receipt not returned for use

MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

April 3, 1964

Location: 2030 Congress St.

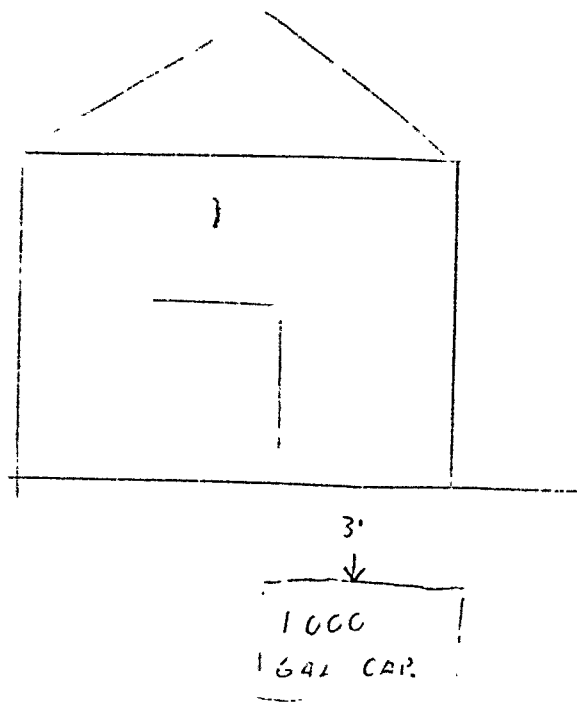

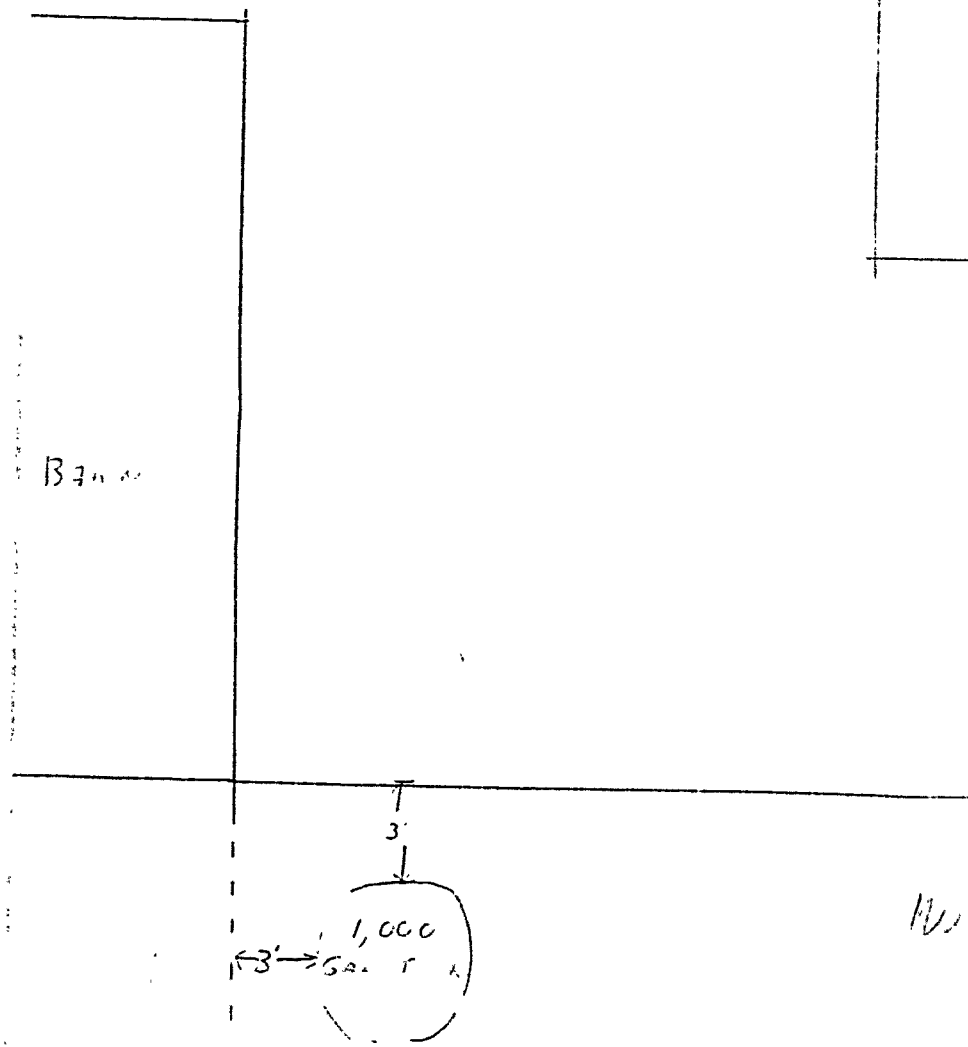

Before tank and piping is covered from view, installer is required to notify the ~~Fire Dept. Headquarters~~ ^{Fire Dept. Headquarters} readiness for inspection and to refrain from covering up until approved by the ~~Fire Dept. Headquarters~~ ^{Fire Dept. Headquarters}

This tank of ⁽¹⁾1000 gallons capacity is required to be of steel or wrought iron no less in thickness than # 10 gauge; and before installation is required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.
