to provide the carrying capacity of 40 pounds per square foot live load specified by the Code. If 2x6 timbers are used they will need to be spaced no more than 12 inches on centers, or 2x8's spaced no more than 18 inches on centers may be used if designd.

We shall be unable to issue a permit for erection of the building until information has been furnished indicating that framing is to comply with Building Occe requirements.

Very truly yours,

Albert J. Sears Poputy Espector of Buildings

AJS/G

## STATEMENT ACCOMPANYING APPLICATION FOR BUILDING PERMIT

at 120 Carisic Street Date 8/31/55
In whose name is the title of the property now recorded? Helen Merrill
Are the boundaries of the property in the vicinity of the proposed work shown clearly on the ground, and how? metal stakes
Is the cutline of the proposed work now staked out upon the ground? yes If not, will you notify the Inspection Office when the work is staked out and before any of the work is commenced?
What is to be maximum projection or overhang of eaves or drip? 7"
Do you assume full responsibility for the correctness of the location plat or statement of location filed with this application, and does it show the complete outline of the proposed work on the ground, including bay windows, porches and other projections?
Do you assume full responsibility for the correctness of all statements in the application concerning the sizes, design and use of the proposed building?
Do you understand that in case changes are proposed in the location of the rk or in any of the details specified in the application that a revised plan d application must be submitted to this office before the changes are made?
